1964-78 Aluminum Radiator

Improve your cooling capacity of your Mustang with Cold-Case performance radiators for 1964-78 models. Radiators feature an all-aluminum construction that efficiently dissipates heat, with 2 oversized cooling rows, and polished original style stamped tanks. All Cold-Case radiators are 100% TIG welded, pressure tested, and include OE style fittings for both automatic and manual applications. All radiators manufactured by Cold Case are guaranteed to be free from material and workmanship defects for the life of your installation.

AC, HEATER & COOLING SYSTEM

Radiators

1964-78 Aluminum Radiator

Keep your Mustang cool without spending a small fortune on a radiator! Each Champion high-performance aluminum radiator is specifically designed for each application and features a billet aluminum filler neck, 100% TIG welded construction, aluminum brackets, brazed core, aircraft grade 2mm thick fittings and tanks, 14-16 cooling fins per inch, and 3/8" spaced tubes. Radiators also includes a brass o-ring petcock and high-performance 16 pound radiator cap. Available in 2, 3, and 4 row applications with natural or high polished finish.

Note: *Both inlet/outlet in passenger side. All other inlet in passenger, outlet in driver side. Dimensions listed are for radiator core only (H x W x D).

1964-70 Maxcore Aluminum Radiator

ACP utilizes the perfect blend of premium aluminum grades to form an OE look while maintaining excellent high pressure strength and corrosion resistance. Fully TIG welded with a billet filler neck for continuous durability. Keep your Classic Mustang looking classic. Inspired by OE radiators Ford had manufactured, ACP has designed a product that captures the original appearance while improving performance. Along with OE styling comes a direct fit for easy installation. ACP Radiators are made specifically for the Mustang listed in each application listing. No universal fittings.

Note: Dimensions listed are for radiator core only (W x H x D).

Radiator Components

1964-70 Aluminium Radiator Filler Panel

Dress-up your 1964-70 Mustang engine bay with these custom aluminium upper radiator filler panels! These durable show panels direct the air that normally escapes over the core support straight into the radiator to improve cooling. Features pre-cut holes for the hood latch and is available for both AC and non-AC models. Offered in your choice of black anodized, clear anodized, or polished finishes.

Important: If your horns are still mounted on the core support, they will need to be relocated to a point below the top of your grill. *Only available without AC at this time.

"Liquid Chill" Engine Coolant and Additive

Mishimoto's Liquid Chill is a universal, synthetic coolant that will provide premium cooling and protection for your vehicle. Liquid Chill protects from boil over to 265 degrees F and from freezing down to -26 degrees F; inhibits corrosion, and reduces operating temps. Made with propylene glycol base and unique poly organic additives to allow for extended life of 2+ years or 250,000 miles before needing service in gasoline applications. One gallon jugs are available in full strength formula or 50/50 blend. For up to 30 degrees F cooler over just coolant alone, the universal Liquid Chill additive is available in 4 oz. bottles.

Super Coolant

Purple Ice is a high-performance, synthetic, radiator coolant additive. It reduces engine heat by reducing the surface tension of the radiator fluids for improved heat transfer. Purple Ice fosters optimum coolant flow by helping to prevent formation of scale deposits in the radiator. It also lubricates the water pump seals. Purple Ice should always be used in conjunction with antifreeze in regions where freezing temperatures occur. Purple Ice is recommended for any water/glycol pressurized cooling system, including those using the traditional green silicate based glycols or the newer OAT or HOAT based glycols.

J-B Weld Cold Weld

J-B Weld is a great alternative to welding, soldering and brazing. This two part system is mixed at a ratio of 1:1, it forms a permanent bond and can be shaped, tapped, filed, sanded, painted, and drilled after curing. Cold weld will bond to most clean and dry surfaces and sets in 1-2 hours and will fully cure in 16-24 hours. Waterproof, petroleum, chemical, and acid resistant when fully cured. Non-toxic and temperature resistant up to 600 degrees F. Cure color is dark gray. Made in USA.

1964-73 Reproduction 2.5" Fan Spacer

1964-73 small block and 6 cylinder 2-1/2" fan spacer. Authentic original appearance for 2 or 3 row radiators. Will not work on vehicle with a 4 row radiator.

8546B 2-1/2" spacer OEM style 22.99 ea

EF6504

1965-04 12" Electric Engine Cooling Fan Kit

Thermostatically controlled, it only operates when forced airflow is required (such as when idling, during stop and go traffic, pulling a load, driving up a grade, etc.). Can be mounted either in front or in back of the radiator. Our kit includes: one 12" fan, thermostat fan control and all mounting hardware (nothing else to buy). Fits most 1965-73 and 1979-04 Mustang models. Requires 5-1/4" clearance between radiator and water pump shaft (or belt driven fan). For extreme use, add a second fan (fan control will operate up to two electric fans).

89L311 1986-93 S-blade 178.99 ea

Cooling Fans

1979-93 Dual High Flow 12" Fans with Shroud

This Mishimoto Mustang aluminum fan shroud set will considerably improve engine cooling functions and the overall performance of your vehicle. The two high flow electric fans provide much more cooling power than the stock clutch fan while taking up less space in your engine bay. The aluminum shroud is significantly lighter than standard fan shrouds, and is direct OEM fit. Includes installation hardware.

Note: Some wiring is required.

Fan with Shroud

1979-93 Black Magic Extreme 15" Electric Fan

Replace the stock belt driven fan on your 1979-93 Mustang 5.0 with an electric fan from Flex-a-lite and improve your gas mileage, horsepower and torque. Flex-a-lite's Black Magic X-TREME™ moves up to 3,300 cubic feet of air per minute, draws up to 18 amps and dissipates over 50% more heat than larger 16" fans on the market. The entire unit measures 21-1/2" x 17-1/2" x 4-3/16", covering over 45% more radiator surface than the original Mustang fan. Includes: glass reinforced nylon fan shroud, 15" fan, adjustable thermostat, aluminum mounting brackets, wiring diagram, hardware, and instructions.

Cooling Fans

16" Fan Mounting Gasket

SPAL fan gasket is a specifically designed rubber gasket for use exclusively with the 16" fan line. The gasket provides an additional 1/4" clearance from the cooler core and is ideal for mounting our pusher style fans.

Note: Will not fit SP2036 and SP2057.

SP2070 16" 16.99 ea

Cooling System Zinc Anode

Used in heavy-duty and marine applications to protect the cooling systems and its many components from damage due to electrolysis or coolant additive failure/breakdown. The introduction of the zinc anode will protect your cooling system from galvanic action as it "eats" the zinc rather than your cooling system. To be installed in the radiator as a replacement for the drain petcock in radiators that are equipped with a 1/4" NPT hole or any 1/4" NPT hole that is available in the cooling system.

FL32060 14.99 ea

Fan Temperature Sending Unit

The temperature sending unit screws into the side of the cylinder head or on the intake manifold to operate the Champion or Challenger Series fans.

30102

"Ice Box" Cooling Fan Control

Available as a single fan control or dual fan/2-speed fan control unit. The sensor is simply tightened under an intake or water pump bolt. It can then be adjusted to your exact preference for on and off temperature. It is equipped with an AC Request system to turn the cooling fan on whenever the AC Compressor engages (this feature does not have to be used). The dual fan control can operate two fans at different temperatures or a single 2-speed fan at different temperatures. Each unit has a fully adjustable operating range of 140-230 degrees.

Note: With Walker 2-speed fans.

TF900635	dual control.....	160.99 ea
----------	-------------------	-----------

Delayed Cooling System Shutdown

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

TF900632	159.99 ea
----------	-------	-----------

30104

Adjustable Electric Fan Thermostat Set

This set is designed to allow a wide range of temperature adjustments for your electric fan. The adjustment knob may be used to set a precise temperature desired for fan activation. The mounting bracket is made of brushed stainless steel for good looks and durability. The complete set includes the thermostat with bracket, a 30 amp relay, a 30 amp circuit breaker for overall protection, wiring, terminals, and mounting hardware.

Specs on Adjustable Fan Thermostat:

Temp range -	32 degrees to 248 degrees F
Accuracy: +/-	7.3 degrees F
Differential:	7.3 degrees +/- 3.6 degrees F

Important: Temperature refers to the temp of the capillary tube, not the coolant temp.

30104	86.99 set
30112	without relay.....	54.99 set

Cooling Fan Shutdown

This cooling fan shutdown kit shuts down your electric cooling fan above 50-60 MPH to improve engine cooling by preventing the electric fan from fighting airflow through the radiator at highway speeds. The unit is adjustable and may be overridden by using the supplied dash mounted toggle switch. This kit is designed to be used with the supplied signal generator which must be installed into the speedometer cable.

New!

Hose Clamp Pliers

This handy tool removes and installs spring tension hose clamps used on heater and radiator hoses. Adjustable tips screw in and out to fit clamps of all sizes. Ratcheting lock mechanism holds the clamp in an open position for easy removal and installation. Tips can be switched to accommodate different applications. Offset jaws allow access in hard to reach areas.

Water Pumps

Edelbrock

1965-93 Ford Small Block Victor Series Water Pump

Designed, cast, and machined out of A356 aluminum at Edelbrock's manufacturing facility in the USA. These water pumps provide maximum cooling for the street and race track. Using state-of-the-art racing technology, they are designed to provide maximum flow, pressure, and equal distribution to the block. Water pumps only flow one direction (unless noted) for optimum efficiency. Features heavy-duty ball/roller bearing, seals, precision impeller and hub machined from billet steel. Available in several finishes.

1986-95 V8 Racing Thermostat

Mishimoto's racing thermostat will promote greater cooling efficiency for your 1986-95 V8 Mustang, especially in modified or turbo applications. This thermostat will open at 154 degrees, instead of the stock 190 degrees, to allow coolant into the engine block sooner which will reduce and maintain lower engine temperatures resulting in more power.

MMI3058	1986-95	154 degrees	56.99	ea
---------	---------	-------------	-------	----

High Flow Performance Thermostat

The "Balanced Sleeve" design of these High Flow Thermostats equal out the pressure exerted on it by a high flow water pump allowing it to be solely regulated by coolant temperature. With the addition of a high-performance water pump and high flow thermostat, you can expect a temperature drop of up to 25 degree F on drives around town.

Note: Fits all except pre-1967, 390-428

16400	160° high flow thermostat	31.99	ea
16401	180° high flow thermostat	31.99	ea

High-Performance Thermostat

These high-performance thermostats are designed to resist variations in coolant pressure, opening and closing only at the correct temperature, regardless of engine RPM. Thermostats are made from brass and copper with a high grade steel frame for years of worry free operation.

Note: Fits all except pre-1967, 390-428.

1964-70 Sure Fit Climate Control Set for Serpentine Drive

This Sure Fit Climate Control set includes everything you need, and nothing you don't! It was designed specifically for those who have upgraded their motor with a serpentine belt drive system and do not need a compressor and mounting brackets. You still get the same evaporator assembly, fly-by-wire controls, condenser, dryer, safety switch, firewall plate, and preformed aluminum lines as in the complete set. These sets are designed to install with minimal drilling and no fabrication required. Be sure to order the adapter kit required for your compressor.

Important: Refrigerant is not included.

Note: Special order.

- All Fittings, Hoses, and Tubes (Suction, Discharge, and Liquid)

1964-70 Under Dash AC System

Classic Auto Air Daily Driver under dash air conditioning system for 1964-70 Mustang models. This system is designed for originality with a four vent evaporator unit that resembles the factory bang down AC units. The evaporator unit features an extra large coil that provides excellent air volume and temp. Much like the factory system, it operates independently of the heat and defrost systems, making it much simpler install.

Note: Some engine configurations may require additional pulleys.

R492058	1968	505.99	pr

A46012

Set Includes:

- Modern Rotary Style Compressor
- Hi-Perf. Parallel Flow Condenser
- Compressor Adapter Brackets
- Suction Hose with Accumulator
- Discharge Hose
- Liquid Hose with Orifice Tube
- Serpentine Belt
- Expansion Valve and Filter Dryer
- Optional Evaporator
- O-rings and Hardware

1986-93 AC System Upgrade Set

Upgrade the old R-12 AC system on your 1986-93 Fox body to a more efficient and modern 134a system. This set will improve the overall performance of your factory AC and modernize the appearance of your engine compartment. Designed to fit and replace the factory application. Eliminates all but one spring lock seals with reliable standard o-ring connections. Available with or without evaporator. **Important:** Depending upon the condition of your AC and heater system additional parts, including switches, controls, cables, ducting, vacuum and electrical harnesses, etc. may also need to be replaced. If you plan on reusing the original evaporator, it must be flushed clean to prevent contamination of newly replaced parts.

Note: Set does not include any passenger compartment parts. Refrigerant is not included.

1964-69 AC Compressor

New, not rebuilt, York Rotolock air conditioning compressor for various Ford Mustang models. This compressor features a lightweight aluminum case and original style square cut Teflon Rotolock gasket/seals at the service valves. It is a stock, direct service replacement for vehicles with factory installed air conditioning systems. This premium quality compressor is sold outright; no core deposit or exchange required. The York compressor can also be used in place of the Tecumseh compressor. The Tecumseh is cast iron, and the York is aluminum. Includes a manufacturer's 1-year warranty.
