## 1962-79 Restoration Radiator

OER® Authorized radiators install exactly like original. Each radiator is equipped with a new tank and core. Not rebuilt! Features original style mounting brackets attached and installs as original to the radiator support. The fan shroud must be replaced if your are installing a radiator for air conditioned models on a vehicle which did not include factory air. This helps to maintain a correct fit and sufficient air flow to the engine. All radiators include a 6-month limited warranty. Made in USA.

**No Exchange Required! No Core Charge!**

**Important:** Fan shrouds, fan shroud brackets, radiator petcock, radiator cap and shroud mounting clips are available separately. Due to dimensional differences, fan shrouds are not interchangeable between air conditioned models and non-air conditioned models. AT=Automatic Transmission, MT=Manual Transmission, AC=Air Conditioning.

**Note:** These are all-metal replacements for original plastic tank composite GM radiators. Shipped oversize.

## 1962-79 Aluminum Radiator

Improve the cooling capacity of your engine with Cold-Case performance radiators for 1962-79 Nova models.

Feature an all aluminum construction that is good at dissipating heat and saving energy, with 2 oversized cooling rows, and polished stamped tanks. All Cold-Case radiators are 100% TIG welded, pressure tested, and includes OE style fittings for both automatic and manual applications. All radiators manufactured by Cold Case are guaranteed to be free from material and workmanship defects for the life of your installation. Does not include the cap, sold separate.

# Radiators

## 1962-79 Nova Aluminum Radiator

Constructed of 100% aluminum, these racing radiators are built using no epoxy for trouble-free service.

Aluminum radiators have shown to be 15% more efficient than factory copper brass type radiators. This radiator fits in the factory mounting location with predrilled brackets for easy installation.

The factory fan shroud can be reused without modifications while the inlet and outlet are in the stock locations so the factory style radiator hoses can be used. As with most radiators, automatics are available with a built-in transmission cooler with the correct dimensions to use the factory transmission lines.

**Important:** 1962-67 crossflow radiators require modifications to mount. Transmission cooler lines must be rerouted and factory fan shroud will not fit.

**Note:** \*SB. \*\*SB/BB. †With automatic transmission. Shipped oversize.

## 1962-79 Polished Aluminum Performance Radiator

Keep your engine cool with one of these polished high-performance aluminum radiators. Manufactured from TIG welded aircraft grade aluminum with brazed aluminum cores and billet filler necks, each radiator offers high capacity cooling with louvered fins and 3/8" spacing between core tubes. Designed for direct fit installation. Radiator cap is included.

**Important:** All radiators have built in automatic transmission coolers and can be used in both automatic and manual transmission applications.

**Note:** Shipped oversize.

## 1962-79 Aluminum Radiator

Griffin's Exact Fit line of performance radiators feature OE fitment, OE style tanks, and mounting provisions for all factory equipment. They offer all the required mounting tabs and brackets to ensure seamless installation without special tools. You get maximum cooling performance by the use of two rows of Griffin exclusive MegaCool 1-1/4" tubing. Constructed of the best AA3003 aluminum, backed by a 2-year warranty, and no special coolant requirements, a Griffin Exact Fit radiator will give you the cooling performance you need.

## Universal Slim-Fit Radiator System

PROFORM has completely rethought how the radiator, fan, thermostat, and shroud can come together seamlessly to create a unified radiator system that is under 4" thick, looks and works great, and is pre-assembled right out-of-the-box, ready for a custom fit into your muscle car or sport truck. With revolutionary engineering we flipped the motor around so instead of hanging on the outside, it's integrated directly into a uniquely designed core made with state-of-the-art brazing technology (with no meaningful cooling compromise). The core itself is a hybrid combination of traditional dual 1" tubes, and full core width extruded tubes. Combine this with a high-performance fan blade inserted into a smooth aluminum shroud, the result is the industry's thinnest, most streamlined look. Every PROFORM Slim-Fit Radiator includes a shroud, electric fan with adjustable thermostat, wiring harness, and radiator cap.

rivet detail

## 1962-67 OE Style Radiator Cap Hollow Rivet

Authentic reproduction radiator cap designed for the enthusiast who wants total originality in a reproduction cap. Features the correct cap rating along with all the correct markings as original. Long discontinued, the current GM replacement and other reproduction caps do not accurately represent the original cap. One of the features that sets OER's reproduction cap apart is the correct divot in the brass rivet in the center of the cap, just like the original. OER's reproduction is an exact replica of the original featuring correct markings as well as an accurate cosmetic appearance of the rivet in the center of the cap.

## "Liquid Chill" Engine Coolant and Additive

Mishimoto's Liquid Chill is a universal, synthetic coolant that will provide premium cooling and protection for your vehicle. Liquid Chill protects from boil over to 265 degrees F and from freezing down to -26 degrees F, inhibits corrosion, and reduces operating temps. Made with propylene glycol base and unique poly organic additives to allow for extended life of 2+ years or 250,000 miles before needing service in gasoline applications. One gallon jugs are available in full strength formula or 50/50 blend. For up to 30 degrees F cooler over just coolant alone, the universal Liquid Chill additive is available in 4 oz. bottles.

MM13067	additive.....	18.99 ea

## J-B Weld Cold Weld

J-B Weld is a great alternative to welding, soldering and brazing. This two part system is mixed at a ratio of 1:1, it forms a permanent bond and can be shaped, tapped, filed, sanded, painted and drilled after curing. Cold weld will bond to most clean and dry surfaces and sets in 1-2 hours and will fully cure in 16-24 hours. Waterproof, petroleum, chemical, and acid resistant when fully cured. Non-toxic and temperature resistant up to 600 degrees F. Cure color is dark gray. Made in USA.

JB8265	2 x 1 oz. tubes .....	9.99 ea
JB8280	2 x 5 oz. tubes .....	15.99 ea

## Super Coolant

Purple Ice is a high-performance, synthetic, radiator coolant additive. It reduces engine heat by reducing the surface tension of the radiator fluids for improved heat transfer. Purple Ice fosters optimum coolant flow by helping to prevent formation of scale deposits in the radiator. Purple Ice is recommended for any water/glycol pressurized cooling system, including those using the traditional green silicate based glycols or the newer OAT or HOAT based glycols.

RP01600	12 oz. bottle .....	10.99 ea
RP12600	case of 12 - 12 oz. bottles..	131.99 cs

## Coolant System Protector

Impurities in well water can cause rust and corrosion inside the radiator, water pump, and cylinder heads. Over time, this can lead to a loss of cooling efficiency. Joe Gibbs Driven Coolant System Protector stops the adverse effect of hard water to help prevent cooling system damage.

JG1330	12 oz. bottle.....	11.99 ea
--------	--------------------	----------

## Universal Coolant Filter

Prevent dangerous clogs in your cooling system with this in-line coolant filter. Featuring heavy-duty solid brass construction, this filter is installed in line to prevent dirt and debris from entering and causing damage.

RF002	for heater hose .....	47.99 set

## Flexible Hose Set

Ideal replacements for worn or rotted radiator and heater hoses. Non-corrosive stainless steel construction conforms to tight bends and holds shape indefinitely. Rated for high temperatures and high pressure, these ultimate radiator hose sets come complete with: 1 length of stainless tubing, 2 rubber sleeves, 4 reducer inserts, 4 stainless steel hose clamps, and 2 chrome or polished aluminum end covers. Heater hose sets include: 2 (44") hoses, 4 sleeves, 4 reducers, 8 hose clamps and 4 polished or chrome end caps. Easily cuts to custom lengths, these high-quality sets will enhance any engine compartment. Choose from polished aluminum or chrome finished ends.

**Note:** 48" radiator hose set have double quantity of end caps, sleeves, reducers, and clamps.

**Stainless Steel Flex Fan**

Flex-a-lite fan blades are designed to flex or flatten out as the RPM's climb, helping to reduce engine drag for better performance and improved fuel economy. Fan features a premium, high tech silver coating that won't degrade or lose its luster in the harsh environment of an engine compartment. Available in standard or reverse rotation along with 4 different diameters and 6 blades.

**Important:** Must be used with a Flex-a-lite spacer or warranty will be voided. Fans features 5/8" pilot hole with a 1-3/4" to 2-1/2" slotted bolt pattern.

DERALE PERFORMANCE

## Electric Dual Fan & Shroud Powerpack

Get complete control of your engine temperature! Derale Performance has combined their high performing shrouded powerpack with the ultimate fan controller. Using high output electric fans incorporated into an engineered shroud, this powerpack can conquer even the most difficult cooling conditions. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4000 Cfm. Now add the digital PWM fan controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature. Features a laser cut, powder coated steel shroud measuring 26" wide by 18" top to bottom and is only 4" in overall depth.

## 12" Electric Engine Cooling Fan Kit

Thermostatically controlled, it only operates when forced airflow is required (such as when idling, during stop and go traffic, pulling a load, driving up a grade, etc.). Can be mounted either in front or in back of the radiator. Kit includes: one 12" fan, thermostat fan control, and all mounting hardware (nothing else to buy).

**Note:** Requires 5-1/4" clearance between radiator and water pump shaft (or belt driven fan). For extreme use, add a second fan (fan control will operate up to 2 electric fans).

## Syclone Electric Fan

The amazing Flex-a-lite Syclone electric fan is the most efficient S-Blade fan blade on the market! This quiet fan mounts to the core and can be used to push or pull air through the radiator. The higher torque (17 amp) motor produces 2500 cfm of air flow, making these fans strong enough to replace your belt driven fan and fan clutch to gain more horsepower and torque. The sweep style blades squeeze out the maximum air flow possible. 16-5/8" x 15-3/4" x 4" mount. Universal mounting brackets are included.

FL398 16" fan ..... 153.99 ea

## Black Magic S-Blade

If your vehicle is still running the factory engine driven fan, you're losing vital horsepower and not even getting the full cooling effect you should! By replacing your engine driven fan with an efficient electric unit, you can reduce unneeded drag on your engine to free up horsepower and improve your fuel economy. An engine driven fan can cost up to 17 HP to operate! This universal fit Flex-a-lite electric fan features computer engineered blades that are extremely quiet and efficient, and moves 3000 cfm of air to provide consistent cooling, regardless of engine RPM. Ring fans like this provide better blade support for impact resistance. This electric fan fits vehicles with 16" or wider radiator cores, and requires a mounting surface of 18" x 16" x 4-1/4" for an easy, bolt-in installation. Universal mounting brackets are included.

## Improves Horsepower, Extends Water Pump Life and Cools Faster!

Used as a primary fan, this unit frees up wasted horsepower and increases fuel mileage by eliminating drag caused by your standard engine mounted fan. Also increases water pump life by reducing strain on the water pump bearing assembly. When mounted in front of the radiator and used as an auxiliary fan in addition to your stock belt driven fan, this electric fan provides better cooling in any engine prone to overheating.

## Champion Series Low Profile Performance Fan

These Champion Series performance fans are the lowest profile of high and medium performance fans on the market. Quiet, reversible S-blade design gives you the choice of using it as a puller or a pusher fan. Manufactured from glass filled nylon. Includes: powerful sealed motor, four 90 degree mounting feet, mating locking pigtail, and rubber spacers. Recommended wire harness, temperature switch, and adjustable thermostat sold separately.

## Brushless Electric Fan Powerpacks

Derale Brushless Powerpacks provide the best Performance when it comes to cooling performance for your engine. Derale's NEW, high-performing brushless fans with integrated fan controller, combined with their high-performing shrouds is a combination that just can't be beat. These units feature a fully welded aluminum shroud measuring only 2-13/16" in depth and combined with the installed electric fan, the overall thickness is only 3-1/2". The dual 12", brushless electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4400 cfm. Don't forget they also have the built-in PWM Fan Controller with soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100% to maintain temperature. This allows electric fans to operate at the percentage needed, instead of 100% all the time. This results in extra longevity, increasing component life and eliminating amperage spikes.

## Electric Dual Fan & Shroud Powerpack

This Derale Dual High Output RAD Fan Powerpack assembly is part of the HO aluminum shrouded fan series that is designed with the application in mind. Based on some of the most common radiator core sizes sold today, this unit features an aluminum shroud and is only 4" in overall depth to offer an adjustable yet precision fit. The natural, non-finished aluminum shroud gives the user the freedom to polish, anodize, paint, or simply leave it raw to create a truly custom look for an affordable price. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up. Offering a total of 4000 cfm, this dual electric fan assembly generates the most real-world airflow in the smallest package on the market. Now add the digital PWM Fan Controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature.

## Electric Single Fan & Shroud Powerpack

This Derale High Output Single RAD fan powerpack is part of the HO aluminum shrouded fan series designed with popular applications in mind. This assembly measures only 3" thick overall to offer an adjustable yet precision fit. The raw aluminum shroud gives the user the freedom to polish, anodize, paint, or simply leave it natural to create a truly custom look for an affordable price. The 17" high output two-speed fan is one of the best in our line-up offering 2400 cfm when on high to create the most airflow possible in a compact size. Now add the digital PWM Fan Controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature.

SECTION J

AC, HEATER &amp; COOLING SYSTEM

# Cooling Fan Components

## 16" Fan Mounting Gasket

SPAL fan gasket is a specifically designed rubber gasket for use exclusively with the 16" fan line. The gasket provides an additional 1/4" clearance from the cooler core and is ideal for mounting our pusher style fans.

**Note:** Will not fit SP2056 and SP2057.

SP2070 16" ..... 16.99 ea

## Cooling System Zinc Anode

Used in heavy-duty and marine applications to protect the cooling systems and its many components from damage due to electrolysis or coolant additive failure/breakdown. The introduction of the zinc anode will protect your cooling system from galvanic action as it "eats" the zinc rather than your cooling system. To be installed in the radiator as a replacement for the drain petcock in radiators that are equipped with a 1/4" NPT hole or any 1/4" NPT hole that is available in the cooling system.

FL32060 ..... 15.99 ea

MF109

## Fan Temperature Sending Unit

The temperature sending unit screws into the side of the cylinder head or on the intake manifold to operate the Champion or Challenger Series fans.

MF108 185° for carbureted engines..... 25.99 ea  
MF109 195° for fuel injection engines 25.99 ea

## Temperature Sending Wire Cloth Insulator

This 3/16" i.d., 5/16" o.d. replacement cloth insulator, keeps your temperature sender harness well insulated from engine heat. Sold per foot. 2-3 feet required per vehicle.

K0163 ..... 2.49 ft

## Temperature Sending Unit Wiring Set

Reproduction wiring which extends from the front light harness to the temperature sending unit. Includes correct 24" insulator cover and 30" green wire with bullet, blade, or button type terminals included.

CA34620 ..... 18.99 set

## Universal Fan Mounting Bracket

SPAL universal fan mounting bracket. It can be used with most aftermarket and OEM radiator types. It is adjustable and features a black powder coated finish. Includes 1 metal strap bracket and 1 plastic foot. Requires 4 for proper installation.

SP2072 ..... 2.99 ea

## Universal Fan Mounting Rod

SPAL universal mounting rod brackets attach directly to the fan shroud. Manufactured from lightweight steel and plastic. Includes mounting clip. 4 required for proper installation.

SP2071 ..... 5.99 ea

SP2073

SP2074

## Plastic Mounting Bracket

SPAL plastic fan mounting foot bracket. Four mounting brackets are required to complete proper installation. Sold individually. Available in either flat or raised design.

SP2073 flat ..... .99 ea  
SP2074 raised ..... .99 ea

## Billet Aluminum Fan Brackets

Use this premium billet aluminum bracket set to mount your 14" or 16" Champion or Challenger Series fan. The set features 4 adjustable side angle brackets that attach to the side flange of the radiator. Mounting hardware is included.

MF105 billet aluminum fan brackets.. 58.99 set

## Universal Fan Bracket Strip Set

This bracket set is used to mount your Champion or Challenger Series fan. Install the fan's 90 degree mounting feet (included with fan) to these four 7-1/4" long strips for solid support. Mounting hardware is included.

MF104 universal fan bracket strips .... 24.99 set

New!

## Electric Fan or Oil Cooler Mounting Set

These sturdy nylon electric fan and transmission cooler installation set includes 4 plastic rods, 4 retaining clips, and 4 foam mounting pads to provide a solid trouble-free and installation-friendly method of securing an electric fan, transmission or engine oil cooler to any vehicle.

13001 4 rods with retainers ..... 6.99 set

## Adjustable Fan Temperature Sensor

Turn your electric fan on at whatever your desired temperature is with this adjustable temperature sensor. Sensor adjusts from 180-240 degrees F and helps prevent overheating in performance vehicles when driving at low speeds or when idling for long periods.

346932 180-240 degrees F ..... 109.99 ea

SP2068

## Fan Harness Set

SPAL wiring harness sets are a must-have when installing an electric fan. Designed to safely integrate with OEM wiring harness. Feature a waterproof 40 amp relay, stainless steel switch with optional switched override capability along with printed wires which aid in installation. Thermo switch, fuse holder, connectors 1/2" adapter, and instructions are included.

SP2068 185 degrees harness ..... 118.99 set  
SP2069 195 degrees harness ..... 125.99 set

New!

## Electric Fan Wiring Harness

Dual fan wiring harness with the proper gauge and color coordinated wire, temperature sending unit, waterproof 40 amp relays and 30 amp fuse with holder. Includes installation guide and detailed diagrams. Can be used on any positive or negative 12 Volt DC vehicle with no modifications.

75095 harness ..... 39.99 ea

# Cooling System

## Dual Fan Wire Harness with Relay ⚠

When installing an electric engine cooling fan, a wire harness with a relay is required. This dual fan wire harness with relay will allow safe control of 2 fans while using either an on-off switch or an adjustable temperature sensor. Switch and sensor not included.

40080 wire harness with relay ..... 54.99 ea

## Dual Fan — Dual Activation Fan Relay Set ⚠

The dual activation cooling fan relay set by Painless Performance is exactly what you need to run dual fans off of a thermostatic switch and when your AC is on. Installation takes just a few minutes and your cooling fan will come on when the engine reaches the preset temperature of the thermostatic switch or when the AC is turned on. Set includes: three 40 amp relays with mounting bases, one fuse holder with 70 amp fuse, pre-terminated and printed wire harness, and your choice of thermostatic switch on/off temperatures (thread size: 3/8"-18 NPT), 1/2" NPT to 3/8" NPT adapter, mounting hardware and insulated terminals and detailed instructions.

30116 on 200°F, off 185°F ..... 131.99 set  
 30117 on 185°F, off 175°F ..... 121.99 set  
 30118 on 205°F, off 190°F ..... 154.99 set

## Electric Fan Relay ⚠

Designed as inexpensive protection for your electric fan. Provides constant voltage, protects from voltage and amperage spikes. Choose from the regular fan relay or the weatherproof relay which are for the harsh weather conditions, these relays provide complete protection from the elements and ensure reliable and dependable performance. These sets utilize heavy-duty waterproof relays, weatherproof circuit breaker covers and extreme condition weatherproof shrinkable crimp-on terminals.

30101 standard ..... 28.99 set  
 30130 weatherproof ..... 39.99 set  
 30127 weatherproof w/205° switch ..... 83.99 set  
 30128 weatherproof w/195°/185° switch 68.99 set  
 30129 weatherproof w/185°/175° switch 61.99 set

## Electric Fan Relay with Thermostat ⚠

The Fan-Thom II includes a threaded thermostat that screws into the engine block or manifold for a professional installation. Thermostat thread size: 3/8"-18 NPT fitting.

**Electric Fan Relay**  
 30102 195° on/185° off ..... 51.99 set  
 P30103 185° on/175° off ..... 45.99 set

**Replacement Thermostats**  
 30110 195° on/185° off ..... 30.99 ea  
 30111 185° on/175° off ..... 29.99 ea

## Universal Electric Fan Relay Wiring Kit ⚠

Lock down superior cooling and eliminate bothersome noise and vibration with a Champion Cooling electric fan relay kit. Featuring heavy-duty, 1 piece construction with a permanent magnet motor and computer balanced, reversible swept blades, this top-of-the-line kit enables you to run your fan as a puller or pusher. 1-year warranty.

CCFKRL with thermostatic switch ..... 89.99 ea

## Electric Fan Relay Wiring Kit ⚠

Cold Case electric fan wiring kit for single or dual electric cooling fans. Includes thermostatic switch that turns on the fan(s) at 190 degrees F and turns them off at 170 degrees F. Operates single or dual fan setups. Includes: 12' wiring, thermostatic switch, weather resistant relay, and fan pigtail connectors.

CC46179 with thermostatic switch ..... 99.99 ea

## Single Fan Pigtail Connector ⚠

Single male fan pigtail connector for Northern or SPAL single fans. Required when not using Northern relay harness.

*Note: This same pigtail is included on Northern relay harnesses. Use part #40080 for Northern relay harness.*

Z40079 pigtail connector ..... 9.99 ea

## PCM Controlled Fan Relay Set ⚠

This PCM controlled, weatherproof fan relay set is inexpensive protection for an electric fan and a vehicle's wire harness. Relay activation by grounding the relay coil can be provided by most Powertrain Control Modules. Provides direct battery power, protects PCM from voltage spikes and prevents the fan from back feeding through the vehicle's wire harness.

30133 weatherproof 35 amp ..... 46.99 set

## Delayed Cooling System Shutdown ⚠

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

TF900632 shutdown ..... 178.99 ea

## Cooling Fan Shutdown ⚠

This cooling fan shutdown set shuts down your electric cooling fan above 50-60 MPH to improve engine cooling by preventing the electric fan from fighting airflow through the radiator at highway speeds. The unit is adjustable and may be overridden by using the supplied dash mounted toggle switch. This set is designed to be used with the supplied signal generator which must be installed into the speedometer cable.

TF900627 shutdown ..... 214.99 set

## Thermo Switch — Screw-In ⚠

Wire your dual electric fan/shroud assembly the easy way with this dual shroud wiring harness with relay and sender specifically designed dual electric fan setups. This wiring harness and relay kit will protect your vehicle's electrical system from the added draw of dual electric fans and proper gauge wiring ensures a stable electrical connection. The temperature switch activates "on" at 185 degrees F and shuts off when the temperature drops to 165 degrees F.

40078 185° on/165° off ..... 114.99 ea

Intellitronix  
Motors Electronics

## Variable Speed Fan Controller

Turns your electric fan on and off at your desired temperature. The control is right where it belongs, in your hands. Fans turn on at 60 percent power and fan speed increases as the temperature rises. You can easily adjust the activation temperature between approximately 160-240 degrees F. The fan controller includes a 1/8" NPT thread-in temperature sensor with bushing adapter. It features variable fan speed and a 40 amp rating. It works on 12 Volt systems only.

FN4001 with temp sending unit ..... 153.99 ea

## Electric Fan Controller

Performance Electronics

Includes a 70 amp relay and will work with your existing water temperature gauge, operating from the temperature sending unit already installed. A dedicated sending unit can be installed for applications without a water temperature gauge. Operating range of 150-250 degrees F and features fully programmable "fan on" and "fan off" temperature functions to suit any application. This also gives you the capability to leave the electric fan operating after the engine has been shut down for a user adjustable period of time. High-quality LED readout displays current temperature readings.

**Important:** Must use second relay, either part #DD2701 30 amp relay or DD2702 70 amp relay for dual fan or 2-speed fan operation.

## Adjustable Electric Fan Controller

This Derale high amperage fan controller breaks new ground in the industry of electric fan controllers. A bulletproof design, 35 amp per fan amperage rating, adjustability from 150-240 degrees F, and a die-cast bright finish aluminum cover. It's capable of controlling two separate 35 amp fans at different turn-on temperatures, with only a single probe. The first electric fan will be activated at the temperature set by the user followed by the second electric fan when the temperature becomes 10 degrees F warmer. Each electric fan will turn off at 10 degrees F below its turn-on temperature. Includes: wiring harness, fusible link, all necessary electrical connectors, and push-in style radiator probe.

# V-Belt Style Belts

## 1962-79 V-Belt Style Fan Belt

Make sure your belts are in top condition before starting off on your next road trip. Belts are inexpensive, yet they are an often overlooked component of a restoration or daily driver... that is until something goes wrong. Don't risk the life and longevity of your engine for the sake of a few bucks. Replace your weathered belts before you are stranded due to overheating, dead battery, etc. Better yet, buy a new set to install and keep a spare set just in case you should have a broken belt while on the road with your classic vehicle.

## 1964-79 Performance Water Pump

These "super cooling" pumps are computer designed to deliver more flow at a higher velocity. They're the ideal choice to prevent overheating in any performance vehicle. Precision cast powdered metal impellers have extra large vanes for the maximum flow rate possible, ensuring adequate pressure and volume even at lower engine speeds. They feature a 5/8" pilot shaft. Choose from 3 popular finishes.

## 1964-68 High Volume Small Block Short Water Pump

High-performance, high volume aluminum water pump features balanced distribution and improved efficiency with close tolerance impellers that increase coolant flow over stock pumps. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as improves coolant flow through the radiator. When used with a non-restrictive, high flow thermostat (sold separately) this pump to work to its highest capability. Available in natural aluminum, polished aluminum, or chrome.

## 1962-79 Cast Iron High Flow Water Pump

For over 20 years, Stewart Components has focused on the development and production of high-performance water pumps, resulting in innovations like special high strength castings, larger flow passages, more efficient impellers, and stronger bearings. Every pump is designed to exacting tolerances for reliable, long-term performance, offering maximum flow with minimum power consumption. These pumps deliver up to 180 gpm (gallons per minute) of coolant flow at 8000 RPM, yet consume just 2.26 horsepower at 4000 RPM! Each Stewart pump is hand assembled and tested at 10,000 RPM.

### Stage 1 Cast Iron Water Pumps

These Stage 1 pumps use brand new, original equipment iron castings are internally engineered for performance and reliability. These water pumps feature a 3/4" heavy-duty bearing. Available for V-belt or serpentine belt systems.

### Stage 2 Aluminum Water Pumps

These Stage 2 pumps use brand new, 356-T6 heat treated aluminum castings that are precision machined to be compatible with stock lines and brackets. These water pumps feature a 3/4" heavy-duty bearing. Available for V-belt or serpentine belt systems.

**Important:** These small block water pumps require the use of a high flow, modified thermostat due to the elimination of the factory bypass holes in the Stage 2 pumps. See listings below for available temperatures.

## 1964-79 Water Pump ⚠

These high-performance, high volume water pumps feature close tolerance impellers with balanced distribution and improved efficiency that increase coolant flow up to 30% over stock pumps. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as improves coolant flow through the radiator. Use in conjunction with a non-restrictive, high flow thermostat to enable the pump to work to its highest capability. High-quality steel casings, heavy-duty bearings, and large diameter shafts make these pumps the top of the line in performance water pumps. Direct factory replacements equipped with all hose connections and bosses.

## Electric Water Pump

Eliminates unnecessary weight and impeller-drag experienced at high RPM, pumps up to 35+ gallons of water per minute, and delivers the cooling that can make the difference between a win and second place! Durable, but lightweight die-cast aluminum, epoxy powder coated for corrosion resistance in the color of your choice. Race or street. Draws 6 amps. Mounting hardware and fitting for water pump is included.

## 1970 Water Pump Pulley

Reproduction factory long water pump pulley for 1970 Nova big block engine models. This is a single groove pulley that measures approximately 6-1/4" in diameter. For models with or without air conditioning. Shallow single groove design. GM number stamped on pulley is 3976059AO.

14543 1970 3976059, 6-1/4" ..... 39.99 ea

## Warning: concerning water pump pulleys

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys. Please be sure to install the pulley properly to avoid damages that could occur from improper installation or exceeding the recommended RPM limitations.

-------	---------	-------------------	----------

## Water Outlet Restrictors

If coolant travels too fast, it doesn't absorb enough heat inside the engine or properly cool down as it passes through the radiator. That's why it is still important to restrict coolant flow in applications where a thermostat isn't desired. These restrictors come in a set of three with a 5/8", 3/4", and 1" hole to allow adjustment for optimum cooling. Each 2-1/8" plate is made from anodized aluminum and fits under the water outlet in place of the thermostat.

## 1962-79 Billet Aluminum Thermostat Housing

Billet Specialties thermostat housings are precision machined from 6061-T6 billet aluminum and feature a polished or black anodized finish. With this housing no gaskets are needed since the housing seals with an o-ring. Housing fits 1-1/2" i.d. hoses and swivels for proper hose alignment. Stainless steel hardware included.

## Billet Aluminum LS Thermostat Housing

Billet Specialties aluminum thermostat housings for Chevy LS with 1-1/2" radiator hose. These water necks are precision machined from 6061-T6 billet aluminum to accommodate LS style thermostats and seals. Available in straight or 15 degree swivel designs and in polished or black anodized finishes. Made in USA.

**Note:** Will not fit early water pumps 1997-03 that have a 1 piece thermostat housing. (thermostat is locked into housing with aluminum tabs on each side) The hole diameter in the pump is 2.052" (2-1/16"). Installing this housing on an older style pump will result in leaks.

## 1962-74 SureFit Climate Control Kit for Serpentine Drive

This Sure Fit Gen 5 Climate Control kit includes everything you need, and nothing you don't! It was designed specifically for those who have upgraded their motor with a serpentine belt drive system and do not need a compressor and mounting brackets. You still get the same evaporator assembly, fly-by-wire controls, condenser, dryer, safety switch, firewall plate, and preformed aluminum lines as in the complete kit. These kits are designed to install with minimal drilling and no fabrication required. Be sure to order the adapter kit required for your compressor.

**Important:** Refrigerant is not included.

**Note:** Special order.

## Reduced Barrier Hose Kit

Reduced barrier hoses have the same i.d. as standard barrier AC hoses. However, the wall thickness of a reduced barrier hose is thinner which creates a smaller o.d. hose. This allows for a cleaner look that takes less space and can make tighter bends than standard barrier AC hose. Vintage Air reduced barrier hose kits are available with finished hoses for the stock configuration or open-ended hoses for modified configurations. Kits include: hoses, beadlock fittings, o-rings, and mounting hardware.

## 1962-79 Aluminum AC Compressor ⚠

This is a 10 cylinder "bolt-in" direct replacement for the GM Frigidare/Harrison A6 compressor. This new design is specifically engineered to fit the A6 mounting brackets and AC hose assemblies. This highly efficient compressor offers a smoother, quieter operation, creating less vibration and engine drag, increased fuel mileage, improved engine and cooling system performance. The aluminum body is 52% lighter than the original A6. Designed to accept both superheat and high pressure safety switches. This compressor is supplied with a single groove clutch and has a 210cc displacement. Compressor is pre-oiled and compatible with R12 or R134a. Fits 1962-79 Chevy II/ Nova models with the A6 Compressor. Includes hardware and instructions.

## SanDen Style "Peanut" AC Compressor ⚠

New, not rebuilt, SanDen SD706/SD7B10 "Peanut" style air conditioning compressors. The compact SD7B10 is becoming one of the most popular compressors for original equipment manufacturers or aftermarket. SD706s rob less horsepower resulting in improved fuel economy and increased performance. They feature a modern rotary internals that reduces noise and vibration. Their extremely compact design is half the weight and bulk of most OE units. With mounting ears on the front and rear and on both sides, these compressors are very easily adapted to most engines.

## 1968-72 Compressor Mounting Stud

Correct replacement stud used to mount the AC compressor on all 1968-72 big block engines. 2 required per vehicle. Sold as a pair.

1256625 1968-72 BB ..... 16.99 pr

## AC Relocation Bracket

This steel air conditioning bracket relocates the air conditioning compressor to the left of the engine. Designed to allow clearance for headers in specific pre-1979 small block Chevy applications.

7608 1955-79 ..... 36.99 ea

## 1970-77 AC Bracket

This air conditioning bracket is manufactured with high-quality stamped 3/16" triple chrome-plated steel. It is designed for mounting long style axial air conditioning compressors on Chevy small block engines up to 1977. The bracket will fit with both headers and stock exhaust manifolds. When installed with headers 1" header bolts must be used.

T9513 1970-77 SB ..... 7.99 ea

## 1968-69 Condenser Brackets

Reproduction bracket used to mount the air conditioning condenser to the radiator support. For all 1968-69 small block or big blocks with AC. Includes LH and RH bracket.

K258 1968-69 ..... 27.99 pr

## 1967-74 AC Condenser

Reproduction condensers are available for your early or late model Chevy II/Nova. If your Nova was originally equipped with air conditioning and you just can't seem to get that cold air you once enjoyed, the original condenser may not be working at peak performance.
