## 1962-76 Reproduction Radiator

**OE\*** Authorized reproduction radiator for various 1962-76 models. These radiators are manufactured from durable copper materials and are designed to meet the cooling needs of stock small and big block engines. Will install without modifying your radiator support or support top panel. Features 1/2" tubes on 9/16" centers. Available in 3 or 4 rows. Made in USA.

*Note:* Please add (A) to the end of the part number for automatic transmission and (S) for manual transmission. Shipped overze.

## 1963-74 Polished Aluminum Radiator

This polished high-performance radiator is manufactured from TIG welded aircraft grade aluminum with brazed aluminum cores and billet filler necks. Each radiator offers high capacity cooling with lowered fins and 3/8" spacing between core tubes. Designed for direct fit installation. Radiator cap is included.

**Important:** All radiators have built in automatic transmission coolers and can be used in both automatic and manual transmission applications. Core size dimensions listed below.

*Note:* \*Offset inlet. Shipped overze.

# Aluminum Radiators

AR84296NM

AR83295BM

## 1960-76 A, B, & E-Body Direct Fit Aluminum Radiator

This direct fit radiator is exactly what your high-performance Mopar needs. The 100% aluminum construction uses no epoxy, making these radiators durable and up to 15% more efficient than copper/brass radiators. These radiators fit in the original location using the factory fan shroud, and the inlet and outlet are in the stock locations so OE style radiator hoses can be used. Automatic versions feature a built in transmission cooler designed to use factory transmission lines.

Note: Shipped oversize.

## 1963-73 Aluminum Radiators

Aluminum reproduction radiator for various 1963-73 models. These 2 row radiators are manufactured completely from durable aluminum and are designed to meet the cooling needs of high-performance big and small block engines. Will bolt in without modifying your radiator support or support top panel, this radiator offers better heat transfer and is considerably lighter than standard replacement radiators. Made in USA.

Note: Please add to the end of the part number: A = automatic transmission and S = manual transmission. Shipped oversize.

# Radiators

## USA 1960-76 Direct Fit Aluminum Cross Flow Conversion Radiator

Nothing takes the fun out of driving your Mopar like overheating. That's why you need a cooling system that can keep up with your engine, especially when your engine has been upgraded. Stock radiators are designed to cool stock applications and often fail to keep up with high-performance applications. Be Cool produces cross flow radiators that are 40% lighter than conventional OEM units with greater cooling capacity, thanks to epoxy free construction. Available with natural or polished finish, with LH or RH water pump outlet. Made in USA.

**Important:** Modification to upper and lower hoses and transmission lines required for Crossflow upgrade.

**Note:** \*Replaces OEM down flow radiator with a 26" core. Four brackets needed (Part #BC2003) to install stock OEM fan shroud. \*\*Modification to top mounting plate for cross flow conversion may be required.

Shipped overweight.

## 1988-74 Performance Aluminum Radiator

Mishimoto performance radiators for 1968-74 models offer 100% aluminum construction which provides greater heat and pressure tolerance, better heat dissipation, increased durability, improved cooling efficiency, and improved structural rigidity. All radiators feature a 3 row brazed aluminum core with an internal transmission cooler to provide optimal fluid temperatures for automatic transmissions. Each radiator includes a Mishimoto radiator cap, magnetic drain plug, and is backed by a manufacturer's lifetime warranty.

**Important:** Radiators will work with automatic or manual transmission vehicles.

Note: Shipped overseas.

## "Liquid Chill" Engine Coolant and Additive

Mishimoto's Liquid Chill is a universal, synthetic coolant that will provide premium cooling and protection for your vehicle. Liquid Chill protects from boil over to 265 degrees F and from freezing down to -26 degrees F. Inhibits corrosion, and reduces operating temps. Made with propylene glycol base and unique poly organic additives to allow for extended life of 2+ years or 250,000 miles before needing service in gasoline applications. One gallon jugs are available in full strength formula or 50/50 blend. For up to 30 degrees F cooler over just coolant alone, the universal Liquid Chill additive is available in 4 oz. bottles.

MM13066	50/50 mix coolant	47.99 ea
MM13067	additive	17.99 ea

JB2865

## JB Weld Cold Weld

JB Weld is a great alternative to welding, soldering and brazing. This two part system is mixed at a ratio of 1:1, it forms a permanent bond and can be shaped, tapped, filed, sanded, painted and drilled after curing. Cold weld will bond to most clean and dry surfaces and sets in 1-2 hours and will fully cure in 16-24 hours. Waterproof, petroleum, chemical, and acid resistant when fully cured. Non-toxic and temperature resistant up to 600 degrees F. Cure color is dark gray. Made in USA.

JB2865	2 x 1 oz. tubes	9.99 ea
JB2860	2 x 5 oz. tubes	15.99 ea

RP1600

## Super Coolant

Purple Ice is a high-performance, synthetic, radiator coolant additive. It reduces engine heat by reducing the surface tension of the radiator fluids for improved heat transfer. Purple Ice fosters optimum coolant flow by helping to prevent formation of scale deposits in the radiator. Purple Ice is recommended for any water/glycol pressurized cooling system, including those using the traditional green silicate based glycols or the newer OAT or HOAT based glycols.

RP1600	12 oz. bottle	11.99 ea
RP12600	case of 12 - 12 oz. bottles	129.99 ea

## Coolant System Protector

Impurities in well water can cause rust and corrosion inside the radiator, water pump, and cylinder heads. Over time, this can lead to a loss of cooling efficiency. Jes Gibbs Driven Coolant System Protector stops the adverse effect of hard water to help prevent cooling system damage.

JG1330	12 oz. bottle	11.99 ea

60761 3" x 10" ..... 39.99 ea  
60781 3" x 16" ..... 44.99 ea

## Finned Aluminum Overflow Tank

Finish off your cooling system with this vintage style overflow tank. Made from cast aluminum and polished to a show quality finish. Tank holds 24 ounces and measures 13-3/4" tall with a 2-3/4" diameter. Features 1/4" x 20 threaded mounting rib and tapped for a 1/4" NPT inlet fitting.

Note: \* Requires two 1/4"-20 bolts, are not included.  
A9600248 ..... 80.99 set  
A5700218\* ..... 298.99 ea

## Radiator Overflow Can

When your radiator fluid gets too hot, it will flow through your overflow spout and all over your engine bay unless you have an overflow canister for this exact situation. PROFORM's new overflow canisters are anodized billet aluminum with brass fittings to give your engine bay a nice clean look. Canister measures 6-3/4" x 3".

69527 black anodized ..... 119.99 ea  
69528 natural anodized ..... 114.99 ea

## Aluminum Coolant Reservoir Tank

Whether you want to finish off the look of a tracked engine bay, or you just want to replace the dull, stock plastic tank, the aluminum coolant reservoir tank is the perfect solution. Offered as a comprehensive set, complete with a mounting bracket, hardware, and reinforced hose.

MM13083 black ..... 90.99 set  
MM13084 polished ..... 90.99 set  
MM13085 red ..... 90.99 set

## Recovery Tanks

Choose the right recovery tank to complement your cooling system. These proper size billet coolant recovery tanks are recommended and also environmentally safer than an overflow tank.

7" x 3" with Inlet and Mount Bracket  
BC71003 polished finish ..... 159.99 ea  
BC70003 natural finish ..... 149.99 ea

## Finned Aluminum Overflow Tank

Although it's often overlooked, a durable coolant overflow tank is a crucial component of any cooling system. Leaks within the overflow system can result in air entry into your coolant, which ultimately leads to overheating. Upgrade your plastic overflow tank with Mishimoto's universal 1 quart coolant overflow tank. Tank is constructed from durable 3mm thick aluminum, featuring stunning precision TIG welds. In addition, this overflow tank includes a sight tube, which provides an accurate look at your fluid level. This sight tube is removable and can be installed on either end of the tank, which is helpful when installing in a cramped engine compartment.

## Stainless Steel Flex Fan

Flex-a-lite fan blades are designed to flex or flatten out as the RPM's climb, helping to reduce engine drag for better performance and improved fuel economy. Fan features a premium, high tech silver coating that won't degrade or lose its luster in the harsh environment of an engine compartment. Available in standard or reverse rotation along with four different diameters and six blades.

**Important:** Must be used with a Flex-a-lite spacer or warranty will be voided. Fans feature 5/8" pilot hole with a 1-3/4" to 2-1/2" slotted hub pattern.

# Cooling Fans

## High-Performance Electric Fan

These reversible fans help prevent overheating in stop-and-go traffic, designed to fit the most popular cars and trucks, increases gas mileage, improves engine performance, frees the water pump pulley for more RPM, installs in minutes with simple hand tools. 10", 12", 14", and 16" fans are (mount in front or back of radiator). Ultra thin design to fit cramped locations. Reinforced glass filled polypropylene blade and plastic housing for minimized weight. Nylon tie mounting kit included. Nominal fan size is based upon approximate overall assembly diameter. Your choice between a straight or S-blade.

### Straight Blade

## 12" Electric Engine Cooling Fan Kit

Thermostatically controlled, it only operates when forced airflow is required (such as when idling, during stop and go traffic, pulling a load, driving up a grade, etc.). Can be mounted either in front or in back of the radiator. Our kit includes: one 12" fan, thermostat fan control, and all mounting hardware (nothing else to buy).

*Note: Requires S-1/4" clearance between radiator and water pump shaft for belt drive. For extreme use, add a second fan (fan control will operate up to 2 electric fans).*

## High-Performance Electric Fan

Your stock fan robs your engine of up to 15% or more horsepower! Replace it with a rugged, quieter than straight blade, universal fit S-blade fan equipped with an adjustable 160-240 F degree thermostat. Bolts to your radiator supports using sturdy brackets. With a heavy-duty motor, and 15" diameter, this unit pulls up to 2,800 cfm of air. Amp draw, 14 amps. Mounting hardware and wiring included.

67029	18" x 16-1/8" x 4-1/4"	184.99 ea
-------	------------------------	-----------

## Black Magic S-Blade

This universal fit Flex-a-lite electric fan features computer engineered blades that are extremely quiet and efficient, and moves 3000 cfm of air to provide consistent cooling, regardless of engine RPM. This electric fan fits vehicles with 16" or wider radiator cores, and requires a mounting surface of 18" x 16" x 4-1/4" for an easy, bolt-in installation. Universal mounting brackets are included.

FL160	344.99 ea
-------	-----------

## Fan Switch

SPAL replacement temperature fan switch. Manufactured from stainless steel, hermetically sealed and feature a 3/8" NPT. Operating switch range 35 degrees F to 480 degrees F and max current/voltage 3 amp, 32 VDC and grounded case only.

*Note: \*Turns fan on 185 degrees/ off at 165 degrees.*

## Brushless Electric Fan Powerpacks

Derale brushless powerpacks provide the best performance when it comes to cooling performance for your engine. Derale's new, high performing brushless fans with integrated fan controller, combined with their high performing shrouds is a combination that just can't be beat. These units feature a fully welded aluminum shroud measuring only 2-13/16" in depth and combined with the installed electric fan, the overall thickness is only 3-1/2". The dual 12" brushless electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4400 cfm. Don't forget they also have the built-in PWM fan controller with soft start technology. The controller utilizes pulse width modulation to constantly adjust electric fan speeds from 0-100% to maintain temperature. This allows electric fans to operate at the percentage needed, instead of 100% all the time. This results in extra longevity, increasing component life and eliminating amperage spikes.

## Electric Dual Fan & Shroud Powerpack

This Derale dual high output RAD Fan powerpack assembly is part of the HO aluminum shrouded fan series that is designed with the application in mind. Based on some of the most common radiator core sizes sold today, this unit features an aluminum shroud and is only 4" in overall depth to offer an adjustable yet precision fit. The natural, non-finished aluminum shroud gives the user the freedom to polish, anodize, paint, or simply leave it raw to create a truly custom look for an affordable price. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up. Offering a total of 4000 cfm, this dual electric fan assembly generates the most real world airflow in the smallest package on the market. Now add the digital PWM fan controller with built-in soft start technology. The controller utilizes pulse width modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature.

## Electric Dual Fan & Shroud Powerpack

Get complete control of your engine temperature! Derafe Performance has combined their high performing shrouded powerpack with the ultimate fan controller. Using high output electric fans incorporated into an engineered shroud, this powerpack can conquer even the most difficult cooling conditions. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4000 cfm. Now add the digital PWM fan controller with built-in soft start technology. The controller utilizes pulse width modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature. Features a laser cut powder coated steel shroud measuring 26" wide by 18" top to bottom and is only 4" in overall depth.

### Dual 12" Fans - Steel Shroud

- With Derafe PWM Controller (#16797) 66927 26" x 18" ..... 565.99 set
- Without PWM Controller 16927 26" x 18" ..... 359.99 ea

## HO 2-Speed Electric Fan Assembly

### HO 2-Speed Electric Fan Assembly

Derafe's most compact version of the high output single RAD fan series, this fan is a self-shrouded, symmetrical design with 4 molded mounting points. Motivated by a 2-SPEED 265 watt Bosch motor driving 11 patented skewed blades, each includes a patented ratchet mounting system for a professional installation. Can be used as a pusher or puller fan by simply flipping brackets without changing direction of the unit.

- 11 Skewed Blades - Overall Depth: 2-5/8" 16212 12" 1450/1000 cfm ..... 149.99 ea
- 16214 14" 2100/1500 cfm ..... 156.99 ea
- 16217 14" 2400/1800 cfm ..... 174.99 ea

## HO Extreme Electric Fan Assembly

Derafe performance high output extreme electric fan assemblies. These fans are Derafe's most powerful single speed units and provide a low profile for limited space applications. Using a sealed IP68 certified (waterproof and dustproof) motor that lasts up to 3 times longer than normal electric fan motors, this puller fan is designed to provide maximum performance at high static pressure loads. Mounting kit and installation instructions included.

- 10 Straight Blades - Puller 16108 8" 366 CFM 2" deep ..... 93.99 ea
- 5 Paddle Blades - Puller 16119 9" 755 CFM 3-3/4" deep ..... 155.99 ea

- 7 Curved Blades - Puller 16136 16" 1918 CFM 3-3/4" deep ..... 174.99 ea

## 16" Fan Mounting Gasket

SPAL fan gasket is a specifically designed rubber gasket for use exclusively with the 16" fan line. The gasket provides an additional 1/4" clearance from the cooler core and is ideal for mounting our pusher style fans. Note: Will not fit SP2056 and SP2057.

- SP2070 16" ..... 16.99 ea

## Cooling System Zinc Anode

Used in heavy-duty and marine applications to protect the cooling systems and its many components from damage due to electrolysis or coolant additive failure/breakdown. The introduction of the zinc anode will protect your cooling system from galvanic action as it "eats" the zinc rather than your cooling system. To be installed in the radiator as a replacement for the drain petcock in radiators that are equipped with a 1/4" NPT hole or any 1/4" NPT hole that is available in the cooling system.

- FL32060 ..... 14.99 ea

## Fan Temperature Sending Unit

The temperature sending unit screws into the side of the cylinder head or on the intake manifold to operate the Champion or Challenger Series fans.

- MF108 185° for carbureted engines ..... 24.99 ea
- MF109 195° for fuel injection engines ..... 24.99 ea

## Temperature Sending Wire Cloth Insulator

This 3/16" I.D., 5/16" o.d. replacement cloth insulator, keeps your temperature sender harness well insulated from engine heat. Sold per foot. 2-3 feet required per vehicle.

- K0163 ..... 2.49 ft

## Rubber Fan Spacers

Rubber spacers are used with Champion Series electric fans for proper spacing from the radiator.

- MF112 ..... 5.99 set

## Electric Fan or Oil Cooler Mounting Set

These sturdy nylon electric fan and transmission cooler installation sets include 4 plastic rods, 4 retaining clips, and 4 foam mounting pads to provide a solid trouble-free and installation friendly method of securing an electric fan, transmission or engine oil cooler to any vehicle.

- 13001 4 rods with retainers ..... 5.99 set

AC, HEATER & COOLING SYSTEM

# Cooling Fans

## Universal Fan Mounting Bracket

SPAL universal fan mounting bracket. It can be used with most aftermarket and OEM radiator types. It is adjustable and features a black powder coated finish. Includes 1 metal strap bracket and 1 plastic foot. Requires 4 for proper installation.

SP2072 ..... 2.99 ea

## Plastic Mounting Bracket

SPAL plastic fan mounting foot bracket. Four mounting brackets are required to complete proper installation. Sold individually. Available in either flat or raised design.

SP2073 flat ..... .99 ea  
SP2074 raised ..... .99 ea

## Fan Bracket Strip Set

This bracket set is used to mount your Champion or Challenger Series fan. Install the fan's 90 degree mounting feet (included with fan) to these four 7-1/4" long strips for solid support. Mounting hardware is included.

MF104 universal fan bracket strips ..... 23.99 set

## Billet Aluminum Fan Brackets

Use this premium billet aluminum bracket set to mount your 14" or 16" Champion or Challenger Series fan. The set features 4 adjustable side angle brackets that attach to the side flange of the radiator. Mounting hardware is included.

MF105 billet aluminum fan brackets ..... 55.99 set

## Universal Fan Mounting Rod

SPAL universal mounting rod brackets attach directly to the fan shroud. Manufactured from lightweight steel and plastic. Includes mounting clip, 4 required for proper installation.

New!

## Electric Fan Mounting Bracket Set

This universal mounting bracket set allows rigid mounting of any electric fan to a vehicles radiator or core support and features 4 bendable metal brackets that are 7" long x 1" wide and have multiple holes for a wide variety of mounting options. Set includes sheet metal screws, Hex bolts, washers and nuts.

13062 bracket set ..... 6.99 set

New!

## Adjustable Electric Fan Controller

This Deraile high amperage fan controller breaks new ground in the industry of electric fan controllers. A bulletproof design, 35 amp per fan amperage rating, adjustability from 150-240 degrees F, and a die-cast bright finish aluminum cover. It's capable of controlling two separate 35 amp fans at different turn-on temperatures, with only a single probe. The first electric fan will be activated at the temperature set by the user followed by the second electric fan when the temperature becomes 10 degrees F warmer. Each electric fan will turn off at 10 degrees F below its turn-on temperature. Kit includes: wiring harness, fusible link, all necessary electrical connectors, and push-in style radiator probe

## Multi-Fan Controller with Soft Start Technology

Now add the Deraile Performance digital PWM fan controller with built-in soft start technology. The controller utilizes pulse width modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature. This multi-fan controller has a built-in AC over ride circuit and is designed to control as many 12 Volt brushed electric fans as desired, up to 70 amps combined. Even better, installation and calibration is a snap. It simply wires in-between your vehicle's battery and electric fans.

16797 Digital PWM controller ..... 229.99 ea

## Adjustable Fan Temperature Sensor

Turn your electric fan on at whatever your desired temperature is with this adjustable temperature sensor. Sensor adjusts from 180-240 degrees F and helps prevent overheating in performance vehicles when driving at low speeds or when idling for long periods.

346932 180-240 degrees F ..... 109.99 ea

## Electric Fan Controllers

These sets are designed to operate Champion or Challenger Series electric fans. Includes: a heavy gauge wire harness, relay, weatherproof fuse, and electrical connectors.

## Fan Controller Set

The Mishimoto fan controller set is applicable to any 12V electric fan and includes all necessary components for installation. Features adjustable activation from 150-240 degrees F and deactivates once temperatures are reduced by 10 degrees F. This controller includes a built-in AC override feature and is designed for use with 1-2 electric fans drawing a combined 25 amps or less.

153522 probe wire ..... 75.99 set

## Electric Fan Controller

Turn your electric fan into a thermostat controlled fan! PROFORM's premium adjustable fan controller make this easy! The thread-in probe can be installed directly into the water jacket of the intake manifold, engine block, or cylinder head. The push-in probe can be installed between the fins of the radiator. Fan activation is adjustable between 150 and 240 degrees F. This fan controller is recommended for race and street applications.

69598 thread-in probe sensor..... 47.99 ea

69599 push-in probe sensor..... 53.99 ea

## Variable Speed Fan Controller

Turns your electric fan on and off at your desired temperature. The control is right where it belongs, in your hands! Fans turn on at 60 percent power and fan speed increases as the temperature rises. You can easily adjust the activation temperature between approximately 160-240 degrees F. The fan controller includes a 1/8" NPT thread-in temperature sensor with bushing adapter. It features variable fan speed and a 40 amp rating. It works on 12 Volt systems only.

FN4001 with temp sending unit..... 148.99 ea

**New!**

## Electric Fan Controller

Includes a 70 amp relay and will work with your existing water temperature gauge, operating from the temperature sending unit already installed. A dedicated sending unit can be installed for applications without a water temperature gauge. Operating range of 150-250 degrees F and features fully programmable "fan on" and "fan off" temperature functions to suit any application. This also gives you the capability to leave the electric fan operating after the engine has been shut down for a user adjustable period of time. High-quality LED readout displays current temperature readings.

**Important:** Must use second relay, either part #DD2701 30 amp relay or #DD2702 70 amp relay for dual fan or 2-speed fan operation.

**Note:** It is recommended that the compact box be mounted inside the vehicle or alternate dry environment.

## Single Fan Pigtail Connector

Single male fan pigtail connector for Northern or SPAL single fans. Required when not using Northern relay harness.

**Note:** This some pigtail is included on Northern relay harnesses. Use part #40080 for Northern relay harness.

Z40079 pigtail connector..... 9.99 ea

## Fan Harness Set

SPAL wiring harness sets are a must-have when installing an electric fan. Designed to safely integrate with OEM wiring harness. Feature a waterproof 40 amp relay, fuseless steel switch with optional switched override capability along with printed wires which aid in installation. Thermostatic, fuse holder, connectors 1/2" adapter, and instructions are included.

SP2068 185 degrees harness..... 118.99 set

SP2069 195 degrees harness..... 125.99 set

**New!**

## Electric Fan Wiring Harness

Dual fan wiring harness with the proper gauge and color coordinated wire, temperature sending unit, waterproof 40 amp relays and 30 amp fuse with holder. Includes installation guide and detailed diagrams. Can be used on any positive or negative 12 Volt DC vehicle with no modifications.

75095 harness..... 39.99 ea

**New!**

## Electric Fan Relay Wiring Kit

Cold Case electric fan wiring kit for single or dual electric cooling fans. Includes thermostatic switch that turns on the fan(s) at 190 degrees F and turns them off at 170 degrees F. Operates single or dual fan setups. Includes: 12' wiring, thermostatic switch, weather resistant relay, and fan pigtail connectors.

CC46179 with thermostatic switch..... 96.99 ea

**New!**

## Universal Electric Fan Relay Wiring Kit

Lock down superior cooling and eliminate bothersome noise and vibration with a Champion Cooling electric fan relay kit. Featuring heavy-duty, 1 piece construction with a permanent magnet motor and computer balanced, reversible swept blades, this top-of-the-line kit enables you to run your fan as a puller or pusher. 1-year warranty.

## 1970-80 HVAC Electrical Connector

Reproduction 2 terminal wiring connector with pigtail to fit a variety of applications. Plastic housing includes a short pigtail that can be spliced into harness for a factory appearance. Perfect solution to replace cracked, broken, melted or missing connectors.

A17690 1970-80..... 7.99 ea

## "Ice Box" Cooling Fan Control

This Ice Box cooling fan control setup from Ron Francis Wiring is a dual fan control can operate two fans at different temperatures or a single two speed fan at different temperatures. Adjustable operating range of approximately 140 to 23 degree F with their exclusive lug sensor that mounts under almost any engine bolt. A creative solution to reduce electrical surges on your alternator and engine. Works with or without AC request. Fan control comes complete with heavy gauge crosslinked wire heavy enough to carry the load of the cooling fans.

**Note:** With Walker 2-speed fans.

FP900635 dual control..... 169.99 ea

**RON FRANCIS**

## Delayed Cooling System Shutdown

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

FP900632..... 169.99 ea

**RON FRANCIS**

## Cooling Fan Shutdown

This cooling fan shutdown set shuts down your electric cooling fan above 50-60 MPH to improve engine cooling by preventing the electric fan from fighting airflow through the radiator at highway speeds. The unit is adjustable and may be overridden by using the supplied dash mounted toggle switch. This set is designed to be used with the supplied signal generator which must be installed into the speedometer cable.

## Flexible Stainless Steel Hose Set

This is an ideal replacement for your worn or rotted hoses. Non-corrosive construction conforms to tight bends and holds shape indefinitely. Rated for high temperatures and high pressure. Can be easily cut to custom lengths. These high-quality sets will enhance any engine compartment.

Note: 48" radiator hose set has double quantity of end caps, sleeves, reducers, and clamps. Save money and make both upper and lower radiator hoses with one 48" set.

Emissions Note: Ⓢ Non-CARB compliant (not legal for emission controlled vehicles).

## 1966-74 Hose Clamp Set

Hose clamp sets for all 1966-74 small block, big block, and Hemi models. This set features correct spring clamps and each set includes 4 radiator clamps and 4 heater hose clamps.

MD2221	1966-69	small block	14.99 set
MD2222	1970	small block	15.99 set
MD2223	1971-74	small block	15.99 set
MD2218	1966-69	Hemi/big block	9.99 set
MD2219	1970	Hemi/big block	17.99 set
MD2220	1971-74	Hemi/big block	14.99 set

## Radiator Hose Adapter Set

Set includes 3 adapters and 2 hose clamps. Includes: one 1-1/4" reducer, one 1-1/2" reducer, one 1-3/4" reducer, and two stainless hose clamps.

S7317	adapter set	15.99 set
-------	-------------	-----------

## 1966-74 Heater Hose Tie Strap

Heater hose tie strap for all 1966-76 models. This strap has various purposes, most commonly used to hold the heater hoses together. Manufactured from correct gauge aluminum for an original appearance. Made in USA.

MD2234	1966-76	5.99 ea
--------	---------	---------

## Hose Clamp Pliers

This handy tool removes and installs spring tension hose clamps used on heater and radiator hoses. Adjustable tips screw in and out to fit clamps of all sizes. Ratcheting lever mechanism holds the clamp in an open position for easy removal and installation. Tips can be switched to accommodate different applications. Offset jaws allow access in hard to reach areas.

## 1960-76 New Water Pump

This 100% new water pump actually performs better and lasts longer than remanufactured or OE water pumps because they're "engineered with insight". Based on over 40 years of making the highest quality remanufactured parts, we've seen where and why new parts fail and we built in solutions to avoid traditional design flaws. Developed with advanced 3D modeling and design software tools to deliver dimensional precision up to 0.005mm. Unitized seals produced with superior materials that drastically enhance operating life. Bearing type and materials meet or exceed original specifications. Applications are not over consolidated, thus preserving the proper appearance and performance of the pump.

Note: \*High-performance.

## Water Pump Pulley Warning

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys.

- Condenser
- Idler Pulleys
- Compressor Hoses
- Thermostat
- Expansion Valve
- All Mounting Hardware

## 1968-74 B & E-Body Engine Compartment AC Upgrade Set

This set has everything you need to upgrade to modern R134a – just add refrigerant! This system works with stock evaporator and interior AC components while replacing your original, power robbing RV2 compressor with a light, efficient Sanden style compressor rated for continuous duty at 6000 RPM! Includes: condenser, compressor, mounting brackets, idler pulleys, all hoses/lines, thermostat, expansion valve, o-rings, hardware, refrigerant tape, and filter dryer. Compatible with R134a.

**Important:** For factory AC applications with original pulleys. Not for 6 Pack or Shaker engines.

**Note:** \*Top condenser fitting points up. †Top condenser fitting points to side. Special order, must be prepaid. Shipped overweight.

## Sanden Style "Peanut" AC Compressor

New, not rebuilt. Sanden SD706/SD7B10 "Peanut" style air conditioning compressors. The compact SD7B10 is becoming one of the most popular compressors for original equipment manufacturers or aftermarket. SD706s rob less horsepower resulting in improved fuel economy and increased performance. They feature a modern rotary internals that reduces noise and vibration. Their extremely compact design is half the weight and bulk of most OE units. With mounting ears on the front and rear and on both sides, these compressors are very easily adapted to most engines.

## AC Hose Bubble Crimper Tool Set

When you need to fabricate hoses with special lengths, this crimping set gets the job done at home with professional results. Includes: the crimping, crimping dies #8 (3/8"), #8 (1/2"), #10 (5/8"), #12 (3/4") fittings and an easy storage plastic carrying case.

K2469 ..... 338.99 set

## 1966-76 AC Condenser

The condenser, along with the evaporator, is a fundamental part of the AC system. Over time, condensers develop leaks and are damaged by road debris, reducing their efficiency. These OE style tube and fin design condensers modern parallel flow condensers are both designed as direct replacements for the original to keep your AC blowing cold.

**Note:** High efficiency parallel flow.
