

Headlamp Components

color options for multi-color halos

without halo ring with turn signals Black Illusion multi-color halo kit shown

1964-73 Round Headlamps with LED Halo **New!**

RedLine Lumtronix headlamps allow 50% more light to shine through thanks to their crystal clear lenses and a special side lens that extends past the retaining ring. This side lens is a safety innovation and was designed to provide additional side light and increased visibility. Each headlamp features a Euro style diamond cut reflective base, diamond crystal glass, and a heat resistant composite housing. Even though no paint or tint is applied to the glass or reflector, the Black Illusion headlamps look blacked out when off thanks to the halo and lamp shields that are painted black. Headlamps are available with or without a halo, either single color halo (white) or multi-color halo (with 16 selectable colors plus the ability to adjust brightness), with or without turn signals and your choice of clear or blue H4 Halogen bulbs or H4 LED bulbs. The halo or "Angel Eyes" can also be wired as a daytime running lamp and features 23 low temp LEDs with a 100,000+ hour life, along with "fade", "flash", "strobe", and "smooth" modes that you can choose with the included wireless remote. Headlamps plug directly into your stock harness for a simple and easy installation. Each pair includes: 2 headlamps, 2 bulbs, dust boots, ceramic pigtail harness adapter and instructions. Multi-color halo sets also include the RGB harness and wireless remote.

Important: Will fit most vehicles made from 1936 to 1979, as well as many vehicles made after 1979 that use a universal round style headlight.

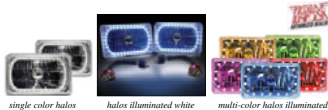

Note: Blue Halogen bulbs are blue in color when off, and bright white when on (no blue tint). Clear Halogen bulbs are clear in color when off and bright white when on. LED bulbs include colored film to change the look and temperature color of your lights.

1979-88 Rectangular Headlamps with LED Halo **!**

RedLine LumTronix headlamps allow 50% more light to shine through thanks to their crystal clear lenses and a special side lens that extends past the retaining ring. This side lens is a true safety innovation and was designed to provide additional side light and increase visibility. Each headlamp features a Euro style diamond cut reflective base, diamond crystal glass, and a heat resistant composite housing. Headlamps are available with either a single color halo (white) or multi-color halo (with 16 selectable colors plus the ability to adjust brightness), and blue H4 Halogen bulbs. The halo or "Angel Eyes" can also be wired as a daytime running lamp and features 23 low temp LEDs with a 100,000+ hour life, along with "fade", "flash", "strobe", and "smooth" modes that you can choose with the included wireless remote. Headlamps plug directly into your stock harness for a simple and easy installation. Each pair includes: two headlamps, two bulbs, dust boots, ceramic pigtail harness adapter, and instructions. Multi-color halo sets also include the RGB harness and wireless remote.

Important: Will fit most vehicles that use a universal rectangular style headlight.
Note: Blue Halogen bulbs are blue in color when off, and bright white when on (no blue tint).

1965-73 H4 LED Headlight Bulbs **!**

Upgrade your stock Halogen bulbs with a pair of premium LED headlight bulbs from RedLine Lumtronix. With a 50,000-hour lifespan, you won't have to change the bulbs as frequently, meaning you'll spend more time on the road than in the garage. Each bulb is 300% brighter than your stock Halogen bulbs as well as a direct fit. "Plug and Play" upgrade that requires no modification to your electrical wiring. LED bulbs include colored film to change the look and temperature color of your lights.

LED Projector Headlamps

Dapper Lighting LED projector headlamps provide a classic look while substantially upgrading the quality and luminosity of your lights. The design features glass lenses, Bi-LED projectors, and a slim flat base. These features eliminate the wiring and bucket modifications associated with HID conversions while offering quick and easy installation. Bringing a significant increase in performance, reliability, and safety to your classic Mustang. Choose from original or new style, chrome or black bezel, with or without halos, and OE style or clear style glass. The modern halo has noticeable breaks in the LED ring, where the classic and HDR do not. The HDR halo is the brightest and smoothest looking option of the three. 5-3/4" modern style lights are offered in square shape only.

Note: *Switchback turn signal changes white day time running lights to deep amber when turn signal is activated.

Projector Headlamps

Projector headlamps embody the classic look while substantially upgrading the quality and spread of light. The unique hi-low switch design provides a clean and safe light cutoff design, eliminating the issue of "headlight glaring" on the roads. Each unit features a Bi-Xenon projector (high and low beams) with adjustable light focus and flat light distribution to prevent blinding of oncoming traffic. Available with a traditional chrome housing or with a black housing. Bulbs and wiring is included.

CP2001 amber LED..... 289.99 ea

5-3/4" High-Performance Xenon Lamp Kit

50% brighter than Halogen, yet street legal, Xenon bulbs are included. High-quality construction and lead crystal lens. Classic 5-3/4" universal Xenon low and high beam headlight set for quad lighting on your 1969 Mustang. Perfect for restoration, muscle cars and hot rods. The lead crystal glass lens does not oxidize (become hazy or accumulate film) like plastic lenses. Added lead enhances glass strength. Prismatic lens provides superior photo-metric light distribution. Four time finished vacuum metalized steel reflectors improve reflection 4-to-1 next to stock. Bulb assembly protected by high density silicone rubber boot with venting to guard against dirt and moisture. Included in each set are: 2 headlight assemblies, 2 H4 Xenon Bulbs (60/55W), and 2 rubber boots. The high beam sets also include 2 H4/ H1 (H5001) pigtail adapters.

PAINTLESS

Universal Integrated Turn Signal Set

A common problem faced by rodders and kit car builders is where to mount turn signals since many aftermarket steering columns are not designed to accommodate the necessary wiring and switches. Problem solved, with this new integrated turn signal set from Paintless. The toggle switches for both turn signals and flashers can be mounted anywhere. Because the set is designed to be an integrated system, turn signals will work in conjunction with brake lamps.

30120 111.99 set

1964-66 Park Lamp Wire Grommets

Replacement parking lamp grommets install into the front fender apron on both sides. This helps protect the wiring from getting damaged on sharp sheet metal edges. Sold in pairs.

1967-68 Stone Guard Mounting Brackets

Reproduction of the original 1967-68 Mustang stone guard bracket constructed from stamped steel and supports the upper stone guard. Will install onto the radiator support and front valance and helps protect the Mustangs engine bay from road debris. Features EDP coating for rust resistance.

17747B	1967-68	3 piece set	34.99 set
--------	---------	-------------	-----------

OEZ AUTHORIZED

1964-73 Front Lower Valance

Reproduction of the front lower valance panel for 1964-73 Mustang models features authentic contours, appearance and original mounting points. Includes appropriate cutouts for bumper brackets, turn signals, and license plate mounts. Manufactured in heavy gauge stamped steel, each panel replicated the original in every detail. Comes EDP coated for rust prevention. Ready to prime and paint.

Note: Shipped oversize.

1964-66 Front Racing Aprons

Reproduction of the front racing apron/valance panel for 1964-66 Mustang models without a front bumper. Fiberglass racing apron includes 2 cooling holes only, no holes for parking lamps. Used without bumper. All fiberglass parts require special preparation and fitting. In some cases modification to car and/or part may be required. Made in USA.

Note: These racing aprons eliminate the front bumper.

1967 Shelby Front Nose Panel

Includes studs, but are not mounted. This will bolt on to a Shelby GT350/GT500 only. This panel will fit Mustang to Shelby clothes with the use of Shelby hood and support brackets. This is required due to the fact that the Shelby nose extends about 4" longer than a regular Mustang. All fiberglass parts require special preparation and fitting. In some cases modification to fiberglass parts may be required. Professional installation is required.

Note: Shipped truck freight.

Front Bumpers/Bumper Covers

1975-78 Fiberglass Front Valance

Replacement front valance for 1975-78 Mustang II models. The front valance shipped standard on all Mustang II's and was located beneath the bumper. Each valance mounted directly to the front edge of the fenders and was attached to thick hangers on either side of the radiator. The chin spoiler (if equipped) attaches to the underside edge of the valance. Manufactured in fiberglass to factory specifications. Made in USA.

Important: Correct valance for 1975-78 models which can also be used on a 1974. The 1974 model valance was different as it did not have to accommodate a front chin spoiler.

Note: Some drilling may be required for installation. Shipped double oversize.

FM291008 - installed

1974-78 R-Apron Fiberglass Front Bumper

Give your 1974-78 Mustang II race inspired styling with a fiberglass R-Apron front bumper. Inspired by the 1965 GT350R, this apron features a wide opening in the front to ensure maximum airflow to your radiator or intercooler. The R-Apron attaches to the flat part at the front of the fenders just like the header panel. The middle opening is made a little longer to accommodate all years, even 1974, but can be trimmed down if it interferes with the radiator. Stock bumper assembly and front valance will need to be removed. This R-Apron replaces both. Made in USA.

Note: Drilling required. Shipped double oversize.

1974-78 Fiberglass Front Bumper

Fiberglass front bumpers offer the ultimate in lightweight durability while retaining an original appearance. Bumpers with OE trim will be able to retain the OE bumper trim, while the trim delete bumpers offer a smooth, custom look. Available in 2 versions, skin or bolt-on. The skin is a fiberglass bumper skin only and will require fabrication to bond directly to the stock brace. The bolt-on bumper has mounting studs bonded to the bumper, and attaches directly to the stock brace. Made in USA.

Note: There is a seam on each end where the mold bolts together, requires light sanding and filler to set ready for paint. Shipped double oversize.

1974-78 Mid-Tucked Fiberglass Front Bumper

Give your 1974-78 Mustang II exterior a sleek upgrade with these new mid-tucked fiberglass front bumpers. Each bumper still looks similar to stock, but is actually shaved back about 3-1/2" for a clean, custom look. This design allows you to keep the stock cross brace and bumper shocks, they just need to be relocated back 3-1/2" on the frame (as simple as drilling 2 holes). Bumpers with stock trim will be able to retain the stock bumper trim, while the trim delete bumpers offer a smooth, custom look. Available in 2 versions, bolt-on or skin. The bolt-on bumper has mounting studs bonded to the bumper, and attaches directly to the stock brace. The skin is a fiberglass bumper skin only and will require fabrication to bond directly to the stock brace. Made in USA.

Note: Shipped double oversize.

1999-04 Stalker Rear Bumper

The Stalker rear bumper by Cervini's will create sporty new lines and make your 1999-04 Mustang model stand out from the crowd. This bolt-on bumper features a free air design which tucks tightly to the gas tank, preventing wind drag. "Stalker" is embossed in the bumper and there are provisions for dual exhaust. Bumper comes unfinished, should be test fitted, prepped, and painted prior to installation. Constructed of urethane and bolts to all factory locations. Includes installation hardware.

Monroe Handler 7 Piece Wide Body Set

Built by Monroe Shocks and Hot Rod magazine in Hot Rod's 1977 June, July, and August issues, the original Monroe Handler was designed to showcase Monroe's new Handler line of shocks. This one-off production featured an upgraded exterior with steel IMSA style fenders and other enhancements that drastically changed the look of the Mustang II. Highly desired ever since, you now have a chance to recreate this one of a kind vehicle with our Monroe Handler 7 piece wide body set. Manufactured from fiberglass with a smooth gel coat finish, each set includes the front nose, left and right front fenders, left and right rear quarter panels, rear roll pan, and rear spoiler. Available as a 7 piece set or sold individually as well. Made in USA.

Important: Fits hatchback models only. Does not fit coupes. Gel coat finish will either be black or white.

*Rear roll pan is smooth.
*Note: Drop ship. Parts are made to order. Please allow 4-6 weeks for delivery. Shipped truck freight.

1987-93 Cobra Ground Effects Set

Upgrade the look of your 1987-93 Mustang GT with a Cervini's Cobra ground effects set. In 1993, Ford's Special Vehicle Team launched a new version of the popular Fox body Mustang, with improved power, handling, and styling. Now Mustang GT owners show off their tailpipes and clean up their body lines with a Cobra kit, made with OEM grade urethane for better fitment and durability. Cobra conversion sets include: cobra grill insert with pony emblem, front fender extensions, side skirts, and rear bumper cover. The entire set installs to all factory locations.

Note: Mustang LX models require a GT front bumper and GT door moldings. Shipped oversize.

1975-78 Cobra II Front Spoiler

Replacement front chin spoiler for the 1975-78 Cobra II models. The front spoiler attaches to the underside edge of the front valance and was originally part of the Cobra II package. This spoiler will also fit 1974-78 Mustang II's looking to add a little more style. Manufactured in fiberglass, each spoiler is made to factory specifications and will bolt on just like the original. Made in USA.

Important: 1974 models were not originally equipped with a front chin spoiler and therefore will require the use of a 1975-78 front valance to work.

Note: Drilling required. Mounting hardware not included.

Important Information Before Attempting to Install Sheet Metal!

Regarding Minor Imperfections in Panels:

The sheet metal you receive may have scratches, dings, small dents and other minor imperfections which are considered normal sheet metal characteristics due to the nature of the product. These minor imperfections will be easily corrected during the filling, priming and sanding phase of your sheet metal installation. Classic Industries® does not consider dings, scratches, minor dents or other imperfections on the sheet metal to be defects in the panel nor are they considered damaged. All sheet metal panels will require some sort of preparation and manipulation during installation. Every panel that we sell is inspected and then carefully packaged to protect against damage that may occur during transit.

Test Fit All Panels Prior to Paint and Installation:

Classic Industries® recommends test fitting all sheet metal panels prior to final paint and installation. Minor modifications including elongating mounting holes, adding additional shims, etc. are normal and may be necessary when installing sheet metal. It is important to note that hard driving conditions, like racing, can twist bodies and frames out of original tolerances. Poor body work from previous collisions can cause problems with the body structure that the panels are attached to. Some vehicles were manufactured with a unitized body (no frame) thus causing even the most minor accident to twist the body creating a situation that would cause sheet metal misalignments. Take into consideration that tolerances on classic vehicles are not nearly as exact as they are on modern vehicles. This is primarily due to the hand fitting of panels at the factory on most antique and classic cars as opposed to the robotics used in today's modern factories. All of these factors will affect the way your new reproduction sheet metal will install and fit on the car. There is really no such thing as a direct fit body panel when it comes to older vehicles.

Returns and Defects:

Prior to returning any defective body panel or sheet metal item to Classic Industries®, please contact our customer service department. Classic Industries® will not replace a panel, nor will we be responsible for freight on returns should it be deemed that the panel is not defective. See policies for more information.

For Best Results, Hire a Professional to Install the Panels:

Classic Industries® recommends that you hire a professional paint and body technician that has the skills, knowledge and experience necessary to install the new panels on your vehicle. A professional body technician will be able to prepare the panels for installation and repair any imperfections.

When Welding Sheet Metal Products . . .

Save time when replacing sheet metal by using Classic Industries® new, innovative "Weld-Thru™" primed sheet metal products. Our all new coating process is designed to eliminate the unnecessary process of grinding or sanding the EDP coating off to ensure a solid and rust free weld. This "Weld-Thru™" primer requires minimal preparation and eliminates corrosion problems between overlapped panels and layered spot welds. It also minimizes heat zone problems, reduces panel distortion, and allows better penetration into the dense replacement steel to compensate for the older metal's impurities. Look for the "Weld-Thru™" logo when purchasing sheet metal products to save time during installation of weld-on sheet metal repair panels.

Some Guidelines on EDP Coating

Many sheet metal products are delivered with a black electrochemically deposited coating (EDP, or E-coat) for superior long-term corrosion protection, while others use a similar lacquer-based coating designed to provide protection for storage and shipping. Before panel installation, Classic Industries® recommends applying lacquer thinner with a shop towel to determine the type of coating. If the coating is removed by lacquer thinner, then it should be completely stripped from the product before any primer or paint is applied. If the lacquer thinner does not remove the EDP coating, it can simply be prepped, primed and painted without stripping.

Classic Industries® The Restorer's Choice™

Count on the Classic Industries® Restorer's Choice™ symbol whenever purchasing reproduction parts and accessories. You can be sure that each and every product displaying this symbol is manufactured correctly to exact specifications and fits the way the factory intended. Products denoted throughout the catalog with this symbol are officially approved by Classic Industries® as a genuine restoration product. Look for the Restorer's Choice™ logo. The Classic Industries® symbol is your assurance of quality.

Made in USA

Look for the "Made in USA" logo for products that are proudly manufactured in the United States.

USA 1975-78 Fiberglass Hood

Fiberglass hoods for 1975-78 Mustang II models. The top side of the hood features a smooth gel coat finish. Bolt-on hoods feature the inner hood structure underneath and use the stock hinges in the rear, requiring hood pins for the front. Pin on hoods do not use hinges and will require hood pins for the front and rear. Pin-on hoods have no inner structure. Hood pins sold separately. Made in USA.

Important: Hood pins required. No provisions for hood latch.
Note: *Ram air hoods have closed ports.

1965-66 Shelby Style Hood Scoop

Make your stock hood look like a 1965-66 Shelby with a "bolt-on" or "bond-on" Shelby style GT 350 hood scoop. This hood scoop is a great replacement for your original Shelby GT350 hood scoop or as an upgrade for your 1964-66 Mustang. The mounting location is 2" from the rear edge of the hood. This fiberglass piece will require prepping, priming and painting prior to installation. The "bolt-on" installation requires drilling 8 holes into the hood to mount to molded studs. The "bond-on" installation will require professional installation by bonding or riveting the scoop to the hood.

Note: All fiberglass parts require special preparation and fitting. Purchaser assumes all responsibility for correct installation.

1965-66 GT350 Hood Scoop Stamped Steel

Add the authentic look of a Shelby GT350 hood scoop to any 1965-66 Mustang model with this new stamped steel GT350 style hood scoop. This perfectly contoured hood scoop design is an exact replica of the original GT350 hood scoop. Each stamping is made on new tooling that was created using a digital scan taken from an extremely rare 1966 GT350 all steel hood. The new scoop can be brazed, welded or bonded to an original or aftermarket steel hood with superior results compared to a fiberglass hood scoop. The precision stamped steel form requires less installation work and is easier to blend than a thicker fiberglass scoop. For a more custom appearance, the stamped steel scoops can also be riveted in place like those found on classic Shelby Cobras. Each scoop comes ready to prep and paint with a semi-gloss black finish.

Adjustable Hood Prop

High-quality aluminum and stainless steel, adjustable hood props offer great looks as well as functionality. When the hood is raised, the hood prop will automatically lock itself into position. A quick release allows the hood to be opened to its max for easy engine access. Choose from 3 position or 6 position. Each level of the 6 position prop increases the opening of the hood by approximately 6". Each level of the 3 level prop increases the opening of the hood by approximately 12". They also work great for cooling your engine in the staging lanes.

Mustang Body Shells

1965-68 Mustang Classic Series Body Shells

R3PP's Classic Series body shells are conditioned to the most stringent specifications in the industry, setting a new standard for replacement body shells. This is a great option for someone who has a donor car to build an excellent show or driver car. Each shell includes doors, deck lid, and quarter extensions. Shock towers can be deleted for no extra cost; shock tower delete panels can be installed for an additional cost.

Note: A \$495.00 crate fee is included with the price of each body shell. Body shells are made to order and must be prepaid in full. Body shells ship direct from manufacturer via freight carrier.

FM110767F

Features:

- 36-Month Structural and Fitment Warranty.
- Supplied with Oklahoma State Title.
- Premium-grade sheet metal is used to handcraft and assemble.
- R3's weld process creates a stronger, more rigid body than the original.
- Available in Fastback or Convertible for 1965-68 vehicles.

Body Panel Components

1964-70 Convertible Torque Box

Reproduction torque box for 1964-70 Mustang convertible models. Each box is die-stamped, formed, and welded 14 gauge steel. These were standard equipment on Mustang convertibles to increase chassis strength and reduce twist. Measures: 13-3/4" x 11" x 11-1/2".

Note: Fitment on 1971-73 Mustang models requires extensive modification.

M114L	1964-70	LH	84.99	ea
M114R	1964-70	RH	84.99	ea

1967-68 Coupe/Fastback Torque Box

Direct replacement torque box for 1967-68 Ford Mustang coupe and fastback models. Driver side torque boxes were not standard equipment on Mustang coupes and fastbacks until 1967. Originally exclusive to convertibles to increase chassis strength and reduce twist, torque boxes are an excellent upgrade for earlier 1964-66 Mustang hardtops. Constructed of 14 gauge steel and measures 13-3/4" x 11" x 11-1/2".

Note: Fits 1964-68, for 1969-70 a hole needs to be drilled for the fuel line and hand brake cable. Fitment on 1971-73 models requires extensive modification.

M114AL	1964-70	LH	89.99	ea
M114AR	1964-70	RH	89.99	ea

1964-68 Rear Upper Torque Box

Spot Weld Chisel

Chisel tool to separate panels after the spot weld has been drilled out. Drive the blade with a hammer from the end or the side through the panel seam. Panels are separated without damage. The blade is sharpened on three sides, and offset for clearance.

Y51900	spot weld chisel.....	14.99	ea
--------	-----------------------	-------	----

1964-68 Radiator Support Crossmember

Correct stamped steel reproduction of the original radiator support front crossmember designed for 1964-68 Mustang models. Each crossmember replicates the original in all details. Features correct holes drilled in the appropriate places for mounting under the radiator core support.

10018A	1964-66	30.99	ea
10018B	1967-68	37.99	ea

1971-73 Under Engine Crossmember

Correct stamped steel reproduction of the original under engine front crossmember designed for 1971-73 Mustang models. Each crossmember replicates the original in all details. This is the first crossmember, behind the radiator support, and the strut rods bolt to it.

10018D	1971-73	288.99	ea
--------	---------	-------	--------	----

1964-68 Front Crossmember Support

This OEM style crossmember bolts in under the engine and connects the driver and passenger side frame rails. This part mounts to the frame area under the oil pan. Designed to strengthen the front frame and create a more rigid structure. Makes the front frame section a more integrated structure. Made in USA.

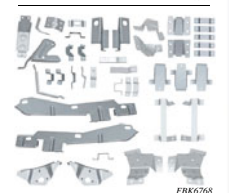

5026A	1964-66	75.99	ea
5026B	1967-68	75.99	ea

1964-70 Rear Crossmember

Designed to strengthen the frame and create a rigid structure. Attaches to taillight panel and the gas tank rests on lip of the support.

10780A	1964-70	24.99	ea
--------	---------	-------	-------	----

1965-70 Fastback Body Brackets

When you begin a full restoration on your Mustang you may discover rust on the inner structure of the body. With a body bracket set, you will get all the brackets and bracing your Mustang needs for a strong structurally sound body. These are the hidden brackets behind the body that act as bracing for the cars structure.

1964-73 Convertible Front Tack Strip Seal

This durable tack strip will effectively secure the new top to the body and withstand the prolonged abuse of the elements for 1964-73 Mustang convertible models. The tack strip allows stapling of the convertible top material and the header bead. So, whether it's from years of damage from the sun and harsh climate conditions, or you just feel its time for a new and updated convertible top, chances are good that you'll need new tack strips.

41700F 1964-73 15.99 ea

1994-04 Comfort Screen

The Windstop™ reduces wind buffeting while improving the aerodynamic styling of any 1994-04 Mustang convertible. OEM quality construction and fit. The Windstop™ folds flat easily and includes it's own storage bag. This lightweight yet sturdy accessory installs easily with no drilling or screws required. Also provides an effective thermal barrier, enhancing the function of the heating and air conditioning systems. A hot styling accessory that works as good as it looks.
96L104 1994-04 399.99 ea

96L169 - installed

1994-04 Convertible Wind Deflector

Reduce wind and noise for front seat passengers with the Wind-Card™ deflector. For use without tonneau cover. Installs easily in our convertible light bar, also removes quickly if desired. Made of clear, UV protected polycarbonate which has been treated for scratch resistance. Instructions and all mounting hardware included. Wind guards do not work with our styling sport bars.

1994-04 Convertible Lamp Bar

High-quality fit and finish. Manufactured to fit the curves and lines of the vehicle. The high mounted LED light provides added safety with the highly visible taillight. The light bar is constructed of a sturdy 1-1/4" round steel tube, with a 1/8" wall thickness. The polyurethane mold is then wrapped in vinyl. The bar bolts to the B-pillar for a sturdy mount and also stiffens the body. Complete with mounting hardware, wiring and instructions. (Installation requires drilling).

Important: Like all light and styling bars, these bars are not intended for rollover protection.

1964-66 Door Hinge Mounting Plates

Reproduction of the steel plates that mount to the A-pillar with the door hinges. It is common for bolts to seize and break off in the original plates. Each steel plate is drilled and tapped for 5/16" x 18 hardware and finished in black paint for corrosion protection. Sold in pairs. 1 pair required per door.

Note: The 1964 and early 1965 vehicles (1st design) used larger 3/8" x 16 bolts. These plates can be drilled and tapped for the 3/8" x 16 bolts if using original bolts is desired on early production cars. These plates can be used on early vehicles as long as you use the later bolts.

17664D	1967-68	10.99 ea
--------	---------	-------	----------

1966 2 Speed Wiper Conversion

Raingear wiper system is a modern, high-quality replacement for the old system. It fits under the dash in the original location. The drive unit is about 1/3 the size of the original, allowing you much better access beneath the dash. This system does not reuse any of the original parts except the arms and blades, the wiper switch cup spacer, and the interior trim pieces. This Raingear unit cannot be controlled by the original wiper switch. You must use the included switch. Wiring diagrams and installation instructions included.

153482	1966	without intermittent	604.99 set

Intermittent Wiper Module

This intermittent wiper module adds 3 settings to the factory slow and fast speeds. Uses existing switch and motor for a stock look. Installs behind the dash between the switch and harness. Fits most applications with 2-speed and non-hiding wipers.

RE13015	72.99 ea
---------	-------	----------

1964-70 Selecta-Speed Wiper System

Bring your Mustang into the 21st Century! Specifically designed for your 1964-70 models, the Selecta-Speed wiper system contains a low profile, 7-speed wiper motor (with five different delays, a low and a high speed), rotary switch, and a new wiring harness as well as a new wiper motor cover. These sets will also utilize your factory wiper knob and bezel. The wiper switch and wiring harness plug into a wiper control module located under the dash. Compact for a clean look on the firewall and additional clearance for your brake booster, valve covers, etc. The rotary wiper switch features a push button function for a windshield washer option. The wiring harness includes a weather pack connector/harness for an inline windshield washer pump.

Note: Washer pump set sold separately. Washer tank is not included.

Sheet Metal Tools

Blaircutter

Provides fast, accurate holes in materials up to 3/16" thick. These cutters provide a quality, virtually burr free hole. Available in seven sizes for 1/4" and larger drill chucks. Spring loaded pilot "pops" the slug from the cutter. Buy the set and save! Set includes: all cutters, arbor and 3 extra pilots.

Note: D.O.C. = depth of cut. Arbors and Cutters sold separately.

Premium Spotweld Cutters

When you have a lot of spotwelds to remove, step up to the premium spotweld cutters for longer life in today's high strength body steels. These cutters have a heavier wall (.090") for extreme durability and two step geometry that splits the chips and helps clear them. Premium spotweld cutters have a fast cutting action and lasts for hundreds of spotwelds. They are for use in 3/8" or larger drill chucks. The spotweld cutters are available individually or in sets containing arbor, 3 cutters, your choice of 2 skip proof or 2 standard pilots.

Stick Lubricant

Ideal for all Blair hole cutters. Softer than standard stick lubricants, it provides superior adhesion to the tool and can be used in place of cutting fluids on ferrous and non-ferrous metals to increase tool life, improve cutting performance and easier slug removal.

11750 1.68 oz.....	5.99 ea
--------------------	---------

Double-End Spotweld Cutter

Double-end spotweld cutters makes removing body panels fast and easy. Their hollow design cuts around the spotweld so weld hardness does not affect tool sharpness. When one end becomes dull, simply unscrew the cutter and flip it over using the new teeth on the other end. An adjustable depth rod sets the tool so only the outer panel is cut, leaving the underlying panel undamaged.

Holecutter

Produce holes 3 times faster and cleaner than hole saws in sheet metal up to 1/8" thick and have dramatically extended tool life. Holecutters produce holes from 1 1/16" up to 3" diameter in sheet metal, rubber, gasket or fiber materials, and some plastics. Ideal for aftermarket installations, custom fabrication, trailers, or gauge installation. Arbor fits 3/8" drill chucks. Holecutters have a new, patented Quad-Lead Thread System for quick cutter changes. Buy the set and save! Holecutter set includes: arbor, hex washer, extra pilot and the following sizes of cutters, 7/8", 1-1/8", 1-1/4", 1-3/8", 1-3/4", 2", and 2-1/2".

Note: D.O.C. = depth of cut. Arbors and cutters sold separately.

Rotabroach Cutter Set

Rotabroach annular cutters are ideal for sheet metal fabrication, painless dent removal and for cutting rustproofing access holes without clogging. Unlike hole saws and twist drills that push and tear through materials, these cutters will make hundreds of holes in steel, sheet metal or plastics up to 1/2" thick with no deforming of stock, jagged edges or out-of-round holes. Arbors for Rotabroach cutters fit 3/8" and 1/2" hand held drill chucks and use either standard loaded pilots or skip proof pilots which eliminate predrilling operations. Each set includes: arbor, Hex wrench, center punch, extra pilot and a variety of cutters as listed.

Note: D.O.C. = depth of cut. Arbors and cutters sold separately.

Rotabroach Cutter Set

Pro Paint Gauge

The Pro Gauge is a device which measures paint thickness. Factory paint is usually four to five mils in thickness. By using the Pro Gauge you can determine if the vehicle has been repainted. For instance, you can take measurements of about 4.5 mill around the vehicle but the hood may read seven mils on the Pro Gauge. That tells you the hood has been repainted.

Eliminator Rust Remover

Before touching up paint, you first must remove all rust, wax, and dirt or the rust will return and the paint won't adhere. This unique tool will scrub away all dirt, rust, and wax. The results are touch up paint adheres, seals and blends smoothly into the rest of the paint.

Spot Weld Chisel

Chisel tool to separate panels after the spot weld has been drilled out. Drive the blade with a hammer from the end or the side through the panel seam. Panels are separated without damage. The blade is sharpened on three sides, and offset for clearance.

Note: The sharpened edges will wear with use. Resharpen on a grinding wheel.

 S23231 replacement pad 9.99 ea

Vise Grip Flange Pliers

Preparing panels with an offset flange will produce a clean, flush fit. Work on up to 18 gauge sheet metal without removing panels from the vehicle. The added feature of "Vise-Grip" locking pliers allows for better leverage. Available with your choice of 1/2" wide non-slip jaw or wider 1" clamping surface.

13229 1/2" wide jaw 39.99 ea
 X9853 1" wide jaw 41.99 ea

Seam Buster HD Chisel

Easily separate spot welded or bonded panels. Save up to 15 minutes per panel replacement. Great for quarter panels, rocker panels and other pinch welded areas. Sharpened on two edges, the sharp end allows for penetration between panels and the side edge allows for side impact to drive the panels apart without damage. Made of super tough alloy steel. Cushioned handle absorbs shock.

TRUNK & FLOOR PAN REPAIR SET

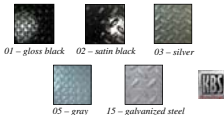

New!

Trunk and Floor Pan Repair Set

The KBS trunk and floor pan repair set allows you to restore your floor pan, trunk pan, or pickup truck bed back to new without producing any ugly weld seams. Our included step-by-step instructions make it easy and simple to use. After cleaning the area with KBS Klean (an industrial strength water based cleaner/degreaser), and KBS RustBlast (a powerful rust remover/metal etch), simply use the included BackBone reinforcing mesh and NuMetal epoxy putty to fill any small pin holes. Last, finish it off with a coat of RustSeal® for a restored finish without any weld seams. Each set includes: 1 gal. KBS Klean, 1 gal. RustBlast, 1 qt. RustSeal®, 1 lb NuMetal epoxy putty, 1 sq. yard BackBone Reinforcing Mesh, 8 oz. #1 Thinner, KBS paint spout, Nitrile gloves, mask, two brushes, stir stick and complete and detailed instructions.

Cut KBS Patch into any size you want without exposing to UV or sunlight.
Remove white backing tape to expose the sticky resin.
Apply KBS Patch to repair area with sticky side down.
Press firmly to repair surface. Remove transparent film backing and expose to sunlight or KBS UV Light. Curing times depend on UV intensity between 5 minutes (sunny) and 50 minutes (cloudy).

Repair Patch

The KBS Patch is an easy to use, UV/sunlight activated repair patch. The fiberglass reinforced polyester patch is perfect for making watertight, durable repairs on engine parts, decking, fenders, gas cans, drain pipes, water tanks, PVC pipes, plastics, Plexiglas, fiberglass, metal, wood, concrete, and more. The KBS patch is waterproof, will not rot or rust, requires no mixing, can be drilled or tapped, sandable, and accepts paint in 1 hour. Sold in three different sizes. UV light available separately.

Nu-Metal Epoxy Putty

NuMetal Epoxy Putty is an easy to use, two part putty that mixes like clay but hardens like steel! No complicated weighing or measuring required. NuMetal bonds, seals, fills, insulates, anchors, caulks and waterproofs. It cures without shrinking or sagging and can be drilled, tapped, sanded, primed, and painted. NuMetal will not only stick to damp surfaces, but it will cure underwater! Available in black.
