

Fuel Tank Replacements

1961-66 EFI Conversion Fuel Tank

Holley and Sniper are here to help you to complete your EFI swap with new EFI conversion fuel tanks. Each tank is a direct fit for your application no modifications necessary. The set includes: 18 gallon coated galvanized steel tank, a 255 lph fuel pump, internal baffling, a correct Ohm range fuel level sender. The tank is powder coated for corrosion resistance and great looks. NPT Supply and return line ports for easy fuel line connection and a barbed vent fitting. Fuel pump and sender are recessed in the tank to provide an easy installation with no modification to your vehicle. EFI style tank baffling includes a large 4.3 liter internal fuel tray to prevent fuel pump starvation.

*Note: *Includes filler neck. Shipped double oversize.*

Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles). **MSRP**

- FITech's Easy Street 600 HP throttle body.
- Replacement for any 4 barrel carburetor.
- 40' natural stainless steel braided fuel hose.
- Handheld controller, cable, and mount.
- 1961-64: EFI fuel tank, 20 gallon capacity.
- 1965-66: EFI fuel tank, 24 gallon capacity.
- 1965-66: 1' deeper than stock, longer straps included.
- Galvanized steel then powder coated silver.
- Fuel pump and sender are recessed in the tank.
- EFI internal baffling to prevent fuel starvation.
- Looks like an OE tank when installed.

1961-66 Total Package EFI Swap Set

The new Total Package EFI swap set for 1961-66 Impala, Bel Air, Biscayne and 1966 Caprice models features FITech's Easy Street 600 HP throttle body as the heart of the system, delivering smooth and reliable performance. In addition, the sets include a new direct-fit 18 gallon notchered corner fuel tank with an internal pump module, a high pressure internal fuel pump and a complete steel braided hose kit to get the fuel to the classic gold finished throttle body. A high-flow serviceable filter and AN-style fittings are also included, making all of the connections for installation a breeze. Everything you need under one part number, it's never been easier to make the switch to Fuel Injection.

Note: Shipped oversize.

Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

J-B Weld Gas Tank and Radiator Repair

AutoWeld is a hand mixable, steel reinforced, non-rusting epoxy putty that quickly repairs or rebuilds anything made of metal. After mixing, it forms an industrial strength polymer compound that can be molded into shapes or used to build up, patch and repair steel components. AutoWeld sets in 5 minutes and after 60 minutes, can be drilled, tapped, machined, ground, filed, and painted. Cures dark gray. Made in USA.

Universal Fuel Tank Anti-Squeak Insulator

Universal style anti-squeak cushions are designed to install between the gas tank and the gas tank straps. These fuel tank anti-squeak pads cushion the gas tank from the body and straps to reduce noise caused by metal to metal contact. Replacing or adding the anti-squeak pads can help eliminate noise or friction between the fuel tank straps and the body.

24" Anti-Squeak Set

Set contains: two 24" x 2" x .060" anti-squeak strips, two 24" x 1-1/4" molded fuel strap cushions, and one 5-1/4" x 2" x 1/2" neoprene anti-rattle pad.

K915 universal 24.99 set

36" Anti-Squeak Set

1958-86 Fuel Pump Pushrod

Correct fuel pump pushrod for all V8 engines, small block or big block without 1958 3 x 2 barrel.

3704817	1958-86	13.99 ea
---------	---------	----------

New!

1958-62 Fuel Pump with Glass Bowl Filter

Reproduction mechanical fuel pump with glass bowl filter for 1958-62 full size models with an inline six cylinder 235ci engine. This fuel pump is manufactured to factory specifications and fits models without vacuum windshield wipers. The glass bowl is removable for cleaning. The fuel lines might have to be altered for inlet and outlet locations or the pump body may be re-positioned as needed to allow better alignment of the fittings for specific 1952-62 applications. Includes gasket.

------	---------	------------	----------

Holley

1964-79 Chrome Fuel Pump

Replace your original fuel pump with a genuine Holley triple chrome-plated fuel pump. Each high volume mechanical fuel pump flows 60 gallons per hour @ 7-1/2 psi. Features include an adjustable lower housing allowing 360 degree rotation of fuel inlet-outlet fittings for custom installations. Applications to fit 1964-79 small block and 1968-72 big block engines.

1964-79 Fuel Pump

For 283, 302, 307, 327, 350 small block engines. A high-quality triple chrome-plated pump.

New!

Performer RPM 110 GPH Fuel Pump

Designed for all Edelbrock carburetors used in Performer or Performer RPM applications. These high-performance street fuel pumps feature a high-quality three stage polished finish. The unique valve design improves flow quantity and quality, and will support engines up to 600 HP. High volume, 3" NPT inlet and outlet surpasses the capacity of conventional models. Produces 6 psi and does not require a regulator. For gasoline only. Lockable lower housing can be rotated for best inlet/outlet alignment.

Driven Carb Defender

Driven Carb Defender Fuel Additive has been formulated to protect against harmful ethanol deposits and corrosion in fuel and the induction system. Special inhibitors resist expensive damage and reduced performance from moisture accumulation from modern ethanol blended gasoline. This additive controls combustion chamber residue, cleaning and protecting fuel system and intake tract surfaces to keep carburetors functioning properly. Carb Defender is ideal for everyday drivers or classics that spend time in storage between cruises and special events. One bottle treats up to 25 gallons of ethanol blended fuel.

Inline Fuel Pressure Gauge

Set and monitor fuel pressure with these easy to use gauges! Simply splice into the existing carburetor line to the anodized aluminum fuel block and 3/8" nipples. Each gauge measures 1-1/2" in diameter with a 0-15 psi range in 1/2 lb increments. Gauges are available in standard form or liquid filled for better vibration resistance.

Return Line Fitting Conversion Set

If you are installing an in-line fuel pump or an aftermarket fuel injection setup but are using an original fuel tank not originally provisioned for a return line, this universal return line fitting set is a simple and inexpensive way to add one to your existing setup without having to go through the hassle of pulling your old tank and installing an expensive, brand new tank. This fitting can also be used for other applications such as adding a vent line or power steering return line, whatever you might need where a return line was not originally installed. Works on material up to 1/4" thick.

New!

EFI Bypass Regulator

Performance EFI regulator designed for medium to high horsepower applications. This regulator features Aeromotive's high-flow design, superb pressure control and legendary durability. Features base pressure adjustable from 40-75 psi, gasoline and alcohol compatible, fuel pressure rises on a 1:1 ratio with boost, 1/8" National Pipe Thread taper (NPT) gauge port. Includes two o-ring boss fittings (ORB-06) inlet ports and one o-ring boss fitting (ORB-06) return port.

Emissions Note: (N) Non-CARB compliant (not legal for emission controlled vehicles).

A9713109 adjustable with EFL..... 216.99 ea

Universal Bypass Regulator

A dual purpose, universal regulator for EFI or for Carbureted street/strip applications. Features pressure adjustable from 5 to 20 psi with standard spring, (installed) or from 20 to 60 psi with high pressure spring (included). Offers the full flow and rock steady fuel pressure that only a dynamic.

Aeromotive bypass regulator provides the ultimate of regulating any fuel pump between 100 and 250 gph, fuel pressure rises on a 1:1 ratio when referencing boost. All ports are 3/8" National Pipe Thread taper (NPT), with one inlet and three outlets on the main body and one return port on the bottom. Bypass design provides the ultimate, dynamic fuel pressure control.

Note: Requires a return line to be installed from the bottom of the regulator to the top of the tank.

Emissions Note: (N) Non-CARB compliant (not legal for emission controlled vehicles).

A9713301 3 Port 3/8" NPT..... 216.99 ea

Carbureted Bypass Regulator

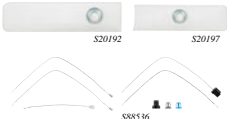

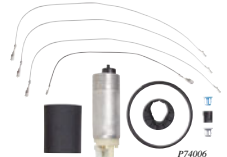

Perfect for naturally aspirated or 'blow-through' supercharged engines. Features base fuel pressure adjustable from 3-15 psi, 1 o-ring boss fitting (ORB-10) inlet port and 1 o-ring boss fitting (ORB-08) return port, fuel pressure rises on a 1:1 ratio when referencing boost. Bypass design provides the ultimate, dynamic fuel delivery system, ideal for converting from fuel injection to carburetion using the stock, in-tank pump. EFI conversions will require a larger than stock return line for proper low pressure control. Includes two o-ring boss fittings (ORB-06) outlet ports and 1/8" National Pipe Thread taper (NPT) gauge port.

Note: Requires Aeromotive fitting (AN-08) return line from bottom of regulator back to top of the tank.

Emissions Note: (N) Non-CARB compliant (not legal for emission controlled vehicles).

A9713204 2 port..... 226.99 ea

1984-96 Electric Fuel Pump

Electric fuel pumps will require additional components for installation. Please read the notes carefully to determine the correct style pump for your year and model. You may contact our technical department for more information.

Note: New strainers must be used on electric pumps for warranty compliance. Fuel pump strainers are included on electric pumps without notation. If a strainer is listed in the pump description, you must order it separately. Due to electrical requirements on certain fuel pumps, models denoted with one or two asterisks (*) or (**) require a strainer and wire harness adaptor for installation. *Use S20194 strainer and S88536 wire harness. **Use S20197 strainer and S88536 wire harness. †Use S20192 strainer.

Electric Fuel Components

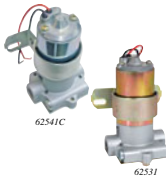

Holley

Electric Fuel Pump

We offer externally mounted Holley electric fuel pumps. They all feature the proven rotor and vane design and are available in ratings from 97 gph to 140 gph. The 97 gph "red" pump is set at 140 psi and does not require a regulator. The 110 gph "blue" pump is set at 14 psi and includes a regulator. The 140 gph "black" pump is also set at 14 psi and can be used for gas or alcohol fuel.

Quiet-Flo Electric Fuel Pump

State-of-the-art electric fuel pumps offer maximum performance in a compact package for carbureted applications. Anodized aluminum housing and high-quality internals make it both strong and extremely durable. The E1791 electric fuel pump is factory set to 6.5 psi does not require a regulator. 3/8" inlet/outlet, 120 gph free flow, up to 600 HP. The E1792 electric fuel pump is preset to 12 psi and requires an external regulator. 1/2" inlet-outlet, 160 gph free flow, up to 1000 HP.

Important: For proper installation and voltage requirements, use fuel pump relay E1795.

E1791	6.5 psi..... 280.99 ea
E1792	12 psi..... 284.99 ea

Eitelbrod

Quiet-Flo Electric Fuel Pump

This anodized aluminum EFI fuel pump offers maximum performance in a compact package. The in-line design keeps the pump motor and components cool even under harsh conditions. Features -10AN inlet/outlet with a flow rate of up to 80 gph at 45 psi for high HP fuel injected applications. This fuel pump supports 835 HP at 12 Volts with a current draw of 12 amps at 45 psi. 10AN inlet/outlet 80 gph at 45 psi. E1790 6-7/8" x 3-1/4"..... 798.99 ea

Micro Electric Fuel Pump

This compact electric fuel pump features a solid state design that has a low current draw of around one amp and makes a good stand alone pump or booster pump. Designed for carbureted vehicles with a 12 Volt negative ground electrical system, this pump supports 4-7 psi at up to 35 gph. Includes fittings, mounting hardware, and instructions.

Note: Not for diesel applications.

71211 59.99 ea
-------	----------------

Fuel Pump Safety Switch

This safety feature is a must have for any electric fuel pump vehicle. This safety switch monitors the tach signal to limit when an electric pump can operate. When the key is first turned on, the fuel pump is allowed to run for three seconds, priming the fuel system. After that, it only operates if the engine is running. If the engine stops, so does the fuel pump. No plumbung into the oil lines or no extra priming button under the dash is required.

RE12003 64.99 ea
---------	----------------

Fuel Pump Safety Switch

This fuel pump safety switch shuts off fuel flow whenever oil pressure drops below 15 psi. This adds a safety factor in case of an accident or engine stall. Designed for 12 Volt electrical systems and can be teed into the oil pressure sending unit with an 1/8" NPT tee.

77872 30.99 ea
-------	----------------

Fuel Pump Relay

This universal fuel pump relay will ensure proper wiring which reduces the risk of damaging the fuel pump, and offers consistent fuel pressure. This relay is used with fuel pump part #E1791 or #E1792. E1795 universal relay..... 79.99 ea

Performance Carburetors

Thunder Series Carburetor

Edelbrock

Edelbrock Thunder Series carburetors share all the performance advantages of the popular Performer Series

E1906

but with innovative new features. These carburetors include all of the performance features of the Performer Series carburetors and also include distinctive black hardware, dual fuel inlets (shipped with left side plugged), lightweight ball burnished and CNC profiled body, and the Quick-Tune secondary. They're available in 650 cfm and 800 cfm sizes with manual or electric choke. There's even a 650 cfm version specifically designed for off-road vehicles. These Edelbrock carburetors bolt-on and run right out of the box! Simply dependable, proven performance for almost any carbureted vehicle. All Edelbrock carburetors include an installation kit and owners manual.

Emissions Note: * Non-CARB compliant (not legal for emission controlled vehicles).

E1906*	650 cfm	electric choke...	446.99 ea
E1913*	800 cfm	electric choke...	489.99 ea

Performer Series Carburetor

By design, Performer Series square bore carburetors are related to provide the widest possible torque range when matched

E1405

with Edelbrock Performer, Performer RPM, RPM Air Gap or Torker II manifold and camshaft combinations. However, these carburetors are not limited to these applications, they also match well with most stock and other manifolds of similar design. Performer Series square bore carburetors are all aluminum, ball burnished and lightweight. There are no power valves to blow out or plastic parts to break. The 2 piece construction resists warping and the metering rods can be changed in seconds without removing the carburetor. All Edelbrock carburetors come with an installation kit and owners manual.

Emissions Note: * CARB EO compliant (50 states legal). ** Non-CARB compliant (not legal for emission controlled vehicles). † Black power coated.

PROFORM

750 CFM Carb Main Body

†

Direct replacement components to turn a street carburetor into a high-performance carb; get that extra performance out of your ride in less than 30 minutes! Add up to 25-50 HP with PROFORM's 100% new, high-performance carburetor main body (no re-build components). Easy swap-in, swap-out installation utilizing existing metering blocks, fuel bowls, and baseplate. Involves only 14 screws. Has adjustable screw-in air bleeds, high-performance down-leg boosters. Get maximum air flow with no air horn, choke tower, or choke control. Includes: instructions, all necessary non-stock replacement gaskets, and high-performance jet kit.

Note: Main body does not retain vacuum advance port in original metering block.

Emissions Note: * Non-CARB compliant (not legal for emission controlled vehicles).

Carburetor Spacer Set

Easily optimize the flow rates of air and fuel in your vehicle with this modular 1" carb spacer set! Since various engine combinations have different fuel and air delivery requirements for maximum performance, spacer set includes 1 frame and 2 popular inserts: open, 4 hole, and tapered 4 hole. This way, you can dial in exactly the right flow to get the most from your motor.

67160 carburetor spacer 31.99 set

5-1/8" Diameter Carburetor Cover

Keep dirt and contaminants out of your carburetor while working on your engine with the air cleaner removed.

Produced using tough plastic construction. For use on all 4 barrel carburetors, 5-1/8" diameter.

Emissions Note: Non-CARB compliant (not legal for emission controlled vehicles).

T2012 1967-86 4 barrel 8.99 ea

Carburetor Wedge Plate

During hard acceleration the float bowls in a carburetor become uneven, causing moderate fuel starvation. This aluminum spacer tilts the carburetor forward 5-degrees to help keep it level. This spacer measures .830" at its thickest point and has a dual bolt pattern for standard Holley, Carter AFB, and Edelbrock carburetors.

Emissions Note: Non-CARB compliant (not legal for emission controlled vehicles).

265030 50.99 ea

Carburetor Linkage Plate

Linkage plate is triple chrome-plated for a beautiful finish. For GM cables. Can be used with part #T2334.

T2333 Holley/AFB 35.99 ea

DEF AUTHORIZED

Carburetor Rod Clip

Reproduction carburetor rod to accelerator rod clip. Manufactured to original specifications for a correct replacement. Fits 5/32" rod diameter, LH and RH, 11/64" i.d.

In-Tank Pump Set

In-Tank Pump modules can be used on tanks with a depth of 6" to 15". The two fuel ports are threaded to accept -6-AN/O-ring boss fittings for a secure, leak-free connection. An In-Tank 340 LPH pump is included along with gaskets, terminals, and clamps.

FF50015 In-Tank..... 414.99 set

Inline Pump Set

The Go EFI Inline frame mount fuel delivery set is supplied with our heavy-duty 255 LPH external fuel pump that is suitable to support engines producing up to 600 horsepower. Set includes: 40 feet of high pressure fuel hose, 2 fuel filters including a serviceable 10-micron filter, fittings, mounts, and clamps.

FF50001 Inline Pump..... 297.99 set

Force Fuel Mini Pump Set

The compact design of the new Mini Force Fuel fits easily under the hoods of street rods and smaller engine compartments. The reservoir of the Mini is equipped with an efficient 255-LPH pump and internal regulator to deliver a consistent 58-psi of fuel pressure for your EFI system. Supplied with high pressure fuel hose, AN fittings, return line fitting bung and liquid filled gauge FF50006 Force Fuel Mini..... 479.99 set

Force Fuel Pump Set

The Force Fuel System mounts under the hood and is fed with the original mechanical or electric fuel pump then supplies the EFI system with the required high pressure through the use of an internal 340 LPH pump. Set includes: 5' of high pressure fuel hose, 10-micron fuel filter, AN fittings, return line fitting bung, and liquid filled gauge.

Full Size Chevrolet Headers

1958-94 Hedman Heddgers

Classic Industries® stocks a full line of Hedman Heddgers™ for 1958-94 full size Chevrolet models. These units are designed to replace the heavy, and restrictive factory manifolds with tubular steel manifolds. These Heddgers are not only lighter, but will also increase your Chevrolet's performance. Torq-Step heddgers feature an innovative design that allows for and increased overall torque curve. Sets are complete and ready to bolt-on. Includes collector and header to head gaskets, collectors, and bolts. We offer Hedman Heddgers™ for use with or without air injection (smog tubes).

Important: Available in black only. Be sure to read the important notes listed on the bottom of this page pertaining to each header system for correct application. **Note:** Shipped overseas.

Emissions Note: * CARB EO compliant (50 state legal). ** Non-CARB compliant (not legal for emission controlled vehicles).

Hedman Heddger Notes

- Without smog injection or injection heads.
- Includes parts necessary to retain emission devices. (50 state).
- With A.L.R. system.
- Modification to stock exhaust required to retain catalytic converter.
- Shory Heddger (Max. ground clearance).
- Not recommended for use with aluminum heads.
- Engine swap, all parts must be factory stock.
- AC equipped vehicles require bracket #20110.
- Will not fit Saginaw close ratio PS with 825 power steering box.
- 103 will fit with angle plug heads - Chevrolet aluminum only.
- Must modify rotary R4 AC bracket.
- Due to aluminum cylinder heads on GEN V1 engines, 502 BB Chevy will have clearance problems on some applications. Bottom of header flanges may hit head bolts. Nothing may be necessary.

Hedman Emission Notes

- Not applicable or intended for street or highway use. Legal only for racing vehicles which may never be used upon a highway.
- For vehicles 1964 through 1974 without A.L.R. system, considered as OE replacement parts when existing emission controls are not removed from vehicle.
- Not legal for sale or use in California.
- For vehicles 1964 through 1974 with A.L.R. system, considered as OE replacement parts and do not require an EO R, when existing emission controls are not removed from vehicle.
- 1975-80 only, 50 state legal for these years only.
- 1975-81 only, 50 state legal for these years only.

1958-94 Doug's Headers

Doug's headers are carefully developed to fit each specific vehicle application. Doug's headers are available for 1958-94 full size Chevrolet models with small block or big block V8 engines, with and without air-injection parts, and with console or column shifters. Heavy-duty machined and finished header flanges, the smooth mandrel bends tubes, and a protective Metallic Ceramic Thermal Barrier Coating (MCTBC) make Doug's Headers an excellent choice for exhaust system performance.

Important: Headers are intended for off-highway use only and are not designed for use on California vehicles with pollution control devices. Be sure to read the important notes listed on the bottom of this page pertaining to each header system for correct application.

Note: Shipped overseas.

Emissions Note: * Non-CARB compliant (not legal for emission controlled vehicles).

Doug's Header Notes

- Shory design for maximum ground clearance.
- Fits D-Port cylinder heads including Z24 crate engines.
- Will not fit Saginaw close ratio with 825 power steering box.
- Big block frame stands and motor mounts must be used to insure proper engine location and header fit.
- Will fit most angle plug heads including factory Chevrolet "Bow Tie" heads.
- Vehicles with locking steering columns require linkage removal.
- May require AC bracket 7608.
- Fits Edelbrock angle plug heads.
- Tri-Y design.

Doug's Header Notes

- Will not fit with Powerglide transmission.
- Requires LS1 adapter plate set SK100.
- Includes 3" to 2 1/2" reducers with O2 fittings.
- Must use non-shell type motor mounts.

Doug's Emission Notes

- The product accompanying this document is legal only for off-highway use (except in California or states that have adopted California emission standards), racing use or for use on pre-emission controlled motor vehicles/motor vehicle engines (pre-1974 domestic vehicles certified to California standards, pre-1974 domestic vehicles certified to federal standards and all pre-1974 foreign vehicles), per the manufacturer's application guide.

Ram Horn Exhaust Manifolds

These exhaust manifolds are based on the high-performance small block Chevy Ram Horn manifolds from the 1950's and 60's. Manufactured from heavy cast iron without air injection ports or alternator/generator bracket provisions. Available in raw cast iron, black ceramic, silver ceramic, or chrome finish. Features 2-1/2" outlet. Includes mounting hardware and gaskets. Sold in pairs.

Note: Shipped overweight.

Emissions Note: Ⓢ Non-CARB compliant (not legal for emission controlled vehicles).

LS Cast Iron Exhaust Manifolds

These Hooker cast iron exhaust manifolds are designed to hug the engine block closely so they will work with a variety of LS engine swaps or as a replacement. The contoured shape increases flow and performance over stock manifolds with a traditional look. Fits all LS engines up to 500 horsepower except L57 and L59. Made from hi-silicon ductile iron for years of durability and corrosion resistance. Available in a range of different finishes.

Emissions Note: Ⓢ Non-CARB compliant (not legal for emission controlled vehicles).

Wedge Locking Header Bolt Set

Wedge locking header bolts were designed to keep bolts from backing off. These bolts feature special washers with hardened serrated teeth. The washers bite into the bolt head and the top surface of the header. After being self-locked in this manner, any loosening rotation is blocked by a wedge locking action. They are reusable and you can count on them to not fall Grade 8.

Warning Concerning Smog Pump Pulleys

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys.

1966-68 Smog Pump Belt

Correct reproduction A.I.R. smog pump belts for 1966-68 Impala models. These unique reproduction belts are designed to offer an original factory style that includes the correct belt markings for an authentic and original reproduction.

FLOWMASTER

USA 1959-64 Header Back Pipe Set

Flowmaster performance 2-1/2" mid-pipe set for 1959-64 Impala and full size Chevrolet models. This pre-bent pipe set is made with 16 gauge 409 stainless steel mandrel bent tubing and are designed to fit your vehicle perfectly with all the quality and performance that you would expect from a Flowmaster product. Mufflers sold separately.

Important: Must be used with offset/offset (same side) mufflers or Flowmaster Huskpower mufflers.

Note: Shipped double oversize. **057**
Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

Low-Line Lake Pipes... The Look is Back!

Get the retro look with a set of chrome lake pipes on your full size Chevrolet model. This look was popular in the late 1950's and early 1960's. When setup as a functional feature, it allowed the racer to unclog or "dump" the exhaust for increased exhaust flow when racing. The use of a cap was provided for quieter operation during street driving. It also provided the vehicle with a lower "lead sled" look. These pipes do not incorporate any silencing materials and are recommended for non-functional use only. Choose from three styles: slanted outlet without cap, triple outlet with caps or single outlet with cap. Available in three lengths to suit your needs. Chrome pipe measures 2" in diameter. Mounting clamps sold separately.

Note: Shipped oversize.

Pyper

1967-81 Manifold Down Pipes

Not all performance enthusiasts use collector style headers, so Pyper has designed 2-1/2" down pipes for log style, rear exit exhaust manifolds to fit your Pyper header back systems. These down pipes are made from 409 stainless steel and mandrel bent 16 gauge tube that fit directly onto factory cast iron manifolds, and slip into the header back systems. Manifold flanges are already installed.

Note: Shipped double oversize. **052**
Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

--------	--------	------------

MF

Tru-X Pipe

MagnaFlow's stamped X-pipe incorporates a gentler inner radius that allows for better exhaust scavenging, noise cancellation and better balance between cylinder banks. With this design, power is increased while decibel levels are decreased.

Note: For use on vehicle's with headers.

X-Pipe

10781	2-1/2" dual in/out x 9.5" long	146.99 ea
10782	3" dual in/out x 13.2" long.....	153.99 ea

MF

Crossover Pipe

MagnaFlow's stainless steel Tru-X crossover pipe represents a significant leap forward in technology over traditional H-Pipes. The gentler radius allows for better exhaust gas scavenging and noise cancellation.

Note: For use on vehicle's with stock exhaust manifolds.

FLOWMASTER

F842515

Super 10 Series Muffler

Looking for the most aggressive sound available? Flowmaster's new Super 10 series mufflers are so aggressive, they aren't recommended for street driven vehicles. Best suited to racing applications, these feature the new Delta Flow performance technology used in the highly popular Super 40 and Super 44 series Flowmaster mufflers. Manufactured from durable 409S stainless steel for long-life and offered in a variety of configurations. Backed by a limited lifetime manufacturer's warranty, these short, single chamber mufflers deliver the closest thing to open pipe sound possible. If you want high impact sound, the Super 10 series mufflers are the answer. Measures: 6-1/2" x 9-1/2" x 4".

Note: These mufflers are recommended for off-highway use, not for street driven vehicles.

FLOWMASTER

F42441

40 Series — Original Flowmaster Tone

This is the most "aggressive" sounding street/strip muffler that Flowmaster offers. If you're looking for attention, this one will get you noticed. The standard 40 series has an "aggressive rumble" and will generally resonate inside the vehicle around 1800-2000 RPM's, and again at 2400-2600 RPM's. Constructed of 16 gauge aluminumized steel and fully MIG welded for maximum durability.

DELTA FLOW

F842543

Delta Flow 40 Muffler

This 2 chamber design incorporates Flowmasters patented "Delta Flow" technology. The "Delta" deflectors result in increased scavenging for better performance and reduced interior resonance over the standard 40 series with a nice growl outside the vehicle. Sounds great on late model performance vehicles with catalytic converters. Constructed of 16 gauge steel and fully MIG welded for maximum durability.

The Sound of the Fabulous Fifties!

The world's oldest performance muffler, a Smyth's glasspack is now available for your full size Chevrolet models! Get the muffler your dad used to impress his friends, and yes, it's still guaranteed not to blow out or leak. Double end cap construction and 3-1/2" hammer-tone finished cases assure the original Smyth's look. A great tone for your fifties or sixties sled.

13252C

Screamer Twintronic Muffler

With the success of QTP's electric cutoff they took it to the next level. A dual mode muffler with a single inlet with a dual outlet. One outlet is a straight pipe with a valve at the end on a 360 degree floating flange for total adjust ability. When the valve is open you get the loud and free flowing exhaust system. Close the valve and the exhaust gases are diverted through the muffled section to get the quiet mild mannered sound. This is the only system out there that can give you exactly what you want. Other systems that make the power are loud and drone all the time which gets old. Other systems are on the quieter side, which lacks the power. With all the noise restrictions coming out The Screamer is the only system that gets you the power and sound you desire! All systems are stainless steel for clean look and made in the USA.

Keep Cool! Reflect Radiant Heat!

The Muffler/Catalytic Converter Heat Shield™ is made up of woven silica with a flexible mylar finish. The highly reflective heat shield can be installed between the catalytic converter, muffler, or any other component to reflect radiant heat away from the undercarriage of the vehicle. Kit includes one 24" x 40" Mylar heat shield and all necessary fasteners.

- TT1007 muffler heat shield 76.99 ea

Muffler & Tailpipe Repair

Putty and sealer seals holes and leaks in mufflers, tailpipes, and exhaust joints. Makes new installation more secure. Resists temperatures up to 2000 degrees F. Epoxy impregnated fiberglass bandage chemically welds mufflers and tailpipes. Great for mufflers, tailpipes, joints, and catalytic converters.

409 Stainless Muffler

Pypes Street Pro mufflers are chambered to maintain rich sound without resonance, Sound Rating = 7.0-7.5/10. When it comes to flow, you just can't get anything better than our Race Pro Muffler. Race Pro mufflers have a straight through design, Sound Rating = 7.0/10. Violator mufflers have an internal lowered tube with mini sound deflector chambers, making it flow like a straight through muffler but with the sound of a chambered muffler, Sound Rating = 9.0/10. Each muffler case measures: 4" x 9" x 14".

Muffler With Attitude

BM0114

BM0101

BM0105

MWA High Performance Muffler

The Gibson MWA Muffler delivers maximum sound and the best muffler flow period! This straight-thru design promotes exhaust gases to flow at the highest rates flowing only 3 cm less than a 3" straight pipe, improving power potential while keeping interior drone to a minimum. The MWA muffler has no internal packing or weak baffles, allowing it to maintain a lightweight design with a unique and powerful sound. The MWA muffler is made in the USA and is constructed of high-quality stainless steel. When its time to make your Hot Rod or Sport Truck sound and perform as good as it looks, there is no other choice than Gibson's MWA, "Muffler With Attitude".

CFT Superflow Muffler

Gibson's CFT Superflow muffler with Convergent Flow Technology actually tunes your exhaust by using resonance chambers, directional lowered tuning ports and angular induction to draw exhaust gases into the muffler and expel it at a higher velocity. The result is a muffler that doesn't have packing to wear out, yet delivers more power and a performance sound. This muffler features a chambered and lowered core, to ensure no sound degradation overtime, and fully welded solid internal construction. This result delivers more power with a deep tone.

Original Style Exhaust Systems

1958-66 Original Style Exhaust System — Stainless Steel

OE style replacement exhaust systems for all 1958-66 full size Chevrolet models. Manufactured in 304 grade stainless steel, each replacement exhaust system is designed to closely duplicate and replace the original system. All systems feature as original notched tip tailpipes and all exhaust systems are mandrel bent for improved performance and exhaust flow. Each system includes header pipes and 2 header pipe flange gaskets as required.

Note: Special shipping charges apply.

Aftermarket Exhaust Systems

1985-96 Header Back System with X-Pipe

Fabricated using 16 gauge, mandrel bent stainless steel pipe ensures maximum exhaust gas flow which will boost horsepower. This system features a Siamese designed X-pipe, a pair of Street Pros mufflers for 1965-69 or Race Pros mufflers for 1994-96, tailpipes, cad-plated clamps, and hangers. The combination of the crossover and the mufflers deliver a perfect balance of sound and performance. 2-1/2" header back system with X-pipe.

Important: If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

Note: Shipped double oversize.

P1009	1994-96	Race Pros mufflers	834.99 set

1985-89 Header Back System with X-Change

Pipes has designed a 2-1/2" header back dual exhaust systems for 1965-69 V8 models. Fabricated using 16 gauge, mandrel-bent aluminumized steel pipe ensures maximum exhaust gas flow which will boost horsepower. X-change crossover is unique with its open port exhaust that provides a straight path when uncapped yet still utilizes the benefits of the crossover technology for an extra 10-15 MPH. Features a Siamese designed X-pipe with the X-change crossover, a pair of Street Pros mufflers, tailpipes, cad-plated clamps and hangers. The combination of the crossover and the mufflers deliver a perfect balance of sound and performance. 2-1/2" header back system with X-change.

Important: If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

Note: Shipped double oversize.

Performance Exhaust

P1074K

USA Universal Dual Electric Cutout Set

The optional electric exhaust cutouts and make unhooking your exhaust as easy as flipping a switch. Electric cutout set includes: 2 valves, wire harness, switch, mounting hardware, and 2 gaskets. Limited lifetime warranty. Available with or without Y-pipes. Made in USA.

Note: Connects to any 2-1/2" exhaust with a straight section of approximately 12" in length and enough clearance for the motor/valve assemblies.

For use with 2-1/2" or 3" Y-Pipes (Dump Legs)
P1074 cutout set only 428.99 set

Includes 2-1/2" Y-Pipes (Dump Legs)
P1074K* cutout set with Y-pipes 550.99 set

25057

USA Stainless Steel Electric Cutout

These cutouts feature a rugged 12 Volt DC motor and rotating gate for a leak proof seal every time the cutout is opened and closed. When fully opened, these cutouts do not create exhaust flow obstructions that can create a leaky gasket sound, unlike butterfly style cutouts. A pre-wired harness with an illuminated rocker switch is supplied for easy installation. Uncork your exhaust with the flip of a switch from your dash. The cutouts are ideal for race tracks that don't require mufflers. Available individually, in pairs, or in complete kits with Y-Pipes for easy installation. Made in USA.

Important: Not recommended for vehicles equipped with catalytic converters.

Electric Exhaust Cutout

Don't crawl under your vehicle to uncork your exhaust ever again by switching to electric cutouts. Keep them closed and quiet for the street, wide open for the strip, or anywhere in between with the flip of a switch. You control the volume and the power! Available in sizes 2-1/4" to 4" and a low profile oval design for applications with limited ground clearance. Fits 2-1/4" to 3" round exhaust pipe. Built with high-quality materials CNC 6061 aluminum body and motor plate, stainless steel shaft and butterfly plate, high torque DC gear driven motor, weather tight wiring connectors, and custom illuminated toggle switch.

Note: Match valve size with cutout size for optimal fit and performance.

J-B Weld SteelStik

J-B Weld SteelStik is a steel reinforced epoxy putty stick. This hand kneadable epoxy adhesive will plug holes and make permanent repairs on wet and dry surfaces. Cures completely submerged in gasoline or under water in 60 minutes. Can be drilled, sanded, filed, tamped, machined and painted. Works on multiple surfaces: aluminum, brass, bronze, copper, iron, and stainless steel. Cure color is dark gray. Made in USA.

JB8267 2 oz. 6.99 ea

Exhaust Components

Xtreme Temperature Coating

XTC is a high temperature/heat resistant coating formulated specifically to protect metal surfaces operating at temperatures from 500 to 1500 degrees F. With proper preparation, XTC provides outstanding adhesion, film integrity, weathering, and thermal shock resistance throughout this entire temperature range, and is guaranteed not to burn off! Available in your choice of a wide variety of colors and sizes.

Note: 8 oz. will coat approximately 3 sets of automotive exhaust manifold with 2 coats or coat a set of short headers with 2 coats. Pints will coat a set of full size headers with 2 coats or coat a complete automotive exhaust system with 2 coats.

Important: When ordering, select the part number for the size of the can you need, then add the two digit numerical color code to the end of the part number to specify your desired color.

Jet Black, Charcoal Metallic, Flame Blue, Cast Iron Gray, or Off-White

Thermo-Sleeve

Thermo-Sleeve is the combination of a high temperature fabric laminated to a highly reflective Mylar foil. It provides protection from radiant heat for hoses and wires. Thermo-Sleeve's ultra lightweight construction provides more insulation than traditional bulky rubber coated fiberglass. The aluminumized sleeve reflects more than 90% of radiant heat, plus it is fireproof and oil resistant! Thermo-Sleeve is available in 3" or 12" lengths.

Exhaust Components

Reduce Underhood Temperatures!

Increased exhaust scavenging is produced, along with lower intake temperatures. Exhaust Insulating Wrap™ withstands continuous heat up to 2000 degrees F, and contains no asbestos. Will not insulate a system when properly installed due to a proprietary coating developed by Thermo-Tec™ Thermal Conduction Technology (TCT) that conducts heat across the wrap's surface. The 1/16" thick wrap is available in 1 inch or 2 inch widths in 15' or 50' rolls. Choose from off-white, graphite black, or carbon fiber.

Reduce Underhood Temps Up to 70%!*

The new quick wrap, high velocity Exhaust Jackets™ are an innovative way to insulate and block radiant heat. The jackets cover the header tubes vertically allowing for a consistent fit. The fit allows the exhaust system to expand as it comes up to operating temperatures without restrictions and provides air space for added insulation. This product uses Thermo Conduction Technology (TCT), developed by Thermo-Tec™, and can be applied with the headers in the vehicle.

This Flexible Heat Shield Clips Into Place!

The Header Manifold Blanket™ provides excellent heat retention for exhaust headers and manifolds. This flexible heat shield simply clips into place on the upper portion of the header. The fabric side of the material should be facing the heat source, and the aluminized side facing away—offering protection from abrasion and harmful liquid spills. The Header Manifold Blanket™ is available in 2 sizes: two 20" by 24" blankets for V6 and V8 applications, and one 36" by 40" blanket for straight 6 and 4 cylinder engines.

Vermiculite Coated Header Wrap

Insultherm Header Wrap is an extremely high temperature resistant wrap used to insulate hot gases in automotive exhausts. Manufactured from texturized fiberglass yarns that are woven into a strong, flexible wrap with vermiculite coating. Resists gasoline and engine chemicals and withstands temperatures up to 1200 degrees F (maximum continuous temperature of 1000 degrees F). Available in black or natural in 50' or 25' rolls.

Shield Plastic or Rubber Hoses and Wiring from Radiant Heat!

Thermo-Shield™ protects hoses and wires from radiant heat. Unprotected, rubber hoses and plastic or rubber insulated wiring can dry out, melt or crack over time. Thermo-Shield™ is used in applications where it is difficult or not practical to disconnect one end of the hose or wire. The adhesive backed composite construction tape can easily be wrapped around the hose or wire to make a clean, professional appearance. Reflects radiant heat up to 2000 degrees F. Provides a barrier against the extreme conditions that underhood components are exposed to. Wrap your fuel lines and say good-bye to vapor lock.
