1967-02 Deluxe Windshield Heat Shield

Easy to use UVS100 ultra violet heat shield helps reduce interior temperature and protect from damaging sun rays that come through the front windshield. One side is silver reflective fabric and the other side is finished in soft Pellon felt. Both fabrics are laminated to a foam core board which acts as an insulator to help reduce heat buildup. Produced using pre-sewn panels that quickly accordion fold for handy storage. There is no hardware or hassles, simply fold and position across the windshield surface, then fold the sun visors down to hold the shield in place. Optional storage bag is available.

- A complete set of stamps with specially formulated paint and crayons are included to truly complete your restoration!
- Basic or deluxe kits are available depending on your restoration requirements!

It's the details that make the difference!

You may have seen the letters P.T.B. on the firewall of your vehicle. The markings have specific meanings. We've offered a brief explanation to the most commonly asked questions concerning the replacement of these markings. The key between a good restoration and a great restoration is how much detail is put into it. Enter your restored vehicle in the show of your choice and maintain complete originality by obtaining the correct inspection markings. The judges will be impressed!

Questions and Answers

- Q. What does P.T.B. stand for?
 A. P.T.B. means P = Paint, T = Trim, B = Body.
 Q. Do they go in any certain order?
 A. No. They can be mixed up in any way you like. PTB, TBP, BTP, TPB, etc.
 Q. The most common way is PTB.
 Q. Where do they go?
 A. PTB can be on either side of the firewall but the driver side is the most common. They have also been seen on the side of the cowl behind the fender but it would be useless to put them there since they can't be seen.
 Q. What color should they be?
 A. They can be orange, light green, or a mixture of both. For example P=orange, T=light green, B=orange, or anyway you like. If your PTB is still intact before your restoration, do your new PTB's in the same colors. Not all vehicles included PTB's but when restoring yours we suggest you put them on.

Factory Inspection Marking Kit

Includes the correct P.T.B. stamps with specially formulated paint to give your vehicle the final inspection marks that the factory put on. Also included are the yellow and white crayons for marking your firewall with the factory inspection marks. A must for any true restoration. 2 color kit includes: green and orange, 7 color kit also includes: yellow, light blue, bright green, pink, and white.

Frame Engine and Body Markers

Automakers use these permanent markers to write codes and numbers on frames, engines and body components. Engine suffix codes were often written on the back of the cylinder heads. Job numbers were written on the firewall, frame, engine, and other components to assure the correct vehicle was being built according to the build sheet. These permanent paint markers will help you exactly duplicate the factory original marks.

OER® "Secret Formula" Clay Bar System

Clay pulls out all the contaminants you cannot see, but that you can definitely feel, like industrial fallout, rail dust, and brake dust. Though these contaminants are not visible, you can tell they are there because the paint will feel rough or gritty. These contaminants may cause patches of paint to appear dull, even after waxing. As these contaminants oxidize, they create rust spots within the paint. Once this happens, the oxidation is considerably harder to remove and will most likely take a good bit of paint with it. Clay bar will remove these contaminants and leave the surface silky smooth with a mirror-like smooth finish. One premium professional duty bar is enough to do 8-10 vehicles. Our clay will not break or deteriorate into small particles like inferior low quality clay bars. Super elastic to remove harmful particles quickly and effectively. Acts as a magnet to foreign particles, literally pulling the paint fouling grime away from the surface of the paint. Clay lubricant is essential to the performance and safety of clay. It provides the necessary slick surface for clay to glide on. Using low quality clay lubes or cheap detail sprays will deteriorate your bar and lead to poor clay bar performance. Also beware of soapy water as a clay lube; detergent or surfactant based soaps will cause the clay to deteriorate.

DER® "Secret Formula" Acryli-Shine Glaze

Glaze is a polish without any cleaning properties used primarily to improve the shine and clarity of paint. Primarily used by body shops for finishing jobs or by detail shops to bring out the brilliance of paint, glazes are also commonly used on show vehicles to achieve a "high luster or wet look". It was developed for the darker finishes, using a slightly moister formulation to enhance the difficult to wax paint finishes. The application process is forgiving, smooth, and dust free. Your moldings will not turn white. Glazes do not replace polishing. If a surface has minor swirls and imperfections, to achieve the best superior results, the surface should be polished with a polish first.

OER® Premium Metal Polish & Sealant

OER® Extreme Shine Metal Polish & Sealant cuts through layers of dulling oxides to restore a wet mirrorlike finish that outshines chrome. This outstanding polish makes chrome, copper, brass, aluminum, stainless steel and other metalwork gleam and look their absolute best. Spreads on with ease, buffs off with little effort. Great for oxidized metals and even light rust. Can be easily applied in the shade or sun. Leaves virtually no smear, dust, or powder. The most innovative metal polish ever. A 3 step product in one, this diminishing metal polish cuts fast, cleans like no other, shines like a mirror and protects like a sealant. Utilizing friction and heat OER® Extreme Shine Metal Polish cleans, restores, revives and polishes. Friction generates heat that allows the product to break down into a micro-fine polish that leaves the surface shining like a mirror. During the final phase, it breaks down to release the durable protective sealant that bonds to metal surfaces reducing corrosion and prolonging shine. Use by hand with a polisher or with your polish ball and drill.

OER® "Secret Formula" Wheel and Tire Care

Over the years, OER® has become the name that you have come to trust for quality restoration products. We are dedicated to bringing our valued customers the absolute best products our industry has to offer. When it comes to car care, our "Secret Formula" products are no exception! We know you have a lot invested in your classic car, so we have formulated products that not only perform at a level unmatched by any other brand, but a formula that keeps your investment in mind. Our formulas are engineered not only to keep your pride and joy looking good, but also to protect your vehicle's delicate surfaces from the elements without the use of harsh damaging chemicals.

OER® Acid Free Wheel and Tire Cleaner

Spray-on and rinse-off! Easily removes deposits of brake dust, grease, and road grime from wheels. Safe for clear coated, painted, and polished finishes. This strong non-acid formula is fortified with a citrus cleaning agent. This is an industrial strength 1:1 concentrate. Dilute with water as needed. Long time accumulations of brake dust may need light agitation with a soft brush. Unlike many alternative products, OER® Acid Free Wheel Cleaner dissolves grime and brake dust without damaging your chrome and alloy wheels. Non-acidic, spray-on wipe-off formula with no scrubbing necessary and no harsh scent.

OER® Secret Formula Wheel Wax

OER® Secret Formula Wheel Wax is formulated to safely and effortlessly clean, shine, protect and prolong all types of wheels and wheel finishes. Wheel Wax delivers a high gloss, durable wet shine finish on all chrome, aluminum, stainless, powder coated, and even painted wheels. Clean, polish, shine, protect, and prolong in one easy step. Extremely easy to use and apply, utilizing accurate micro-size synthetic beads that gently and effortlessly lift and polish away oxidation and road film from wheels to guarantee a scratch free perfect surface. Wheel Wax not only enhances shine, it protects your investment. Harmful degreasers and acids can damage wheels reducing shine and causing premature oxidation and deterioration of wheel. Wheel Wax is an acrylic sealant that bonds instantly to protect against brake dust, heat, acid rain, water spots, airborne fallout, and road contaminants.

OER® TNT Extended Life Tire & Trim Dressing

This unique formula quickly penetrates rubber trim and tires to hydrate and provide lasting protection. TNT Extended Life gel by OER® finally delivers on that promise. Simply wipe on using a pad and TNT gel restores the look of faded tires, trim, bumpers, seals and weatherstrip. What's more, OER® TNT gel lasts for many months, not days. Our exclusive, no-streak, no-run, and non-drip formula works to repel water and detergents and helps keep tire walls hydrated and supple as well as looking brand spanking new. Prepare your trim for a product unlike any other. A true premium trim restorer and protectant, that will not drip, dry out, or destroy surfaces. Provides unmatched durability, ease of application and a superior "new look" shine that lasts through numerous washes. Non-greasy, non-tacky and simply amazing.

Grit Guard insert keeps the wash water clean and scratch free!

Grit Guard Wash System

This unique wash bucket provides a convenient way to store or transport all of your car cleaning supplies while doubling as an extremely effective finish protecting wash tool. The Grit Guard insert sits in the bottom of the pail to extract particles and contaminants from mits and brushes. Gravity causes sand and dirt to settle below the guard so the wash water stays clean and scratch free.

Basic Wash System

The basic wash system includes a black pail with a yellow sealing lid and a Grit Guard insert.

Buffing Pad Wash Bucket

When you hand wash pads, the backing pad gets wet, oversaturating the foam. The universal pad washer keeps the backing pads dry and extends the life of your pads. No more throwing away perfectly good pads because the backing pad has torn off. Your buffing pads, buffing bonnets, polishing tools and accessories clean up so well you'll think they're new! Condition, clean, and dry all in one system.

The universal pad washer extracts contaminants trapped deep inside your buffing pads. No cross contamination worries when switching buffing compounds. O-ring seal lid provides water tight portability. Wash and dry in under 30 seconds!

Wall Guard

Hanging Door Guard

2 Ways to Prevent Costly Paint Chips

The wall guard attaches to your garage wall providing cushioned protection for both your vehicle door and your wall. Comes complete with hardware needed to attach to drywall, studs, brick or concrete. Predrilled holes are 16 and 24" apart for fastening to stud wall. Our hanging door guard is ideal for two vehicle households. This rubber-like pad hangs from the rafters or drywall ceiling of your garage providing a protective barrier between both vehicles. You in effect protect two vehicles with one product. Hardware for hanging the device is included. Measures: 25" x 6-1/2".

Sound Control and Ceramic Insulation

Get the comfort of premium grade insulation without the extra weight! These environmentally safe formulas from LizardSkins can be used as one part coating or as a two stage system for a cooler, quieter driving experience. The Sound Control formula dampens unwanted engine and road noise, while the Ceramic Insulation formula cools your vehicle up to 30 degree F or more creating a more comfortable ride. Designed for floors, roofs, firewalls, fenders, transmission tunnels, door panels, trunks, and more, all at a combined cured weight of 52 lbs for four gallons. Insulating a vehicle has never been this easy, thanks to a custom designed application gun made specifically to handle the thick density of the coatings with ease. Order the individual components or buy a complete kit and save!

Important: For two stage applications, Sound Control coating should be used as the base. Four gallons of each coating are required to encapsulate a typical interior and trunk area of 1 vehicle, and 1 gallon of Sound Control when applied as undercoating.

RustSeal® Corrosion Barrier Coating

OER® Authorized RustSeal is a superior one part, ready-to-use, high-solids content, rust preventive, corrosion barrier coating. RustSeal flows out to a beautiful, rock-hard, tough ceramic-like coating that is tough to chip or scratch, and will not crack or peel. RustSeal is an incredible, single component, ready-to-use, high solids content, rust preventive coating with exceptional sealing properties. RustSeal is the most permanent cost effective solution for stopping rust and corrosion anywhere where it is a problem: home, automotive, industry, fleet, farm, and more! RustSeal is an enhancement that lasts. Water and air are locked out, therefore oxidation, the precursor to rust, cannot take hold. RustSeal is not intended for use as a final finish. After removing or treating rust on floors, subframes, or other under vehicle components, RustSeal Corrosion Barrier Coating works by isolating the surface from moisture and oxygen. This single component, high solids, rust stopping coating seals out the ultimate causes of rust, creating a rock hard non-porous barrier between the metal and rust promoting elements. Will not crack, chip, flake, or peel, and no hardeners or activators are needed. RustSeal is completely unaffected by salt, gasoline, oils, battery acids, hydraulic fluids, solvents, chemicals, or corrosives.

Trunk and Floor Pan Repair Set

The KBS trunk and floor pan repair set allows you to restore your floor pan, trunk pan, or pickup truck bed back to new without producing any ugly weld seams. Our included step-by-step instructions make it easy and simple to use. After cleaning the area with KBS Clean (an industrial strength water based cleaner/degreaser), and KBS RustBlast (a powerful rust remover/metal etch), simply use the included BackBone reinforcing mesh and NuMetal epoxy putty to fill any small pin holes. Last, finish it off with a coat of RustSeal for a restored finish without any weld seams. Each set includes: 1 gal. KBS Clean, 1 gal. RustBlast, 1 qt. RustSeal, 1 lb NuMetal epoxy putty, 1 sq. yard BackBone Reinforcing Mesh, 8 oz. #1 Thinner, KBS paint spout, Nitrile gloves, mask, two brushes, stir stick and complete and detailed instructions.

Rust Treatment and Chemicals

BlackTop® Top Coat

BlackTop is a permanent, moisture cured, UV stable coating primarily used for top coating surfaces previously sealed with RustSeal or any other paint/primer application. BlackTop is a high-performance protective coating specifically formulated to withstand dulling and fading caused by prolonged sunlight exposure. BlackTop may be used alone as a resilient coating but offers the ultimate rust protection when used in combination with the RustSeal® corrosion barrier coating as step 1. For the best stop rust and ultraviolet protection, first apply RustSeal to permanently seal the surface and then top coat with BlackTop for an incredibly tough and professional looking finish. Like RustSeal, BlackTop dries to a rock hard yet flexible coating that can be readily applied to chassis, coil springs, and lightweight panels. BlackTop also has high heat resistance and can be applied to almost all automotive applications except exhaust systems. BlackTop will be intended as a final finish for parts that have been coated with RustSeal. BlackTop will retain its color and sheen even after repeated or prolonged exposure to direct UV light and will not degrade.

Diamond Finish® Clear Coat

Diamond Finish Gloss Clear Top Coat is a permanent, moisture cured, UV stable coating primarily used for top coating surfaces previously sealed with RustSeal, for top coating direct to metal, or to coat over any other paint/primer application. The clear coat formula can be applied direct to metal or over other coatings. This high gloss clear coat remains permanently flexible and is able to perform in the toughest environments without yellowing, cracking, or peeling. Apply directly to painted surfaces with minimal surface prep. Incredibly tough and hard like no other clear coat on the market. Can be applied with a brush (without leaving any brush marks), roller and conventional spray gun. Unlike two part coatings, no hardener is needed with Diamond Finish. Just stir and go. Diamond Finish clear coat will cure without heat or UV lights in temperatures from 50 to 86 degrees Fahrenheit. Able to withstand the harshest of chemicals including fuels, solvents, battery acid, brake fluid, Ethanol, Methanol, MEK, Hydrochloric Acid, fertilizers, and Acetone. Graffiti resistant: because of its chemical resistance, graffiti just won't stick and can be removed simply with a solvent soaked rag. Great for high temperature automotive applications including the use on cylinder heads, engine blocks, brake components and even inlet manifolds, without yellowing up to 300 degree Fahrenheit.

Water Based and Solvent Based Undercoating

Whether you choose our water based or solvent based undercoat formulas, each produces a very tough, yet flexible film with excellent adhesion, and helps prevent road salt from eating away at your vehicle's metal and/or fiberglass. Offers excellent adhesion to metal or painted surfaces. Provides economical paintable durability, plus moisture resistance and corrosion resistance, all in a matte black finish. Also provides sound deadening by reducing road noise and vibration. You can attach the quart size can directly to a Schutz applicator type spray gun or contents may be poured into a clean container pot that fits the applicator gun of your choice. Part #20018 undercoat gun is offered separately.

OER® Spray Galvanizing Weld-Thru™ Coating

A smooth, cold galvanizing compound that chemically fuses to bare steel and forms a extremely rust resistant barrier. Perfect for application on the inside of newly installed panels where rust prevention of new metal is important, but where the part treated will not be painted. Fast dry, sag free spray that is abrasion resistant. Stops rust creepage, resists chemicals and is rust inhibitive. Apply it to sheet metal pieces before installation, then weld as usual. The coating will not affect the quality of the weld, and will retain its rust preventative properties. Available individually in 12 oz. cans or in case of six.
