

Replacement Fuel Tanks

These reproduction fuel tanks are manufactured to factory specifications from stamped steel and are available in a variety of finishes to suit your build. Basic zinc coated steel tanks are a great value, offering strong corrosion resistance at a reasonable price. Ni-terne steel tanks provide an OE quality appearance for discerning restorers. For show quality builds, stainless steel tanks offer superior corrosion resistance with a spectacular polished finish.

Zinc-Coated Fuel Tanks ★★☆☆

1967-73 Aeromotive Fuel Tank

These tanks bring modern fuel system technology to your classic muscle car. By placing the fuel pump inside the tank, hot fuel issues such as vapor lock and cavitation are eliminated. We have all heard the stories of hot rodders being stuck on the side of the road with a fuel system or an engine that stumbles under braking, acceleration or hard cornering. These issues are related to fuel pump location, plumbing and lack of proper baffling. You can now have an in-tank fuel pump that is properly vented and submerged in fuel at all times. These new reproduction steel tanks feature a durable silver powder coated finish. In addition, they feature an internally baffled system with an in-tank performance fuel pump capable of supporting up to 1000 HP. Deep sump tanks include new fuel tank straps. Choose the bypass regulator that best serves your vehicle application.

Note: Shipped oversize.

Holley

A9719100

Sniper EFI Fuel Tank System

Holley Sniper EFI conversion fuel tank systems for 1967-81 Firebird models. Each tank is galvanized and then powder coated to maximize corrosion resistance. They feature OEM style internal baffling, including an extra large internal fuel tray to promote optimal fuel pump performance. These tanks are a direct, bolt-in install for most applications and capable of supporting 750 HP. The system includes the tank, a 255 or 400 lph fuel pump, a fuel level sender, and the filler neck. Sender operates at the same 0-90 Ohms as the factory GM fuel level gauge.

Note: Shipped overzeig.

Gold Standard Fuel Tank Sealer Set

Our 3 step fuel tank sealer set contains almost everything you might need to seal a tank of up to 25 gallons. The Gold Standard Tank Sealer is specifically formulated to stop rust and corrosion by forming a tough, fuel impervious coating while simultaneously sealing small pinholes and weld seams. The prep products are formulated to extend storage times by leaving a zinc phosphate film that prevents rust until you have a chance to seal the tank with the sealer. Complete set and individual items available.

3 Step Fuel Tank Sealer Set

Buy our fuel tank sealer set and save! Each fuel tank sealer set includes: 2 quarts of Klean (a water based, heavy-duty, cleaner/degreaser), 1 quart RustBlast (a powerful rust remover/metal etch), 1 quart Gold Standard Tank Sealer, gloves, instructions, and a stir stick.

1967-69 Fuel Tank Anti-Squeak Set

Highly quality reproduction on the market! Includes precision die-cut 1/2" sponge neoprene tank to floor cushion and 2 strap to tank inserts. The molded rubber cushions are inserted between the gas tank and the mounting straps while the neoprene sponge pad is inserted between the top of the tank and the trunk floor to eliminate rattles and vibrations. These sponges will eliminate any tank movement which may occur. Highly recommended when replacing your gas tank or mounting straps.

Note: Not designed for use with gas tank straps more than 1" wide.

L4987 1968-70..... 29.99 ea

Driven Carb Defender

Driven Carb Defender Fuel Additive has been formulated to protect against harmful ethanol deposits and corrosion in fuel and the induction system. Special inhibitors resist expensive damage and reduced performance from moisture accumulation from modern ethanol blended gasoline. This additive controls combustion chamber residue, cleaning and protecting fuel system and intake tract surfaces to keep carburetors functioning properly. Carb Defender is ideal for everyday drivers or classics that spend time in storage between cruises and special events. One bottle treats up to 25 gallons of ethanol blended fuel.

JG1341 case of 6 - 4.5 oz. bottles..... 147.99 cs

Fuel System Cleaner

Max-Clean targets and cleans deposit buildup in the intake system and combustion chamber and is effective on the entire spectrum of engines on the road. Deposit buildup is a natural consequence of fuel combustion, but can have significant effects on the performance and reliability of your engine. Royal Purple's Max-Clean can restore internal engine surfaces, recovering lost fuel economy and performance.

RP11722 20 oz. can..... 15.99 ea
RP11723 case of 6 - 20 oz. cans..... 91.99 cs

Driven Defender+Booster

Raises the octane in unleaded fuels, reduces valve seat wear and protects against the corrosion deposits common with today's gasoline. This product features corrosion inhibitors that control combustion chamber residue, as well as clean and preserve surfaces of the fuel system. By cleaning and controlling combustion chamber and intake valve deposits, Defender + Booster Fuel Additive protects against detonation and improves fuel economy. The additive is ideal for all carbureted and fuel injection vehicles, including motorcycles and marine engines. Each 10 ounce bottle treats up to 25 gallons of gasoline, and regular use has been proven to lower emissions.

J-B Weld Gas Tank and Radiator Repair

AutoWeld is a hand mixable, steel reinforced, non-rusting epoxy putty that quickly repairs or rebuilds anything made of metal. After mixing, it forms an industrial strength polymer compound that can be molded into shapes or used to buildup, patch and repair steel components. AutoWeld sets in 5 minutes and after 60 minutes, can be drilled, tapped, machined, ground, filed, and painted. Cures dark gray. Made in USA.

Fuel Tank Components

Fuel Tank Sender

This universal type fuel sender is used with gauges that require 240Ω empty and 330Ω full and can be adjusted for tanks from 5" to 24" deep. Modification to fuel tank required.

AM3262 fuel sender 49.99 ea

A8101008

Internal Float Fuel Sending Unit

Get reliable fuel gauge readings with this internal float fuel sending unit. This advanced design provides accurate readings without fluctuations due to fuel slosh. Because this internal float design requires no float arm, it is far more resistant to corrosion, even with racing fuels. All sending units mount to the tank with the standard 5 bolt mounting flange and are available in sizes from 4" to 24".

Important: Sending unit should not touch bottom of tank. When the fuel gauge reads empty, the area below the sending unit is reserve fuel.

Note: Sending units are available in lengths from 4" to 24" and are sold in 1" increments. Please add the desired length to the end of the part number, eg. 06 = 6", 11 = 11".

1967-81 Fuel Sender Harness

This is the correct power feed harness which activates the fuel tank float sending unit located in the gas tank. This harness is essential to get a correct reading. We recommend replacing this harness when installing a new gas tank sending unit for insurance against possible mis reading of current fuel capacity.

1985-92 Fuel Tank Sending Unit

After years of use, your fuel sending unit can corrode, its float can flood and it can simply stop working, causing your fuel gauge to read incorrectly or even not at all. This Delco service replacement will replace your original in both fit and function though it may differ cosmetically. Fits vehicle models with an in-tank fuel pump.

153249 1985-92 104.99 ea

1993-95 Fuel Tank Sending Unit

After years of use, your fuel sending unit can corrode, its float can flood and it can simply stop working, causing your fuel gauge to read incorrectly or even not at all. This Delco service replacement will replace your original in both fit and function though it may differ cosmetically.

Fuel Pumps

Holley

1967-81 EFI Fuel Pump/Sender Modules

Holley 255 lph OEM style in-tank fuel pump conversion modules are designed as a direct replacement for the factory pickups and sending units in 1967-81 Firebird models. These modules will install exactly like the factory assembly with no modifications required. This system is hands down the simplest way to convert a fuel tank for electronic fuel injection. They are internally regulated to 58 psi and capable of supporting engines up to 550 horsepower.

In-Tank Fuel Pump Retrofit Kit

Holley 450 lph universal in-tank return less retrofit fuel module. Use this module to convert to an in-tank EFI fuel system with no welding or fabrication. Installs in any fuel tank from 7" to 12" deep. Includes a low profile die-cast pump hanger bracket to control pump vibration low profile and an integrated fuel pump capable of supporting up to 875 EFI or 1100 carb HP. This is the easiest way to convert your vehicle to an in-tank EFI fuel system, ideal for Terminator EFI, Sniper EFI, MSD Atomic EFI, any TBI of EFI conversion.

Pontiac Fuel Pump

Designed for use with all Edelbrock carburetors used on Performer or Performer RPM applications. These high-performance street fuel pumps feature a high-quality three stage polished finish. The unique valve design improves flow quantity and quality, and will support engines up to 600 HP. High volume, 3/8" NPT inlet and outlet surpasses the capacity of conventional models. Produces 6 psi and does not require a regulator.

E1713	Pontiac V8, 326-455	175.99 ea
-------	---------------------	-----------

Holley

1977-78 Chrome Fuel Pump

Replace your original fuel pump with genuine Holley chrome fuel pumps. Each mechanical fuel pump is triple chrome-plated and flows 60 gallons per hour at 7-12 psi. Includes an adjustable lower housing allowing 360 degree rotation of fuel inlet-outlet fittings for custom installation. For Pontiacs with a Chevrolet small block engine.

Important: Inlet and outlet are tapped for 1/4" NPT. Fuel line fittings are not included.

1967-87 Replacement Mechanical Fuel Pump

Chosen from a wide range of fuel pumps specifically designed for each year and engine size. Some fuel pumps may differ slightly in appearance from original but will fit and function correctly offering years of satisfactory service. These mechanical fuel pumps will replace the original worn out fuel pump. Manufactured by an OEM GM supplier.

Professional Fuel Pressure Tester

Use this professional fuel pressure tester to diagnose drivability problems caused by poor fuel pressure. Features a 40 inch hose, 2-1/2" gauge face with 0-100 psi/0-700 kPa scales, and a pressure relief button and 6 foot hose for safe gasoline disposal of gasoline and repeat tests. Includes: test adaptors for GM/Chrysler, GM TBI, M12 x 1.25 banjo bolt, and dual Manifold Test Adapter, as well as a handy storage pouch and a manual with step-by-step test procedures.

AC7838 51.99 ea

Fuel Pump Components

1982-02 Electric Fuel Pump

Electric fuel pumps will require additional components for installation. Please read the notes carefully to determine the correct style pump for your year and model. You may contact our technical department for more information.

Note: New strainers must be used on electric pumps for warranty compliance. Fuel pump strainers are included on electric pumps without notation. If a strainer is listed in the pump description, you must order it separately. Due to electrical requirements on certain fuel pumps, models denoted with one or two asterisks (* or **) require a strainer and wire harness adapter for installation. *Use S20194 strainer and S88536 wire harness. **Use S20197 strainer and S88536 wire harness.

1982-02 Fuel Pump Relay

A bad fuel pump relay can be the cause of a hard starting problem in your 1982-02 Firebird. If you turn the key into the on position, you should hear the fuel pump "whir" for a few moments as it pressurizes the system. If not, (and the pump is good) that may be an indication that you have a bad fuel pump relay.

Electric Fuel Pump

We offer externally mounted Holley electric fuel pumps. They all feature the proven rotor and vane design and are available in ratings from 97 gph to 140 gph. The 97 gph "red" pump is set at 7 psi and does not require a regulator. The 110 gph "blue" pump is set at 14 psi and includes a regulator. The 140 gph "black" pump is also set at 14 psi and can be used for gas or alcohol fuel.

Electric Fuel Pump

These externally mounted electric fuel pumps are ideal for most street and strip applications. Proven rotor vane technology provides high flow and stable pressures with minimal vibration and sound. Each pump features 3/8" NPT inlets and outlets along with an externally accessible pressure relief valve.

Note: Not for fuel injected engines. Pumps that produce more than 7 psi should be used with a pressure regulator.

E1791

Quiet-Flo Electric Fuel Pump

State-of-the-art electric fuel pumps offer maximum performance in a compact package for carbureted applications. Anodized aluminum housing and high-quality internals make it both strong and extremely durable. The E1791 electric fuel pump is factory set to 6.5 psi does not require a regulator, 3/8" inlet/outlet, 120 gph free flow, up to 600 HP. The E1792 electric fuel pump is preset to 12 psi and requires an external regulator, 1/2" inlet-outlet, 160 gph free flow, up to 1000 HP.

Important: For proper installation and voltage requirements, use fuel pump relay E1795.

E1791	6.5 psi.....	271.99 ea
E1792	12 psi.....	275.99 ea

Quiet-Flo Electric Fuel Pump

This anodized aluminum EFI fuel pump offers maximum performance in a compact package. The in-line design keeps the pump motor and components cool even under harsh conditions. Features -10AN inlet/outlet with a flow rate of up to 80 gph at 45 psi for high HP fuel injected applications. This fuel pump supports 835 HP at 12 Volts with a current draw of 12 amps at 45 psi. 10AN inlet/outlet 80 gph at 45 psi.

Important: Dimensions: 6-7/8" x 3-1/4".

E1790	774.99 ea
-------	-------	-----------

In-Line Electric Fuel Pump

This in-line electric fuel pump is continuous duty rated and is ideal for EFI applications that require additional pumping capabilities for upgraded modifications.

Works superbly as either an in-line booster pump or as a stand alone unit. Use with EFI regulator part #E1728 for adjustability from 35 to 90 psi. 57 gph, 3/8" hose barb fittings. Includes mounting bracket and 3/8" hose barb fittings.

E3594	298.99 ea
-------	-------	-----------

Features:

- Solid-state worry free electronics
- Internal pressure regulating
- Universal design allows for easy installation
- No diaphragms or mechanical parts to wear out
- Hose barbs fit 5/16" hose hose

Micro Electric Fuel Pump

This compact electric fuel pump features a solid state design that has a low current draw of around one amp and makes a good stand alone pump or booster pump. Designed for carbureted vehicles with a 12 Volt negative ground electrical system, this pump supports 4-7 psi at up to 35 gph. Includes: fittings, mounting hardware and instructions.

Note: Not for diesel applications.

Electric Fuel Components

1982-95 Delco Electric Fuel Pump

Checking an electric fuel pump is a pretty straightforward operation. If you apply 12 Volts to the pump's contacts and it makes a "whirring" sound, it's a pretty good sign that the fuel pump itself is ok. If there is no sound coming from the unit while hooked up to 12 Volts, you have a bad pump. This is an original Delco in-tank electric fuel pump that mounts to the sending unit.

Fuel Pump Safety Switch

This safety feature is a must have for any electric fuel pump vehicle. This safety switch monitors the tach signal to limit when an electric pump can operate. When the key is first turned on, the fuel pump is allowed to run for three seconds, priming the fuel system. After that, it only operates if the engine is running. If the engine stops, so does the fuel pump. No plumbing into the oil lines or no extra priming button under the dash is required.

RE12003	64.99 ea
---------	----------

Fuel Pump Safety Switch

This fuel pump safety switch shuts off fuel flow whenever oil pressure drops below 15 psi. This adds a safety factor in case of an accident or engine stall. Designed for 12 Volt electrical systems and can be used into the oil pressure sending unit with an 1/8" NPT tee.

EFI Bypass Regulator

Performance EFI regulator designed for medium to high horsepower applications. This regulator features Aeromotive's high flow design, superb pressure control and legendary durability. Features base pressure adjustable from 40-75 psi, gasoline and alcohol compatible, fuel pressure rises on a 1:1 ratio with boost, 1/8" National Pipe Thread taper (NPT) gauge port. Includes two o-ring boss fittings (ORB-06) inlet ports and one o-ring boss fitting (ORB-06) return port.

A9713109	adj. with EFI.....	209.99 ea
----------	--------------------	-----------

Universal Bypass Regulator

A dual purpose, universal regulator for EFI or for carbureted street/strip applications. Features pressure adjustable from 3 to 20 psi with standard spring, (installed) or from 20 to 60 psi with high pressure spring (included). Offers the full flow and rock steady fuel pressure that only a dynamic, Aeromotive bypass regulator provides. Capable of regulating any fuel pump between 100 and 250 gph, fuel pressure rises on a 1:1 ratio when referencing boost. All ports are 3/8" National Pipe Thread taper (NPT), with one inlet and three outlets on the main body and one return port on the bottom. Bypass design provides the ultimate, dynamic fuel pressure control.

Note: Requires a return line to be installed from the bottom of the regulator to the top of the tank.

A9713301	3 Port 3/8" NPT.....	209.99 ea
----------	----------------------	-----------

Carbureted Bypass Regulator

For use when converting from fuel injection to carburetion using the EFI pump in a carbureted application. Perfect for naturally aspirated or "blow-through" supercharged engines. Features base fuel pressure adjustable from 3-15 psi, 1-o-ring boss fitting (ORB-10) inlet port and 1-o-ring boss fitting (ORB-08) return port, fuel pressure rises on a 1:1 ratio when referencing boost, bypass design provides the ultimate, dynamic fuel delivery system, ideal for converting from fuel injection to carburetion using the stock, in-tank pump. EFI conversions will require a larger than stock return line for proper low pressure control. Includes two o-ring boss fittings (ORB-06) outlet ports and 1/8" National Pipe Thread taper (NPT) gauge port.

Note: Requires Army/Navvy fitting (AN-08) return line from bottom of regulator back to top of the tank.

E1906

E1905

Thunder Series Carburetor

Edelbrock Thunder Series carburetors share all the performance advantages of the popular Performer Series but with innovative new features. These carburetors include all of the performance features of the Performer Series carburetors and also include distinctive black hardware, dual fuel inlets (shipped with left side plugged), lightweight ball burnished and CNC profiled body, and the Quick-Tune secondary. They're available in 650 cfm and 800 cfm sizes with manual or electric choke. There's even a 650 cfm version specifically designed for off-road vehicles. These Edelbrock carburetors bolt-on and run right out of the box! Simply dependable, proven performance for almost any carbureted vehicle. All Edelbrock carburetors include an installation kit and owners manual.

E1405

Performer Series Carburetor

By design, Performer Series square bore carburetors are refined to provide the widest possible torque range when matched with Edelbrock Performer, Performer RPM, RPM Air Gap, or Torker II manifold and camshaft combinations. However, these carburetors are not limited to these applications, they also match well with most stock and other manifolds of similar design. Performer Series square bore carburetors are all aluminum, ball burnished and lightweight. There are no power valves to blow out or plastic parts to break. The two piece construction resists warping and the metering rods can be changed in seconds without removing the carburetor. All Edelbrock carburetors include an installation kit and owners manual.

Note: *50 state legal for all 1980 and earlier GM V8 engines.

Performance Carburetors

Street Series Carb

Street carburetors are constructed of lightweight aluminum, including provisions for a choke assembly and changeable idle air bleeds for easy, non-permanent calibration changes if necessary. Fine tuning is accomplished by simply changing air bleeds, not opening up calibration restrictions with a drill bit! These dual fuel inlet carburetors are hand assembled in the U.S. using the PROFORM high flow carburetor main body, durable billet metering blocks, aluminum fuel bowls, and a high-performance billet throttle base plate.

67208

● Carburetor Main Body Features:

Lightweight Aluminum - Not Heavy Zinc
High Flow Center Section Design
Flat Surfaces: CNC Precision Finish
Changeable Screw-in Idle Air Bleeds
Changeable Screw-in High Speed Bleeds
High-Performance Down Leg Boosters except 600 cfm
Electric Choke on Mechanical Secondary and Vacuum Secondary Models

● Billet Throttle Base Plate Features:

Adjustable Secondary Housing on Vacuum Secondary Models
Easy Access Secondary Idle Air Flow Adjustment
Strong, Lightweight Billet Aluminum
Corrosion Resistant Black Anodized Appearance
Button Top Head Throttle Plate Screws
Power Valve Blow Out Protection
Sip Link Linkage on Mechanical Secondary Models

● Fuel Bowl Features:

Lightweight Die-Cast Aluminum
Fuel Level Sight Windows
Externally Adjustable Needle and Seat
Dual Fuel Bowl Inlet
Notched Secondary Float

● Billet Metering Block Features:

Strong, Lightweight Billet Aluminum
Four Corner Idle System on Mechanical Secondary Models
Changeable Idle Feed Restrictions
Durable, No Warping or Porosity Problems
Secondary Jet Extensions on Mechanical Secondary Models
Non-stick Gaskets

Slayer Series Carburetor

The 600 and 750 cfm Slayer Series carburetors are designed with the same engineering and innovations featured on all QFT products. These affordable, vacuum secondary street carburetors feature all aluminum construction and hand built quality. They are designed with a secondary metering plate with changeable jets, eliminating the need for a costly secondary metering block. Get QFT race winning innovation for your vehicle at a great price.

CB710600

Note: This product is not CARB exempt. Products that are not CARB exempt are legal in most states, but may not be used in California or states with similar emissions laws except on pre-1976 vehicles.

- Changeable idle air and high speed bleeds
- 3 Stage emulsion circuits in primary metering block
- Changeable primary idle feed restrictions and power valve channel restrictions
- QFT QuickSet adjustment on the vacuum secondary housing that provides external adjustment of the diaphragm without changing springs
- Notched secondary float for use with jet extensions
- Secondary metering plate with changeable jets
- Fully adjustable electric choke
- Polished finish for superior good looks

CB710750	750 cfm	electric choke	414.99 ea

Hot Rod Series Carburetor

The Hot Rod Series of carburetors is designed for street applications. Made from lightweight aluminum castings and packed full of features, these carburetors are sure to make your hot rod run its best! Hand assembled and engine tested in the USA! Available in both vacuum and mechanical secondary configurations.

CB711650

Note: This product is not CARB exempt. Products that are not CARB exempt are legal in most states, but may not be used in California or states with similar emissions laws except on pre-1976 vehicles.

- Quick Set electric choke with one wire hookup for years of trouble-free starting.
- Dual inlet fuel bowls with Quick Set sight windows on both fuel bowls for safe and easy float level adjustment.
- Vacuum secondary carburetors have a Quick Set housing that is adjustable by simply turning a screw - no more spring adjustments to keep up with or torn diaphragms.
- 4 corner idle for smooth and efficient idle quality.
- Screw-in air bleeds for quick and unsurpassed tuning capability.
- Screw-in idle feed restrictions.
- Non-stick gaskets throughout for easy service.
- The QFT 4 door™ power valve with a strong diaphragm and blow-out protection in the throttle body.
- Universal throttle lever with sealed throttle shafts for years of smooth operation.
- Full vacuum accessory ports for PCV, power brakes and timed spark advance.

The Holley jet assortment set is the professional way to track tune your Holley carburetor for top performance. The set consists of 2 each of 36 different jet sizes ranging from #64 to #99. The jets are contained in a plastic case that keep them separated and make them easily accessible. Jet sizes selected will give the broadest range of adjustment and performance for most performance carburetor applications.

Carburetor Main Jets

Holley jets are the professional way to track tune your Holley carburetor for top performance. They are sold in sets of 2 and are available in jet sizes ranging from #40 to #110. The jets will give the broadest range of adjustment to get the most performance out of your Holley carburetor.

Important: Please specify jet size at the end of the part number when ordering. See chart above for more information.

H122 specify jet size, #40 to #110..... 10.99 pr

Power Valve and Installation Tool

The power valve is a key component of the power enrichment system of Holley performance carburetors. These power valves incorporate "power valve blow out protection". Power valve installation tool is also available, and sold separately.

Carburetor Components

Carb Dual-Feed Fuel Line

Made from aircraft quality Buna-N neoprene hoses encased in braided stainless steel, this fuel line is temperature, gas and oil resistant. Made for 3/8" NPT fittings, the fuel line is adjustable between the carb bowls from 7-1/2" to 11-1/2". Includes 1/8" pipe fitting and plug for optional fuel pressure gauge, etc. Hoses inlet nipple not included.

EH101 126.99 ea

Holley Dual-Feed Fuel Line

We offer chromed copper fuel lines for Holley carburetors. The hard lines are manufactured with seamless copper tubing and are double flared at the ends with 5/8"-18 inverted flare insets.

Carburetor Components

Accelerator Pump Cam Set

Holley

This set will allow you to "tailor" accelerator pump performance to the engine's actual requirements. Each cam has a different shape to give different results. The shape of each cam directly affects the accelerator pump stroke and pump capacity. A steeply rising cam shape will give a fast, heavy fuel shot right off idle. Conversely, a gentle sloping ramp will spread the pump action over a longer period of time.

H2012 includes 8 pump cams..... 33.99 set

Duo-Pak Throttle Cable Set

Lokar Duo-Pak throttle cable sets will easily adapt to most gas pedals and throttle assemblies. Sets feature Lokar's Hi-Tech throttle cable, stainless steel carburetor bracket, and return spring kit. Cables designed with aluminum fittings and aluminum ferrules to eliminate fraying and feature a "U-Cut-to-Fit" stainless inner wire and outer housing. Available in your choice of stainless steel, black stainless steel, or black nylon.

Note: Duo-Pak only available for carbureted applications with Holley, Edelbrock, AFB, Quadrajt and In-Line Dual Quad carbs.

Throttle Cable Bracket

Lokar throttle cable brackets are available for a variety of different motors including carbureted setups, LSI, Ram Jet 350, 502, and more. Finishes include stainless steel, black stainless steel, and billet aluminum were available. Carburetor brackets only fit Holley, Edelbrock, AFB, Quadrajt, Demon, and In-Line Dual Quad carbs and mounts to the rear. Brackets for Tuned Port Injection are available with a single hole stud for throttle only, a dual hole stud for throttle and kick-down, and a triple hole stud for a throttle, kick down and cruise control cables. Made in USA.

Important: Ram Jet 350 uses LSI throttle cable TC30036 or TC30048.

Note: *Cruise control bracket set only.

Electronic Fuel Injection

Atomic EFI Set

The MSD Atomic EFI set fits all engines making up to 525 horsepower at the crankshaft. The annular ring charge injection design produces a better air/fuel mixture and distributes it evenly among the cylinders. As a result, engines idle, start, and drive better with the Atomic EFI set. Throttle bodies feature 80 lb injectors and a self-calibrating throttle position sensor. They also feature an internal fuel rail for no-leak, no-hassle fuel delivery. The master set is complete and ready to use out of the box. It includes the EFI throttle body, electric fuel pump, fuel line and filter with hardware, power module with wide band O2 sensor, and handheld controller. Also available are the throttle body set which includes everything except for the fuel system components. Or purchase the fuel components separately.

Note: Atomic EFI sets are California emissions approved for carbureted General Motors vehicles 1987 and older. E.O number D-722.

Sniper Returnless EFI Master Set

Sniper EFI master sets, with a returnless retrofit fuel module. This contains combines the Sniper EFI self-learning throttle body, with an easy to install in-tank retrofit returnless module, 20 ft of Earl's vapor guard fuel hose, and the required fittings. The included fuel system places a 340L PH fuel pump in the tank, which can easily be accomplished with basic hand tools. The drop-in master sets make plumbing your Sniper EFI installation as hassle free as possible, simply cap the regulator on the Sniper EFI throttle body with the provided -6an cap, safely route the vapor guard fuel line along the chassis back to the die-cast fuel hat, and the job is finished.

Sniper EFI Fuel Injection Conversion Set

Holley Sniper EFI universal self-tuning fuel injection conversion sets. Converting to EFI will put an end to the cold start issues, hesitations, vapor lock, and flooding associated with most carbureted engines. Sniper sets feature numerous styles of throttle body and are available in polished, black ceramic, and classic gold finishes. Master sets include the most complete fuel system on the market. Holley just brought EFI within range and Classic Industries® carries the complete Sniper line with sets for nearly any application.

Sniper EFI Features:

- Easy 4 Wire Hoop Up
- Throttle Body Mounted ECU
- Supports Up to 650 HP
- Integrated Ignition Timing Control & Coil Driver
- High Resolution Full Color Touchscreen
- Simple Calibration Wizard — No Laptop Needed
- OEM Style Sensors
- Clamp-on Oxygen Sensor Bung

4150 Four Barrel Set

Holley 4150 four barrel sets feature dual bolt patterns (square and spread bore), an internal fuel pressure regulator, and four 100 lb injectors capable of supporting up to 650 horsepower.

Note: Spread bore/Rochester Q-jet applications require sealing plate part #H990060.

Exhaust Headers

1967-02 Hedman Hedders

Classic Industries® stocks Hedman Hedders™ for 1967-02 Firebird models. These units are designed to replace the heavy, and restrictive factory manifolds with tubular steel manifolds. These Hedders are not only lighter, but will also increase your Firebird's performance. Tork-Step Hedders feature an innovative design that allows for an increased overall torque curve. Sets are complete and ready to bolt-on. Includes collector and header to head gaskets, collectors, and bolts. We offer Hedman Hedders™ for use with or without air injection (smog tubes). Get more performance from your Firebird without breaking the bank, and do it with a name you can trust in the header business... "Hedman".

Important: Be sure to read the important notes listed on the bottom of this page pertaining to each header system for correct application.

Note: These headers are intended for off highway use only and are not designed for use on California vehicles with pollution control devices. Shipped oversize.

Hedman Hedder Notes

- Without smog injection or injection heads.
- Three tube design.
- Includes parts necessary to retain emission devices. (50 state).
- With A.R. system.
- Modification to stock exhaust required to retain catalytic converter.
- Except round ports.
- Shortie Header (Max. ground clearance).
- Check non-Tork Step listings for same part number replacing last digit with a zero. Pay special attention to emission footnotes.
- Some heads require drilling and tapping of end holes.
- 16 gauge tubing.
- Not legal for sale or use in California on pollution controlled motor vehicles.
- Will not fit Saginaw cross ratio psi with 825 power steering box.

Hedman Hedder Notes - Continued

- Will fit with angle plug heads (Chevy aluminum only).
- Dual exhaust only. Limited ground clearance.
- Must modify rotary AC bracket.
- Chevrolet engine.
- Transmissions limited to TH700R4 and TH350.
- Complete with Y-Pipe to single catalytic converter.
- Complete with dual Y-pipe to dual catalytic converters.
- Must use part #21107 oxygen sensor reducers, not supplied with Hedder.

Hedman Hedder Emissions Notes

- *) Not applicable or intended for street or highway use. Legal only for racing vehicles which may never be used upon a street or highway.
- C) For vehicles 1964 through 1974 without A.R. system, considered as OE replacement parts when existing emission controls are not removed from vehicle.
- D) Not legal for sale or use in California.
- I) 1975-79 only, 50 state legal for these years only.
- T.E.M.S. (Tubular Exhaust Manifold Systems) are 50 state legal for years listed in catalog only.
- X) Chevrolet engine.

1970-81 Competition Headers

Hooker Competition headers offer the best value in the high performance header market. Designed for the value conscious buyer who is running either a "stock" or "mildly modified" engine, Hooker Competition headers offer premium features at a very competitive price. Made of durable 16 gauge mild steel tubing, the Hooker Competition header design utilizes a long transition collector to reduce back pressure and increase exhaust flow. A perfect sealing surface is assured with the 5/16" machined flanges, with welded o-ring seals. Experience has proven that this flange size is ideal to maintain header integrity and be pliable enough to seal each exhaust port. Tubing is mandrel bent to maintain metal strength and provide consistent tube diameter at radii to maximize performance.

Note: Shipped overweight.

Painted Headers

These Competition headers have a standard finish that features a heat-cured, high heat resistant paint.

Exhaust Headers

1967-81 Doug's Headers

Doug's headers are carefully developed to fit each specific vehicle application. Doug's headers are available for 1967-81 Firebird models with small block or big block V8 engines, with and without air injection ports, and with console or column shifters. Heavy-duty machined and finished header flanges, the smooth mandrel bent tubes, and a protective Metallic Ceramic Thermal Barrier Coating (MCTBC) make Doug's Headers an excellent choice for exhaust system performance.

Important: These headers are intended for off-highway use only and are not designed for California vehicles with pollution control devices. Be sure to read the important notices listed on the bottom of this page pertaining to each header system for correct application. **Note:** Shipped overweight.

1967-81 Full Length Stainless Steel Racing Headers

ARH full length stainless steel headers for 1967-81 Pontiac Firebird. They are fabricated from aircraft quality T304 stainless steel and feature 3/8" thick round port flanges with hand ported inlets and fully welded custom sized merge collectors with scavenger with spikes standard. American Racing Headers will provide excellent ground clearance and are a direct bolt-in installation for Firebird models.

Note: *Stepped headers.

Doug's Headers Notes

- Shorly design for maximum ground clearance.
- Fit D-port cylinder heads including ZZ4 race engines. Will fit Edelbrock Performer, RAM-Air, Super-Duty and HO heads only.
- Vehicles with locking steering columns require linkage removal.
- Some heads require drilling and tapping of end holes.
- Applications with scatter shield or factory bellhousings with dual starter sockets must use Fram coil (PR13675) or equivalent.
- Will not fit with Saginaw close ratio R23 steering box.
- Big block frame stands and motor mounts must be used to insure proper engine location and header fit.
- Will fit most angle plug heads.
- Requires removal or modification of locking steering columns if equipped.
- Reducers available with O2 sensor fittings.
- Installation requires left side AC bracket 7608, 1979 and later vehicles with short compressors can use the stock bracket.
- Will fit with Detroit Speed & Engineering front subframes with rack and pinion steering.
- Must use non-shell type motor mounts.
- Reducers accompanying this document is legal only for off-highway use (except in California or states that have adopted California emission standards), racing use or for pre-emission controlled motor vehicles/motor vehicle engines (pre-1974 domestic vehicles certified to California standards, pre-1974 domestic vehicles certified to federal standards and all pre-1974 foreign vehicles), per the manufacturer's application guide.

1998-02 Full Length Stainless Steel Racing Headers

ARH full length stainless steel header and Y-pipe sets for 1998-02 Firebird models. The headers are fabricated from aircraft quality T304 stainless steel and feature 3/8" thick round port flanges with hand ported inlets and fully welded custom sized merge collectors with scavenger with spikes standard. American Racing Headers will provide excellent ground clearance and are a direct bolt-in installation for General Motors 4th Generation Firebird models. Includes: gaskets, clamps, O2 extension harness, and hardware.

1967-68 Ram Air I Exhaust Manifold

Reproduction 1967-68 Ram Air I D-port long branch exhaust manifolds were originally installed on 1967-68 Pontiac Firebird Ram Air models with Pontiac engines and D-port heads. These high-performance reproductions are designed and manufactured from high grade cast iron in the USA. Manifolds have 6 bolt holes and a 2 bolt flanges each, and require 2-1/2" head pipes. Flanges sold separately. Gaskets not included.

Important: When using these manifolds on 1967-68 Firebird models with a 1970 or newer engine, a different oil filter mounting plate is needed for clearance of the oil filter. Part #5379457 (currently unavailable from GM or as a reproduction) from a 1966 GTO has the proper offset of approximately 120 degrees which allows for the clearance needed.

Note: To properly mount the RH manifold on a non-Ram Air motor, the special Ram Air oil filter adapter must be used for the RH manifold to clear the oil filter.

Small Head Header Bolt Set

These 12 piece small head bolt sets are designed to replace regular Hex head bolts for easier access and fewer skinned knuckles. Available in both black oxide and zinc finishes.

Black Oxide Hex Head
66341 3/8"-16 x 3/4" ... 5.99 set

Zinc Hex Head
17970 3/8"-16 x 3/4" ... 6.99 set
17973 3/8"-16 x 1" 10.99 set

Wedge Locking Header Bolts

PROFORM Grade 8 (12.9 steel), Hex type header bolts were designed to keep bolts from backing off. These permanently assembled bolts feature special washers with super hardened serrated teeth that, when sufficiently torqued, the washers bite into and grab the bottom of the bolt head and the top surface of the header. After being self-locked in this manner, any bolt loosening rotation is blocked by a wedge locking action created by the washers interfacing, matching cams. Engine vibration increases the tension, making them even more secure! They are reusable and you can count on them to not fail. Available in different sizes.

Note: Image for illustration purposes.

G4753

1985-02 Oxygen Sensor

This often overlooked item is a very important component in your late model Firebird. Controlling both the fuel and ignition systems, a bad oxygen sensor can lead to problems such as poor fuel economy, increased emissions, failed catalytic converters and poor drivability. The ease of which these sensors can be replaced is frequently misunderstood. It is highly recommended that you test and/or replace your sensor at every tune-up and before submitting your vehicle for emissions testing.

Note: *Front.

Oxygen Sensor Plug

When retrofitting a carburetor on late model engines, an oxygen sensor is not necessary. This plug seals the oxygen sensor bung on headers and exhaust manifolds. Made from trivalent chromium-plated steel with a M-18 thread size to fit most stainless headers. 222734 M-18 thread plug 15.99 ea

Oxygen Sensor Socket

Removes and installs oxygen sensors on most domestic and some foreign vehicles as well. Includes special 7/8" socket with cutaway slot to provide clearance for wire harness. Provides adequate depth to fit over sensor. Heat treated alloy steel. Use with 3/8" square drive or 1" wrench.

1987-92 Replacement Smog Pump

These remanufactured smog pumps are just what you'll need to replace your non functioning or missing original. We offer these pumps for various engine sizes and are available for 6 cylinder and V8 model vehicles. Each pump is remanufactured using new bearings and every pump is computer tested for quality and reliability. No-exchange is required when purchasing a smog pump.

Exhaust Components

1967-81 Manifold Down Pipes

Not all performance enthusiasts use collector style headers, so Pypes has designed 2-1/2" down pipes for log style, rear exit exhaust manifolds to fit your Pypes header back systems. These down pipes are made from 409 stainless steel and mandrel bent 16 gauge tube that fit directly onto factory cast iron manifolds, and slip into the header back systems. Manifold flanges are already installed.

Note: Shipped double oversize.

1967-81 Tunnel X-Crossover

Since a V8 fires alternately, exhaust exits in pulses rather than a steady flow. While one pipe is filled with pressure the other pipe is relatively pressureless, but connecting the two pipes in a Siamese pattern allows pressure to be equalized between the two tailpipes. This action allows the exhaust to pass through quicker for better breathing that increases horsepower. The Pypes crossover product line is defined by a high-quality, exceptionally versatile design. They are a proven winner when it comes to bumping up the horsepower of your daily driver or race car. Pypes tunnel X-Crossover fits a variety of 1967-81 Firebird models with easy installation. All crossovers are made of 409 stainless steel which are needed most. All pipes are mandrel bent to allow for the maximum flow of exhaust gasses, which boosts acceleration. Limited lifetime warranty.

Important: Modification to the body pan brace is required on 1967-69 convertible models. In order to utilize this X-pipe, it is necessary to either add a body pan designed to allow clearance for the X-pipe assembly, or remove the body pan and install subframe connectors. If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

Note: Shipped oversize.

1967-81 X-Crossover Dump Legs

These dump legs replace the front legs of the X-pipe crossover. Strategically located for maximum ground clearance. All dump legs include block-off plates and hardware. Manufactured in 409 stainless steel with mandrel bends to allow for the m maximum flow of exhaust gasses. Add the optional electric exhaust cutouts (sold separately) and make uncorking your exhaust as easy as flipping a switch.

Note: *Connects to any 2-1/2" exhaust with an approximately 12" straight section and enough clearance for the motor valve assemblies.

FLOWMASTER

1967-69 3" Firebird Tailpipe Set

Flowmaster's 3" mandrel bent tailpipe set covers 1967-69 Firebird models. This tailpipe set is designed so you can create a mandrel bent custom high-performance exhaust for any Firebird including convertibles. Flowmaster designed these one piece tailpipes with three things in mind: performance, fit and easy installation. The tailpipes are designed to exit between the tires and rear bumper on either side of the vehicle.

Important: No hardware or hangers are included.

1982-90 Genuine GM Exhaust Clamp

Factory replacement exhaust pipe clamps which are superior to aftermarket clamps. These clamps include the U-bolt, clamp closure nut and two attachment nuts. Excellent choice for the "hard core" restorer.
G9627 1982-90 2" clamp..... 22.99 ea

Tailpipe Expander

Use to remove clamp grooves and round out crushed or bent exhaust pipes to ensure a tight fit, eliminating exhaust leaks. The Hex end allows the use of a combination wrench to remove clamp grooves or small imperfections, or an impact wrench to expand pipes. Imperfections are forced outward rather than forward, eliminating possible damage to component parts. No holding fixture is necessary.
X3442 1-13/16" to 2-1/2" pipes..... 44.99 ea

Exhaust and Tailpipe Cutter

Cuts pipes 3/4" to 3 1/2" (19mm to 76mm) in diameter. 15 blades effectively cut pipe so only 1/4" turn is needed for complete cut. Works great in hard to reach areas.

FLOWMASTER Performance Mufflers

FLOWMASTER Performance Mufflers

Flowmaster's technology uses the pressure and sound energy released from an engine's combustion chamber into the exhaust system to create a low pressure

area between exhaust pulses. Their design uses this energy to pull spent gases out of each cylinder more efficiently. This improved removal of exhaust gases out of the cylinders promotes a more efficient charge of unburned fuel and air to fill the cylinder for the next cycle. The result is more power as the engine has a purer mixture to burn.

FLOWMASTER 40 Series Performance Muffler

AMERICAN THUNDER

- Aluminized Steel
- Original Flowmaster Tone
- Deep Tone Inside Vehicle
- Street or Strip

Super 40 American Thunder

The Super 40 5" x 10" case design gives you a deeper tone that retains our classic 40 Series sound and feel. Increased flow path radius for optimum internal flow using the latest in Delta Flow technology. Flowmaster state-of-the-art robot assembly technology assures a product that exceeds OEM auto manufacturers' specifications.

To achieve such critical quality, Flowmaster performs extensive R&D at the track and in-house with our own engine and chassis dyno facilities. Flowmaster Super 40 is aluminized, black in color and is the most aggressive, deepest sounding street two chamber muffler they've ever built. Enjoy some American Thunder today!

Super 10 Series — Stainless Steel Muffler

Looking for the most aggressive sound available? Flowmaster's new Super 10 series mufflers

are so aggressive, they aren't recommended for street driven vehicles. Best suited to racing applications, these feature the same Delta Flow performance technology used in the highly popular Super 40 and Super 44 series Flowmaster mufflers. Manufactured from durable 409S stainless steel for long-life and offered in a variety of configurations. Backed by a limited lifetime manufacturer's warranty, these short, single chamber mufflers deliver the closest thing to open pipe sound possible. If you want high impact sound, the Super 10 series mufflers are the answer. Measures: 6-1/2" x 9-1/2" x 4".

Note: These mufflers are recommended for off-highway use, not for street driven vehicles.

40 Series — Original Flowmaster Tone

This is the most "aggressive" sounding street/strip muffler that Flowmaster offers. If you're looking for attention, this one will get you noticed. The standard 40 series has an "aggressive rumble" and will generally resonate inside the vehicle around 1800-2000 RPM's, and again at 2400-2600 RPM's. Constructed of 16 gauge aluminized steel and fully MIG welded for maximum durability.

FLOWMASTER Delta Flow 40 Performance Muffler

FLOWMASTER DELTA FLOW TECHNOLOGY

- T409 Stainless Steel
- Powerful Aggressive Tone
- Lower Interior Resonance
- Street or Strip

Delta Flow 40 Series — Reduced Interior Resonance

This two chamber design incorporates Flowmaster's patented "Delta Flow" technology. The "Delta" deflectors result in increased scavenging for better performance and reduced interior resonance over the standard 40 series with a nice growl outside the vehicle. Sounds great on late model performance cars with catalytic converters. Constructed of 16 gauge steel and fully MIG welded for maximum durability.

Flowmaster 50 Series SUV-Performance Muffler

- Large Displacement Street Cars
- Early Era Muscle Cars
- Deep Tone Outside Of Vehicle

50 Series – SUV-Performance

The SUV-Performance muffler is a larger version of Flowmasters 50 Series Delta Flow muffler and is specially designed for trucks, light SUVs and high horsepower vehicles. The larger H-chamber reduces interior resonance to a minimum. Constructed of 16 gauge aluminumized steel and fully MIG welded for maximum durability.

FLOWMASTER 50 Series Performance Muffler

Delta Flow 50 Series – Milder Interior & Exterior Tone

This is the latest design of the 50 series muffler that utilizes Flowmasters patented "Delta Flow" technology along with an "H-Chamber" to eliminate most all interior resonance and still have that famous Flowmaster sound outside the vehicle. Constructed of 16 gauge steel and fully MIG welded for maximum durability.

FLOWMASTER 80 Series Performance Muffler

- Aluminumized Steel
- Aggressive Performance Sound
- Higher Interior Resonance
- Transverse Mounting

Cross Flow 80 Series – Transverse Mounting

The 80 Series is designed for applications where the muffler must be mounted transversely (cross flow) behind the rear end. It provides an aggressive muscle car sound both inside and outside the vehicle. A replacement for early and late model Firebirds. Constructed of 16 gauge aluminumized steel and fully MIG welded for maximum durability.

Exhaust Systems

P1069S

1967-69 Header Back Dual System with X-Pipe

Pypes has designed a header back dual exhaust system for 1967-69 V8 models that incorporates a 16 gauge, mandrel bent stainless steel X-pipe to maximize exhaust gas flow and boost horsepower. This system features a Siamese designed X-pipe, a pair of Street Pro, Race Pro or Violator mufflers, tailpipes, cal-plated clamps, and hangers. The combination of the crossover and the mufflers deliver a perfect balance of sound and performance. Features 409 stainless steel X-pipe, mufflers, intermediate pipes, and tailpipes. Limited lifetime warranty.

Important: Modification to the body pan brace is required on 1967-69 convertible models. In order to utilize this X-pipe, it is necessary to either add a body pan designed to allow clearance for the X-pipe assembly, or remove the body pan and install subframe connectors. If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

Note: Shipped double oversize.

Exhaust Systems

1967-81 Header Back Crossflow System

Pypes has designed a 2-1/2" crossflow system for use on 1967-81 Firebird models needing maximum ground clearance. The Race Pro muffler is the first maximum flow, straight through, transverse mounted Crossflow Muffler System that doesn't need to sacrifice any performance or aggressive growl to give you clearance. This system also features a horsepower freeing X-pipe designed to fit into the driveshaft tunnel, which contributes to it's ability to glide over the nastiest speed bumps. Available in 409 stainless steel or 304 polished stainless, including X-pipe, muffler, intermediate pipes, and tailpipes. Limited lifetime warranty.

Important: Modification to the body pan brace is required on 1967-69 convertible models. In order to utilize this X-pipe, it is necessary to either add a body pan designed to allow clearance for the X-pipe assembly, or remove the body pan and install subframe connectors. If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

1970-81 Firebird Performance Exhaust System

From the makers of Holley performance products comes this great Super Street exhaust system. Get more power and sound! Made from 2-1/4" 16 gauge, heavy-duty steel, this is a high-quality, dual exhaust system that offers the maximum in versatility. All Flowtech Super Street dual kits are designed to locate all components above the frame and feature OEM exit locations. This kit includes your choice of the Terminator muffler or the Raptor muffler. Flowtech's Terminator is constructed entirely of superthick, black aluminumized steel, fully welded for strength and durability with 3" inner pass tubes that reduce back pressure and increase horsepower like no other muffler can. Terminator Dimensions are 15" x 11" x 5". The Raptor muffler features a unique sound rib case design and aluminumized, lock seal construction. The Raptor has low restriction, reduces back pressure and increases performance. It offers gigantic, high output flow tubes to provide more horsepower, better mileage, and a sound of pure performance. Dimensions 13" x 10" x 4-1/2" with offset-inlet/center outlet. All kits come complete with installation hardware and instructions. Kits must be used in conjunction with headers sold separately. For second generation Firebirds with small block Chevrolet engines.

Note: No provision for catalytic converter. Shipped double oversize.

1970-81 Crossmember Back Dual System

Pypes has designed a crossmember back dual exhaust system for 1970-81 V8 models that incorporates a 16 gauge, mandrel bent stainless steel X-pipe to maximize exhaust gas flow and boost horsepower. This system features a Siamese designed X-pipe, a pair of Street Pro, Race Pro or Violator mufflers, tailpipes, cad-plated clamps and hangers. The combination of the crossover and the mufflers deliver a perfect balance of sound and performance. Features 409 stainless steel X-pipe, mufflers, intermediate pipes, and tailpipes. Limited lifetime warranty.

Important: If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

Note: Shipped double oversize.

11108

1970-89 Performance Exhaust System

Made from 2-1/4" 16 gauge steel, these high-quality, dual exhaust systems will increase horsepower in Firebird models with small block Chevrolet, Pontiac, or Oldsmobile engines. Choose between Ultra Flo SS or Super Turbo mufflers. The Dynamax Ultra Flo mufflers are made from aluminumized steel for longer life and use a straight through design to maximize flow. The Dynamax Super Turbo muffler features patented flow directors to channel exhaust and reduce turbulence for maximum flow and a mellow performance sound. Super Turbos are made from double wrapped aluminumized material for longer life. Kits include hardware and instructions. All systems must be used with Dynamax headers sold separately.

Important: Will not fit manual trans in years 1971-76.

Note: Shipped double oversize.

Performance Exhaust

USA Universal Dual Electric Cutout Set

The optional electric exhaust cutouts make unhooking your exhaust as easy as flipping a switch. Electric cutout set includes: 2 valves, wire harness, switch, mounting hardware, and 2 gaskets. Limited lifetime warranty. Available with or without Y-pipes. Made in USA.

Note: *Connects to any 2-1/2" exhaust with a straight section of approximately 12" in length and enough clearance for the motor/valve assemblies.

For use with 2-1/2" or 3" Y-Pipes (Dump Legs)
P1074 cutout set only 428.99 set
Includes 2-1/2" Y-Pipes (Dump Legs)
P1074K* cutout set with Y-pipes 550.99 set

USA Stainless Steel Electric Cutout

These cutouts feature a rugged 12 Volt DC motor and rotating gate for a leak proof seal every time the cutout is opened and closed. When fully opened, these cutouts do not create exhaust flow obstructions that can create a leaky gasket sound, unlike butterfly style cutouts. A pre-wired harness with an illuminated rocker switch is supplied for easy installation. Unhook your exhaust with the flip of a switch from your dash. The cutouts are ideal for race tracks that don't require mufflers. Available individually, in pairs, or in complete kits with Y-Pipes for easy installation. Made in USA.

Important: Not recommended for vehicles equipped with catalytic converters.
Note: May not be legal for highway use or use on emission controlled vehicles.

USA Stainless Steel Cutout Turndown

Easily route your cutout exhaust flow in any direction with these easily installed 304 stainless steel turndowns. These turndowns are made specifically for Doug's electric cutouts and included stainless band clamps for weld free attachment. Made in USA.

25058 2-1/2" turndown pipe 40.99 ea
25059 3" turndown pipe 39.99 ea

Electric Exhaust Cutout

Don't crawl under your vehicle to unhook your exhaust ever again by switching to electric cutouts. Keep them closed and quiet for the street, wide open for the strip, or anywhere in between with the flip of a switch. You control the volume and the power! Available in sizes 2-1/4" to 4" and a low profile oval design for applications with limited ground clearance. Fits 2-1/4" to 3" round exhaust pipe. Built with high-quality materials CNC 6061 aluminum body and motor plate, stainless steel shaft and butterfly plate, high torque DC gear driven motor, weather tight wiring connectors, and custom illuminated toggle switch.

Note: Match valve size with cutout size for optimal fit and performance.

J-B Weld SteelStik

J-B Weld SteelStik is a steel reinforced epoxy putty stick. This hand knead able epoxy adhesive will plug holes and make permanent repairs on wet and dry surfaces. Cures completely submerged in gasoline or under water in 60 minutes. Can be drilled, sanded, filed, tapped, machined, and painted. Works on multiple surfaces: aluminum, brass, bronze, copper, iron, and stainless steel. Cure color is dark gray. Made in USA.

JB267 2 oz. 6.99 ea

Exhaust Components

Xtreme Temperature Coating

XTC is a high temperature/heat resistant coating formulated specifically to protect metal surfaces operating at temperatures from 500 to 1500 degrees F. With proper preparation, XTC provides outstanding adhesion, film integrity, weathering, and thermal shock resistance throughout this entire temperature range, and is guaranteed not to burn off! Available in your choice of a wide variety of colors and sizes.

Note: 8 oz. will coat approximately 3 sets of automotive exhaust manifolds with 2 coats or coat a set of shorty headers with 2 coats. Pints will coat a set of full size headers with 2 coats or coat a complete automotive exhaust system with 2 coats.

Xtreme Temperature Coating

Important: When ordering, select the part number for the size of the can you need, then add the two digit numerical color code to the end of the part number to specify your desired color.

Hi-Heat Coatings

ThermoTec exhaust insulating products work excellent as a paint directly on metal surfaces and can handle continuous temperatures up to 1200°F. It is also recommended for coating exhaust insulating wrap. The coating will protect the wrap from abrasion and harmful liquid spills. Extra resins and binders toughen the surface and extend the life of the wrap.

Note: Shipped within the continental U.S. only. Shipped ground only.

Exhaust Components

Reduce Underhood Temperatures!

Increased exhaust scavenging is produced, along with lower intake temperatures. Exhaust Insulating Wrap™ withstands continuous heat up to 2000 degrees F., and contains no asbestos. Will not over insulate a system when properly installed due to a proprietary coating developed by Thermo-Tec® Thermal Conduction Technology (TCT) that conducts heat across the wrap's surface. The 1/16" thick wrap is available in 1 inch or 2 inch widths in 15' or 50' rolls. Choose from off-white or black.

Reduce Underhood Temps Up to 70%!

The new quick wrap, high velocity Exhaust Jackets™ are an innovative way to insulate and block radiant heat. The jackets cover the header tubes vertically allowing for a consistent fit. The fit allows the exhaust system to expand as it comes up to operating temperatures without restrictions and provides air space for added insulation. This product uses Thermal Conduction Technology (TCT), developed by Thermo-Tec®, and can be applied with the headers in the vehicle.

This Flexible Heat Shield Clips Into Place!

The Header Manifold Blanket provides excellent heat retention for exhaust headers and manifolds. This flexible heat shield simply clips into place on the upper portion of the header. The fabric side of the material should be facing the heat source, and the aluminumized side facing away – offering protection from abrasion and harmful liquid spills. The Header Manifold Blanket is available in 2 sizes: two 20" by 24" blankets for V6 and V8 applications, and one 36" by 40" blanket for straight 6 and 4 cylinder engines.

TT1017	V6-V8 applications.....	82.99 pr
TT1018	straight 6 or 4 cyl models.....	78.99 ea

Vermiculite Coated Header Wrap

Insultherm Header Wrap is an extremely high temperature resistant wrap used to insulate hot gases in automotive exhausts. Manufactured from texturized fiberglass yarns that are woven into a strong, flexible wrap with vermiculite coating. Resists gasoline and engine chemicals and withstands temperatures up to 1200 degrees F. (maximum continuous temperature of 1000 degrees F). Available in black or natural in 50' or 25' rolls.

1" Header Wrap

HW19301	black	1" x 50'.....	19.99 ea
HW19302	natural	1" x 50'.....	18.99 ea
HW19303	black	1" x 25'.....	9.99 ea
HW19304	natural	1" x 25'.....	8.99 ea

2" Header Wrap

HW19311	black	2" x 50'.....	26.99 ea
HW19312	natural	2" x 50'.....	25.99 ea
HW19313	black	2" x 25'.....	16.99 ea
HW19314	natural	2" x 25'.....	15.99 ea

Turbo Insulating Set

The turbo insulating set is designed to protect and improve performance of the turbo. This universal set will help reduce turbo lag. The cut-to-fit set includes a substantial amount of material to cover turbos from the smallest automotive application to heavy-duty truck applications.

TT15003	turbo insulation cover only.....	38.99 ea

Shield Plastic or Rubber Hoses and Wiring from Radiant Heat!

Thermo-Shield™ protects hoses and wires from radiant heat. Unprotected, rubber hoses and plastic or rubber insulated wiring can dry out, melt or crack over time. Thermo-Shield™ is used in applications where it is difficult or not practical to disconnect one end of the hose or wire. The adhesive backed composite construction tape can easily be wrapped around the hose or wire to make a clean, professional appearance. Reflects radiant heat up to 2000 degrees F. Provides a barrier against the extreme conditions that underhood components are exposed to. Wrap your fuel lines and say good-bye to vapor lock.

TT1019	1-1/2" x 15' feet.....	18.99 ea
TT1051	2" x 50' feet.....	48.99 ea

Floor and Tunnel Shield II

Ten mil aluminum bonded to woven glass fiber with a hi-temp adhesive backing. Designed to withstand temperatures up to 1750 degrees F. The adhesive backing adheres to almost anything while withstanding temperatures over 450 degrees F. Ideal for firewalls, floor pans, transmission tunnels, and under hoods.

Note: Cool-Tape recommended for seams and edges.

Floor and Tunnel Shield with Adhesive Backing

DE050501	21" x 2'.....	39.99 ea
DE050502	21" x 4'.....	86.99 ea
DE050503	42" x 4'.....	159.99 ea

Floor and Tunnel Shield without Adhesive Backing

DE010408	1-1/2" x 15' roll.....	20.99 ea
DE010416	1-1/2" x 30' roll.....	44.99 ea
DE010468	2" x 30' roll.....	42.99 ea

An Extremely Versatile Heat Barrier™!

The Aluminized Heat Barrier™ is made up of woven silica with a flexible aluminized finish. The highly reflective surface of the material is capable of withstanding radiant temperatures in excess of 2000 degrees F. Installed using standard rivets with a backup washer, or with weather strip adhesive. The Snap Straps (sold separately) can be used to hold the blanket in place for manifolds or exhaust systems.

Keep Cool! Reflect Radiant Heat!

The Muffler/Catalytic Converter Heat Shield™

The Muffler/Catalytic Converter Heat Shield™ is made up of woven silica with a flexible Mylar finish. The highly reflective heat shield can be installed between the catalytic converter, muffler, or any other component to reflect radiant heat away from the undercarriage of the vehicle. Kit includes one 24" x 40" Mylar heat shield and all necessary fasteners.

Clamp-On Heat Shield

The flexible Clamp-On Heat Shield blocks more than 90% of damaging radiant heat from the exhaust. Silica based clamp-on shields are available in 1', 2', and 3' lengths Clamp-On Shields are available in 1', 2', and 3' lengths. Sets come complete with all clamps and install easily in minutes.

Silica Based Fabric Clamp-On Heat Shield
