

RADIATORS

OEER AUTHORIZED

1962-79 Restoration Radiator

CRD1423A

Made in USA

OEER[®] Authorized radiators install exactly like original. Each radiator is equipped with a new tank and core. No rebuilt! Features original style mounting brackets attached and installs as original to the radiator support. The fan shroud must be replaced if you are installing a radiator for air conditioned models on a vehicle which did not include factory air. This helps to maintain a correct fit and sufficient air flow to the engine. All radiators include a 6-month limited warranty. Made in USA.

No Exchange Required! No Core Charge!

Important: Fan shrouds, fan shroud brackets, radiator petcock, radiator cap and shroud mounting clips are available separately. Due to dimensional differences, fan shrouds are not interchangeable between air conditioned models and non-air conditioned models.

AT=Automatic Transmission, MT=Manual Transmission, AC=Air Conditioning.

Note: These are all-metal replacements for original plastic tank composite GM radiators. *Recessed side brackets. Shipped overweight.

1962-79 Aluminum Cooling System

These all-aluminum radiators are up to 40% lighter than traditional copper/brass radiators and feature high-quality aluminum welds to enhance the appearance of your car. Complete module cooling systems that include an aluminum radiator, aluminum radiator cap, electric fans with black shroud, aluminum vented coolant recovery tank, aluminum fan mounting brackets, electric fan wiring harness, and all necessary installation hardware. Available in a beautiful polished finish or a non-polished finish. Dimensions listed below are the core size of the radiator.

Note: Special shipping charges apply. Shipped overweight.

AC, HEATER & COOLING SYSTEM

Radiators

1962-79 Nova Aluminum Radiator

Constructed of 100% aluminum, these racing radiators are built using no epoxy for trouble free service. Aluminum radiators have shown to be 15% more efficient than factory copper brass type radiators. This radiator fits in the factory mounting location with predrilled brackets for easy installation. The factory fan shroud can be reused without modifications while the inlet and outlet are in the stock locations so the factory style radiator hoses can be used. As with most radiators, automatics are available with a built-in transmission cooler with the correct dimensions to use the factory transmission lines.

Important: 1962-67 crossflow radiators require modifications to mount. Transmission cooler lines must be rerouted and factory fan shroud will not fit.

Note: *SB, **SB/BB, †With automatic transmission. Shipped oversize.

1962-79 Polished Aluminum Performance Radiator

Keep your engine cool with one of these polished high-performance aluminum radiators. Manufactured from TIG welded aircraft grade aluminum with brazed aluminum cores and billet filler necks, each radiator offers high capacity cooling with lowered fins and 3/8" spacing between core tubes. Designed for direct fit installation. Radiator cap is included.

Important: All radiators have built in automatic transmission coolers and can be used in both automatic and manual transmission applications.

Note: Shipped oversize.

1962-79 Aluminum Radiators

Improve the cooling capacity of your engine with Cold-Case performance radiators for 1962-79 Nova models.

Feature an all aluminum construction that is good at dissipating heat and saving energy, with 2 oversized cooling rows, and polished stamped tanks. All Cold-Case radiators are 100% TIG welded, pressure tested, and includes OE style fittings for both automatic and manual applications. All radiators manufactured by Cold Case are guaranteed to be free from material and workmanship defects for the life of your installation. Does not include the cap, sold separate.

MISHIMOTO

New!

"Liquid Chill" Engine Coolant and Additive

Mishimoto's Liquid Chill is a universal, synthetic coolant that will provide premium cooling and protection for your vehicle. Liquid Chill protects from boil over to 265 degrees F and from freezing down to -26 degrees F, inhibits corrosion, and reduces operating temps. Made with propylene glycol base and unique poly organic additives to allow for extended life of 2+ years or 250,000 miles before needing service in gasoline applications. One gallon jugs are available in full strength formula or 50/50 blend. For up to 30 degrees F cooler over just coolant alone, the universal Liquid Chill additive is available in 4 oz. bottles.

MM13067	additive.....	16.99 ea

J-B Weld Cold Weld

Made in U.S.A.

New!

J-B Weld is a great alternative to welding, soldering and brazing. This two part system is mixed at a ratio of 1:1; it forms a permanent bond and can be shaped, tapped, filed, sanded, painted and drilled after curing.

Cold weld will bond to most clean and dry surfaces and sets in 1-2 hours and will fully cure in 16-24 hours. Waterproof, petroleum, chemical, and acid resistant when fully cured. Non-toxic and temperature resistant up to 600 degrees F. Cure color is dark gray. Made in USA.

JB8265	2 x 1 oz. tubes.....	5.49 ea
JB8280	2 x 5 oz. tubes.....	15.99 ea

Super Coolant

ROYAL PURPLE

Purple Ice is a high-performance, synthetic, radiator coolant additive. It reduces engine heat by reducing the surface tension of the radiator fluids for improved heat transfer. Purple Ice fosters optimum coolant flow by helping to prevent formation of scale deposits in the radiator. Purple Ice is recommended for any water/glycol pressurized cooling system, including those using the traditional green silicate based glycols or the newer OAT or HOAT based glycols.

RP01600	12 oz. bottle.....	11.99 ea
RP12600	case of 12 - 12 oz. bottles.....	129.99 ea

JOE GIUBBS
DRIVEN
BY OIL

Coolant System Protector

Impurities in well water can cause rust and corrosion inside the radiator, water pump, and cylinder heads. Over time, this can lead to a loss of cooling efficiency. Joe Gibbs Driven Coolant System Protector stops the adverse effect of hard water to help prevent cooling system damage.

JG1330	12 oz. bottle.....	8.99 ea

1962-67 OE Style Radiator Cap Hollow Rivet

Authentic reproduction of the original radiator cap designed for the enthusiast who wants total originality in a reproduction cap. Features the correct cap rating along with all the correct markings as original. Long discontinued, the current GM replacement and other reproduction caps do not accurately represent the original cap. One of the features that sets OER's reproduction cap apart is the correct divot in the brass rivet in the center of the cap, just like the original. OER's reproduction is an exact replica of the original featuring correct markings as well as an accurate cosmetic appearance of the rivet in the center of the cap.

Syclone Electric Fan

The amazing Flex-a-lite Syclone electric fan is the most efficient S-Blade fan blade on the market! This quiet fan mounts to the core and can be used to push or pull air through the radiator. The higher torque (17 amp) motor produces 2500 cfm of air flow, making these fans strong enough to replace your belt driven fan and fan clutch to gain more horsepower and torque. The sweep style blades squeeze out the maximum air flow possible. 16-5/8" x 15-3/4" x 4" mount. Universal mounting brackets are included.

FL398 16" fan 131.99 ea

Black Magic S-Blade

If your vehicle is still running the factory engine driven fan, you're losing vital horsepower and not even getting the full cooling effect you should! By replacing your engine driven fan with an efficient electric unit, you can reduce unneeded drag on your engine to free up horsepower and improve your fuel economy. An engine driven fan can cost up to 17 HP to operate! This universal fit Flex-a-lite electric fan features computer engineered blades that are extremely quiet and efficient, and moves 3000 cfm of air to provide consistent cooling, regardless of engine RPM. Ring fans like this provide better blade support for impact resistance. This electric fan fits vehicles with 16" or wider radiator cores, and requires a mounting surface of 18" x 16" x 4-1/4" for an easy, bolt-in installation. Universal mounting brackets are included.

FL160 259.99 ea

Fan Switch

SPAL replacement temperature fan switch. Manufactured from stainless steel, hermetically sealed and feature a 3/8" NPT. Operating switch range 35 degrees F to 480 degrees F and max current/voltage 3 amp, 32 VDC and grounded case only.

Improves Horsepower, Extends Water Pump Life and Cools Faster!

Used as a primary fan, this unit frees up wasted horsepower and increases fuel mileage by eliminating drag caused by your standard engine mounted fan. Also increases water pump life by reducing strain on the water pump bearing assembly. When mounted in front of the radiator and used as an auxiliary fan in addition to your stock belt driven fan, this electric fan provides better cooling in any engine prone to overheating.

Adjustable Electric Fan Thermostat Set

This set is designed to allow a wide range of temperature adjustments for your electric fan. The adjustment knob may be used to set a precise temperature desired for fan activation. The mounting bracket is made of brushed stainless steel for good looks and durability. The complete set includes the thermostat with bracket, a 30 amp relay, a 30 amp circuit breaker for overall protection, wiring, terminals, and mounting hardware.

Specs on Adjustable Fan Thermostat:

Temp range - 32 degrees F to 248 degrees F
Accuracy: +/- 7.3 degrees F
Differential: 7.3 degrees F +/- 3.6 degrees F

Important: Temperature refers to the temp of the capillary tube, not the coolant temp.

30104	standard.....	86.99 set
30112	without relay.....	54.99 set

Electric Fan Controller

Includes a 70 amp relay and will work with your existing water temperature gauge, operating from the temperature sending unit already installed. A dedicated sending unit can be installed for applications without a water temperature gauge. Operating range of 150-250 degrees F and features fully programmable "fan on" and "fan off" temperature functions to suit any application. This also gives you the capability to leave the electric fan operating after the engine has been shut down for a user adjustable period of time. High-quality LED readout displays current temperature readings.

Important: Must use second relay, either part #DD2701 30 amp relay or DD2702 70 amp relay for dual fan or 2-speed fan operation.

"Ice Box" Cooling Fan Control

Available as a dual fan 2-speed fan control unit. The sensor is simply tightened under an intake or water pump bolt. It can then be adjusted to your exact preference for on and off temperature. It is equipped with an AC Request system to turn the cooling fan on whenever the AC compressor engages (this feature does not have to be used). The dual fan control can operate two fans at different temperatures or a single 2-speed fan at different temperatures. Each unit has a fully adjustable operating range of 140-230 degrees F.

Note: With Walker 2-speed fans.

TF900635	dual control.....	151.99 ea
----------	-------------------	-----------

Delayed Cooling System Shutdown

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

TF900632	151.99 ea
----------	-------	-----------

Cooling Fan Shutdown

This cooling fan shutdown kit shuts down your electric cooling fan above 50-60 MPH to improve engine cooling by preventing the electric fan from fighting airflow through the radiator at highway speeds. The unit is adjustable and may be overridden by using the supplied dash mounted toggle switch. This kit is designed to be installed with the supplied signal generator which must be installed into the speedometer cable.

TF900627	193.99 ea
----------	-------	-----------

MISHIMOTO

Fan Controller Set

The Mishimoto fan controller set is applicable to any 12V electric fan and includes all necessary components for installation. Features adjustable activation from 150 to 240 degrees F and deactivates once temperatures are reduced by 10 degrees F. This controller includes a built-in AC override feature and is designed for use with 1-2 electric fans drawing a combined 25 amps or less.

Flexible Hose Set

Ideal replacements for worn or rotted radiator and heater hoses. Non-corrosive stainless steel construction conforms to tight bends and holds shape indefinitely. Rated for high temperatures and high pressure, these ultimate radiator hose sets come complete with 1 length of stainless tubing, 2 rubber sleeves, 4 reducer inserts, 4 stainless steel hose clamps, and 2 chrome or polished aluminum end covers. Heater hose sets come with 2 (44") hoses, 4 sleeves, 4 reducers, 8 hose clamps and 4 polished or chrome end caps. Easily cuts to custom lengths, these high-quality sets will enhance any engine compartment. Choose from polished aluminum or chrome finished ends.

Note: 48" radiator hose set have double quantity of end caps, sleeves, reducers, and clamps.

1962-79 Heater Hoses

Reproduction heater hoses are available in both required lengths. These hoses can be used for nearly all applications from 1962-79.

Note: C1A, K0057, YE5210 and YE5215 may be used with small block or big block applications.

Heater Hoses - Reproduction				
C1A	1962-79	with GM markings	18.99	set
K0057	1962-79	with ribbed hose	29.99	set

Heater Hoses - Replacement				
C1	1962-79	SB (set)	20.99	set
C2	1968-72	BB (set)	17.99	set
YE5210	1962-79	5/8" x 5 feet	5.99	ea
YE5215	1962-79	3/4" x 5 feet	4.99	ea

1962-69 Radiator Overflow Hose

This is a correct replacement hose for the radiator overflow. It is produced with correct OEM style thin walled hose as original. This is an often overlooked hose which is notorious for deterioration.

B0056	1962-69	3 feet of hose	4.99	ea
-------	---------	----------------	------	----

Hose Clamps

Radiator Hose Reducer Bushing

These are designed for custom applications to allow the use of a larger i.d. radiator hose with smaller inlets and outlets on radiators, water pumps and thermostat housings. Simply insert them into the hose before installation.

K1231 2" i.d. to 1-3/4" i.d. 12.99 ea

Hose Clamp Pliers

This handy tool removes and installs spring tension hose clamps used on heater and radiator hoses. Adjustable tips screw in and out to fit clamps of all sizes. Ratcheting lock mechanism holds the clamp in an open position for easy removal and installation. Tips can be switched to accommodate different applications. Offset jaws allow access in hard to reach areas.

Y17100 hose clamp pliers 23.99 ea

Goodyear Belts

1962-79 Goodyear Belt

Make sure your belts are in top condition before starting off on your next road trip. Belts are inexpensive, yet they are an often overlooked component of a motorist's car or daily driver... that is until something goes wrong. Don't risk the life and longevity of your engine for the sake of a few bucks. Replace your weathered belts before you are stranded due to overheating, dead battery, etc. Better yet, buy a new set to install and keep a spare set just in case you should have a broken belt while on the road with your classic vehicle.

1964-79 Performance Water Pump

These "super cooling" pumps are computer designed to deliver more flow at a higher velocity. They're the ideal choice to prevent overheating in any performance vehicle. Precision cast powdered metal impellers have extra large vanes for the maximum flow rate possible, ensuring adequate pressure and volume even at lower engine speeds. They feature a 5/8" pilot shaft. Choose from 3 popular finishes.

153654C

1964-68 High Volume Small Block Short Water Pump

High-performance, high volume aluminum water pump features balanced distribution and improved efficiency with close tolerance impellers that increase coolant flow over stock pumps. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as improves coolant flow through the radiator. When used with a non-restrictive, high flow thermostat (sold separately) this pump to work to its highest capability. Available in natural aluminum, polished aluminum, or chrome.

WP12203

WP21104

1962-79 Cast Iron High Flow Water Pump

For over 20 years, Stewart Components has focused on the development and production of high-performance water pumps, resulting in innovations like special high strength castings, larger flow passages, more efficient impellers, and stronger bearings. Every pump is designed to exacting tolerances for reliable, long-term performance, offering maximum flow with minimum power consumption. These pumps deliver up to 180 gpm (gallons per minute) of coolant flow at 8000 RPM, yet consume just 2.26 horsepower at 4000 RPM! Each Stewart pump is hand assembled and tested at 10,000 RPM.

Stage 1 Cast Iron Water Pumps

These Stage 1 pumps use brand new, original equipment iron castings are internally engineered for performance and reliability. These water pumps feature a 3/4" heavy-duty bearing. Available for V-belt or serpentine belt systems.

Stage 2 Aluminum Water Pumps

These Stage 2 pumps use brand new, 356-T6 heat treated aluminum castings that are precision machined to be compatible with stock lines and brackets. These water pumps feature a 3/4" heavy-duty bearing. Available for V-belt or serpentine belt systems.

Important: These small block water pumps require the use of a high flow, modified thermostat due to the elimination of the factory bypass holes in the Stage 2 pumps. See listings below for available temperatures.

16210

1964-79 Water Pump

These high-performance, high volume water pumps feature close tolerance impellers with balanced distribution and improved efficiency that increase coolant flow up to 30% over stock pumps. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as improves coolant flow through the radiator. Use in conjunction with a non-restrictive, high flow thermostat to enable the pump to work to its highest capability. High-quality steel casings, heavy-duty bearings and large diameter shafts make these pumps the top of the line in performance water pumps. Direct factory replacements equipped with all hose connections and bosses.

1964-68 Water Pump Rebuild Set

These components are required when trying to rebuild an original water pump designed for 1964-68 models.

WPK402 1964-68 283, 327 66.99 set

The Original Electric Water Pump Drive Set

The electric water pump drive set was designed to alleviate the power drag produced by conventional pulley drive units. A heavy-duty electric motor, turning at approximately 1500 RPM, is more than adequate to fulfill cooling needs without draining precious horsepower from the engine. This unit can be turned on and off manually, during a run, or before and afterwards, even with engine off. The set is complete with motor mounting bracket, extra long bolts, spline pulleys, drive belt, wiring, and switch. You supply the fan of your choice.

14546 1969-78.....	44.99 ea
--------------------	----------

Warning: concerning water pump pulleys

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries assumes no liability for damages caused by improper usage of pulleys. Please be sure to install the pulley properly to avoid damages that could occur from improper installation or exceeding the recommended RPM limitations.

Water Necks

Thermostats

1966-73 Water Outlet Mounting Bolts

Correct original style water outlet attachment bolt kit featuring "WB" and "TR" head marks. Includes: one 3/8"-16 x 2-1/8" bolt with "WB" head mark, and one 3/8"-16 x 1-1/8" bolt with "TR" head mark.

1256605 1966-73 6.99 pr

1968-74 Water Outlet Attaching Stud

Originally found on 1968-74 327 and 350 engines. After years of use, the attachment stud on the water outlet can corrode or break off. Simply replace the stud by threading it into your intake manifold. 3/8"-16 threading on both ends.

1256606 1968-74 7.99 ea

High Flow Thermostat

The "Balanced Sleeve" design of these High Flow Thermostats equals out the pressure exerted on it by a high flow water pump allowing it to be solely regulated by coolant temperature. Stock thermostats tend to be held closed by the pressure of performance water pumps causing the engine to run hot and lose power. With the addition of a high-performance water pump and high flow thermostat, you can expect a temperature drop of up to 25 degrees F on drives around town.

16400 160 degrees F 27.99 ea

16401 180 degrees F 27.99 ea

Glass Thermostat Assembly

This 2" thermostat assembly allows you to see when and how far the thermostat opens on a unique gradient scale without ever removing the radiator cap. Made from billet aluminum and the same specialized heavy borosilicate glass used in steam boiler systems. Fits all small and big block Chevrolet engines that use a non-bypass type thermostat, 1955 and up. Also fits all 216-292 straight 6 engines from 1937-90. Made in USA.

Important: Index pointer and gradient scale are only included in sets with thermostat.

Note: Bolts not included.

AR13742 Hex head 11.99 set

Stainless

AR43741 12 point 10.99 set

AR43742 Hex head 9.99 set

Water Outlet Restrictors

If coolant travels too fast, it doesn't absorb enough heat inside the engine or properly cool down as it passes through the radiator. That's why it is still important to restrict coolant flow in applications where a thermostat isn't desired. These restrictors come in a set of three with a 5/8", 3/4", and 1" hole to allow adjustment for optimum cooling. Each 2-1/8" plate is made from anodized aluminum and fits under the water outlet in place of the thermostat.

Keep Your Nova COOL

with Vintage Air Gen-IV "Fly-by-Wire"
"No Cable/Vacuum Hose" AC Systems

The Gen-IV systems feature all electronic controls requiring no cables, capillary tube or vacuum connections. They are truly "fly-by-wire" systems that use separate heating and cooling coils for superior performance. The internal air control doors are servo operated to provide infinite dash, floor and defrost blending.

961166

Gen-IV SureFit Climate Control Features:

- Evaporator/Heater/Defroster Assembly
- Electronic Heater Control Conversion
- All Ducts and Vents
- Super Flow Condenser
- Sanden Compressor
- Compressor Mounting Brackets
- All Hoses, Lines, Brackets, and Hardware
- Dryer
- Stamped Steel Fresh Air Cover
- Complete Set of Instructions

New!

1962-74 Gen-IV™ System

The Gen IV is Vintage Air's most powerful and intelligent climate control system, engineered specifically for each vehicle to install with minimal modification. Gen IV even lets you use factory controls to operate its fully electronic microprocessor system that eliminates unnecessary cables, capillary tubes, and vacuum connections. This system offers infinitely variable dash/floor/defrost blend and uses separate heat and cooling coils provide great performance and instant adjustment. Includes: Super Flow condenser, compressor, mounting brackets, dryer, safety switch, preformed aluminum lines, firewall cover plate and all mounting hardware, everything you need to give your 1962-74 Chevy II/Nova a modern AC and heating system. The Gen-IV is offered as a complete set or an evaporator set with everything needed for the inside of your vehicle. These units are made for your specific vehicle and are non returnable. Allow 3-4 weeks for delivery.

Important: R134A refrigerant only. Some installations may require additional engine pulleys not included with sets. V-halts not included.

Note: Shipped overweight.

- Infinite blower speed

1962-74 Sure Fit Climate Control Kits for Serpentine Drive

This Sure Fit Climate Control kit includes everything you need, and nothing you don't! It was designed specifically for those who have upgraded their motor with a serpentine belt drive system and do not need a compressor and mounting brackets. You still get the same evaporator assembly, fly-by-wire controls, condenser, dryer, safety switch, firewall plate, and preformed aluminum lines as in the complete set. These kits are designed to install with minimal drilling and no fabrication required. Be sure to order the adapter kit required for your compressor.

Important: Refrigerant is not included.

Note: Special order.

Air Conditioning

1962-79 Aluminum AC Compressor

This is a 10 cylinder "bolt-in" direct replacement for the GM Fridgidaire/Harrison A6 compressor. This new design is specifically engineered to fit the A6 mounting brackets and AC hose assemblies. This highly efficient compressor offers a smoother, quieter operation, creating less vibration and engine drag, increased fuel mileage, improved engine and cooling system performance. The aluminum body is 52% lighter than the original A6. Designed to accept both superheat and high pressure safety switches. This compressor is supplied with a single groove clutch and has a 210cc displacement. Compressor is pre-oiled and compatible with R12 or R134a. Fits 1962-79 Chevy II Nova models with the A6 Compressor. Includes hardware and instructions.
