1962-76 Reproduction Delco Energizer® Battery

Give your Nova total originality with a reproduction maintenance-free hard top Delco Energizer® battery, manufactured with the original tooling using today's technology. These 780 CCA batteries are correct in every detail for each respective year. The early style screw-in caps have Delco lettering and are the correct color for each year, while the later style push-in caps reproduce the "split ring" logo and include one "Delco-Eye" hydrometer cap. Each battery case is manufactured in the original dimensions with correct texture, featuring "Delco" lettering and reproduction assembly line battery decals where applicable. These maintenance-free reproduction batteries are shipped ready to use, and are an excellent choice for finishing the engine compartment of your restoration. Don't forget to check the condition of your battery tray and cables for rust and corrosion.

CAUTION: Maintenance-free batteries are Gel-Cell type batteries and DO NOT require adding electrolyte (battery acid).

Note: Batteries carry a 48-month manufacturer's warranty. Shipped overweight.

Yellow Top Battery

With premium cranking power, low internal resistance, and unparallelled cycling capability (rechargeability), the Yellow Top AGM battery is a true dual purpose automotive battery. It handles deep power drains and recharges to full capacity so it can power plenty of electronics and still start the engine time after time. Perfect for vehicles with multiple electronic systems or high demand audio.

Battery Carrying Strap

This handy tool is a must for your tool box. Allows you to easily carry bulky automotive batteries without getting acid on your clothes and hands. Each end is marked and sized to fit the positive or negative terminals allowing a secure, tight fit onto the post. Battery acid won't harm the strap! For top post batteries only.

X205 carries top mount 6.99 ea

Battery Mat — Acid Neutralizer

The Battery Mat offers protection against undetected battery acid leaks. Once installed, the mat will trap and neutralize any battery acid that leaks from the terminals or top side of the battery, preventing corrosion and expensive damage. Each mat is made of super absorbent polypropylene needle punch felt, with one side heat treated to give it additional strength. The mat is inserted under the battery between the battery and the battery tray. It can easily be installed at any time either when replacing the battery tray or battery.

BM2427 yellow mat 6.99 ea
BM2428 black mat 6.99 ea

Battery Lifesaver — Corrosion Remover

Lead acid batteries will discharge, deteriorate and die without regular use or recharging because of corrosion and sulfates on the plates. This module, developed specifically for vehicles that are not driven on a regular basis to keep their battery fully charged, will actually recover lost battery capacity by removing plate corrosion, and in turn, extend battery life up to double or triple the normal life span!

BLS1 29.99 ea

Battery Accessories & Tools

Protect Your Vehicle from Corrosive Battery Acid!

Prolong battery life and protect your vehicle's battery tray, underhood and radiator support area with the world's only acid-neutralizing heat barrier mat. It reflects over 90% of radiant heat, traps and neutralizes battery acid, protects against corrosion, is recyclable, protects the environment, and is inexpensive and easy-to-install. The Battery Heat Barrier™ set is completely safe to handle before and during installation. So effective, it is used by all branches of the United States military. Set consists of: one 8" x 40" acid absorbing/neutralizing felt and one adhesive backed 8" x 40" aluminumized thermal barrier to wrap around the battery, plus an 8" x 12" acid absorbing/neutralizing pad to put beneath the battery. Install one on your vehicle NOW, before it's too late.

TT1001 battery heat shield..... 28.99 set

Battery Switch

These battery switches are easy-to-install on the negative battery post and disconnect the battery by simply loosening the knob a few turns. To reconnect just retighten the knob. The knob can be removed completely to deter theft. Rated at 500 amps surge and 125 continuous at 12 Volts. Available with a 15 amp fused bypass that maintains computer settings, radio, clock etc., while the battery is disconnected.

OE Style Wiring Harnesses

OE Style Reproduction Wiring Harnesses

Reproduced using the original General Motors schematics and feature the correct attachment connectors and wire in the correct gauge sizes and coloration (when available) to match your original and maintain authenticity. When ordering wiring harnesses is it essential to supply as much information as possible regarding your Nova's optional equipment including the year, engine size, transmission type, or any and all factory options. This will ensure you are getting the correct harness for your particular application.

OE Style or Universal?

Wiring harnesses are labeled either OE style or universal. OE style are reproduced using the original General Motors schematics and feature the correct attachment connectors and wire in the correct gauge sizes and coloration (when available) to match your original and maintain authenticity. Universal may not be reproduced in this manner, and may require modification to fit your specific application.

A 1962-76 OE Style Front Lamp Harnesses

This harness is one of two main harnesses located in the engine compartment. It provides wiring for the main battery power lead, headlamps, parking lamps, 1968-76 side marker lamps, horn relay, alternator, voltage regulator, temperature sensor, brake warning, and ammeter gauge. These harnesses are produced as closely as possible to original specifications including correct colored wire.

Aftermarket Halogen Headlamp Harness

Some factory headlamp wiring is not designed to handle high power Halogen headlamps, especially when upgrading to a higher wattage. Our headlamp harnesses draw power directly from the battery, through a relay, to the headlamps, providing full power to your H4 conversion headlamps or Halogen sealed beams. They are made with TXL high temp wire, weather resistant 30 amp fuse, and two 40 amp weather resistant relays capable of handling up to 150 watts. #30815 and #30816 are for use on vehicles with a 2-headlamp system using dual filament sealed beams or H4 headlamp conversions. 30817 is for use on vehicles with a 9005 and 9006 bulb on each side.

1963-76 Console Wiring Harness

If you are rewiring your console lamps, or neutral safety switch, these harnesses will let you do it the easy way, with one complete harness. Each of these console gauge harnesses is a perfect duplication of the original, including the correct color and gauge wires. Perfect for replacing damaged originals or as part of a console gauge conversion for a Nova not originally equipped with gauges.

Important: In order to correctly convert your Nova to console gauges, you must also replace your under dash, engine and front light harnesses.

Universal Wiring Harnesses

Instrument cluster wiring is designed with a "cluster harness disconnect" system for easy service and adjustment. All original terminals, connectors, and light sockets are also supplied for original cluster gages. Any aftermarket gage system can be easily and neatly wired in.

Engine wiring includes connectors for points type and HEI distributors. Power and tach connectors supplied for GM HEI distributors. Alternator connectors supplied for GM "S" series internal regulator alternators.

Engine wiring includes starter and gauge sender leads for water pump, oil pressure, and tach. Heavy 8 gauge alternator leads are supplied. Power circuits are fuseable link protected.

Fuse box and custom mounting plate are designed for a bolt-in under dash installation. Standard fuses and horn relay are mounted on fuse panel.

Steering column connectors will plug directly into most aftermarket columns as well as 1969 and later GM columns which utilize stock GM horn signal switches. The original column can also be used with the supplied master connectors and terminals.

New ignition switch is provided with instant connect. Additional connectors and instructions are provided to use the original switch. Along with wiring for your original dome/lighter, we have also included separate under dash light sockets. DOES NOT INCLUDE DOOR JAMB SWITCHES.

Note: Photo representation not actual harness.

1962-72 Classic Update Wiring Harness Kit

Bring your classic Nova into the 21st Century with a complete wiring harness update kit! This kit accommodates all the popular accessories you may desire including, AC, custom gages, HEI ignition, tilt steering columns, modern charging systems, and also allows for complete flexibility in the engine compartment... such as a V8 engine swap! With this amazing kit, popular accessories, creature comforts or high performance modifications are made very easy! Includes standard headlamp switch.

1962-72 - 16 Fuse, 20 Circuit Wire Harness

These wiring harnesses are built specifically for 1962-72 Chevy II/Nova models. They feature wiring for the entire car and will work with most stock GM steering columns, as well as aftermarket gages such as ididit and Flaming River. Will work fine gauge sets including tach and will address HEI, points and aftermarket distributors, neutral safety switches. Also includes: wiring for high and low beams, indicator lights, parking lamps, turn signal lamps and brake lamps. Will readily accept fuel injection. The wiring is high temperature, fire resistant and color coded. Features the circuit printed on each coil. All sets include a headlight switch, isolated cooling fan relay and color coded instructions. A unique serial number for each harness enables Ron Francis to technically support the installation to you or any subsequent owner.

1994-02 Fuel Injection Engine Swap Wiring Harness Sets

For maximum power with exceptional drivability nothing beats electronic fuel injection. And the easiest way to install a modern fuel injected engine is with one of these proven FI engine wiring harnesses. These harness sets are designed to allow you to properly wire your engine swap from a donor car or crate motor. A variety of harnesses are available to suit 1994-up LT1, LS1 and GM crate engine applications. Each of these kits include detailed instructions and illustrations.

The Detail Zone Wiring

Each set includes the sensor connectors installed on 20 foot lengths of wire for custom installations, connectors for the sensor wires, and a Telovrek panel with installed wiring and connectors to plug into the factory computer. Designed to work with a specific transmission, so be sure to select the correct application from the listing below. Other non-computer controlled automatic and manual transmissions can be used but typically requires ECM reprogramming for best results. 1998-02 ECMs require use of all emissions sensors or a trouble code will occur unless the ECM is reprogrammed.

Note: *Corvette engines must use the Camaro/Firebird ECM in order to use this wiring kit. Also requires use of the 1998 Camaro throttle body for accelerator cable control. This engine utilizes the OBD II diagnostic system and all emissions sensors are not used, trouble codes will set in a factory programmed ECM.

Painless Wiring

The engineers at Painless have worked out all of the connection and routing problems so all you have to do is follow the straight forward instructions for a painless installation. Feature TXL high temp wire that is color coded and labeled with each application for ease of installation. Harnesses for the LS1 applications require 1998 Camaro computer GM606 and a mechanical throttle body.

Important: *Includes a module to bypass the vehicle anti theft system (VATS) incorporated in the computer. Does not include any emissions related connections.

Trunk Mount Chassis Harness

In many street rods and custom cars there is little or no room to mount the fuse block under the dash, forcing modifications to either the vehicle or the harness. Our 12 circuit trunk mount wiring harness provides additional wire from the fuse block to the dash and from the fuse block to the front end, allowing the remote installation of the fuse block in the trunk or behind the rear seat. Like all Painless kits, these fuse blocks come completely pre-wired and terminated for a simple, painless installation. Includes GM column mounted ignition and turn signal plugs.

Universal Wiring Harnesses

Universal Chassis Wiring Harnesses ⚠️

Starting from a blank slate is a daunting task, especially with wiring. Trying to keep your electrical systems running smoothly on a patchwork of old wiring can be a troubleshooting hassle and possibly even a fire hazard. Whether you are planning a series of electrical upgrades or simply need to replace aging, brittle wiring, build your electrical system on a fresh foundation with a quality universal harness. For basic builds, start with a simple kit with wiring provisions for all lamps, horn, fan, wiper, gauges, and all lamps. For more elaborate builds, choose from a selection of advanced wiring solutions. Need to integrate your aftermarket air conditioning? Need extra circuits for a multitude of electronic accessories? With Classic Industries®, there's no limit to what you can do with your wiring.

25 Circuit Universal Chassis Harness

The Painless Pro Series gives you everything you need to wire up your Pro-Touring or custom ride right the first time! Ample length is provided for each circuit, providing you the freedom to route and hide your wiring how you choose. Once you've got the harness fit how you like it, included are over 25 GM factory style connectors found on most '60s to early '90s GM switches, allowing you to turn the Pro Series harness into a direct fit harness for your application. LED ATC bladed fuses get you away from the old hard-to-find glass fuses, and will light up if blown making troubleshooting a painless task. The 6 gauge charge wire and midsize fuse (no more problematic fusible link!) will keep up with today's high ampere alternators, and the provided front and rear ground harnesses making grounding your lighting circuits a breeze! Provided with many GM connectors and terminal, insulated and non-insulated butt splices, heat shrink, grommets, cable ties, ground straps, and cable tie clips, the Pro Series brings a new meaning to truly Painless wiring and includes our lifetime guarantee.

PAINLESS 14 and 20 Circuit Universal Fuse Block

Use these 14 or 20 circuit OEM style prewired fuse blocks to replace your existing fuse block or as a starting point for custom wiring. All you have to do is terminate your circuit wire and attach it to the fuse block. Prewired and labeled for the following circuits: Air conditioning/heat, gauges/dash instruments, brake lamps, headlamps, coil, horn, dome lamp, radio, electric fan, turn signals, emergency flashers, wipers, and alternator. The 20-circuit fuse block also includes circuits for power windows, door locks and other optional accessories. Kits include: mounting bracket, fuses, flashers, horn relay, terminals, and full instructions.

Important: No wire included with these kits.

30003 20 circuit 224.99 ea

24 piece accessory connector set Accessory Connector Pack

Add power accessories without cutting or splicing. This 24 piece connector set includes a variety of power tap and connector types to connect any power accessory. Includes: 2 taps for ATO fuse blocks, 2 taps for ATM mini fuse blocks, 2 taps for AGS fuses, 2 taps for chassis or top post battery, 2 taps for chassis or side terminal battery, 4 red terminals for 18-22 gauge wire, 4 blue terminals for 14-16 gauge wire, 2 yellow terminals for 10-12 gauge wire, 2 top post accessory bolts, and 2 side terminal accessory bolts.

W30955 connector set 24 piece 15.99 set

Electrical System Surge Protector

Voltage spikes can cause damage to various components in your vehicle's electrical system. This easy-to-install device clips the spikes at 14.5 Volts to protect sensitive electrical accessories. Installs between positive and negative battery terminals.

OEM

Add Fused Circuits with the CirKit Boss!

Add electrical accessories the safe way with a CirKit Boss! This sets allows you to add three fused circuits to your existing fuse block. Simply mount the fuse block and relay, route the 10 gauge wire to the battery, route the ignition wire, then route the accessory circuits. Main power wire is 8 feet long from fuse block. Each accessory circuit has 8 feet of wire length from fuse block. Includes: one 70 amp SPST relay, relay base/fuse block with harness, crimp-on terminals, and mounting hardware.

70114 3 circuit 90.99 set

Circuit Add-on Isolator

The circuit add-on isolator provides a solution when additional circuits are needed, or accessory equipment requires ignition hot and constant hot capabilities. This is the only add on fuse center available with ignition hot capabilities. Now available in three or seven circuit models depending on your application.

70103 three circuit 67.99 ea
70107 seven circuit 80.99 ea

Fuse Tap/Fuse Holder

You can now add circuits without cutting or splicing into your wire harness with this Tap-a-Circuit fuse holder. These will work with ATO and mini blade style fuses. This is a fast and easy way to add additional accessories such as CD players, car phones, radar detectors, 2 way radios and more.

Note: Accessories must not exceed 10 amps.

PAINLESS

RON FRANCIS

TF900629

Remote Battery Disconnect

With this setup, one click of the key fob completely shuts down your vehicle's entire electrical system. It's accomplished by routing your main battery cable through a remote cutoff solenoid that you've stashed in a place inaccessible to a thief. For even more security, the 4 channel "Safe-n-Sound" system not only shuts off all power from the battery, but will also control 3 other items, like closing the windows, triggering the power door locks, and interrupting electrical power to the fuel pump, all separate from the main battery cutoff. The 4 channel package can handle up to 30 amps worth of electrical equipment.

TF900629 single channel 155.99 ea
TF900628 4 channel 220.99 ea

PAINLESS

Remote Master Disconnect

We offer two Master Disconnect sets with 250 amp continuous duty solenoids designed for use with high amperage alternators. Remote Master Disconnect set 30204 uses a small toggle switch to activate the solenoid. This switch can be hidden anywhere in the vehicle as a theft deterrent. Master Disconnect with emergency push button is perfect for drag race applications as it allows you to install a large emergency push button in easy reach if you need to shut down your vehicle's electrical system in a hurry. Remote master disconnect with mechanical latching solenoid is ideal for everyday vehicle applications and is a simple and effective anti-theft deterrent. It uses a 110 amp continuous duty solenoid which is activated by an easy to hide momentary push button.

Universal Wiring

RON FRANCIS

iStart™ Touch Sensitive Starter System with Advanced Security

This system uses a security module with proximity sensors to disable the ignition switch and keep the doors locked until you come into range. Once inside, a touch sensitive starter button lets you cycle through accessory, ignition, start/crank, and off modes just like a typical ignition switch. Skip directly to start/crank by simply holding the button!

Note: Main control box is 3-1/2" x 6". Security module is 3" x 4". iStart™ button requires 1-1/4" mounting hole.

Universal Fuel Pump Relay Set

A relay will prevent voltage drops at the pump thus maintaining constant fuel pump pressure, and will prevent fuel pump amperage overloads from damaging the electrical system. It's a good idea to relay your fuel pump for the street and a must when you're racing. Choose from a regular fuel pump relay or a weatherproof fuel pump relay which is perfect for the harsh weather conditions, this relay set provides complete protection from the elements and ensure reliable and dependable performance. These sets utilize heavy-duty waterproof relays, weatherproof circuit breaker covers, and extreme condition weatherproof shrinkable crimp-on terminals.

Auxiliary Lamp Relay Set

Install extra driving or fog lamps easily and properly with our auxiliary lamp relay set. Switch can be wired to turn lights on per state law requirements: low beams and auxiliary lamps, high beams and auxiliary lamps, auxiliary lamp operation only. Complete set includes: lighted switch, wiring harness, 30 amp relay, and terminals.

30803 76.99 set

Universal Integrated Turn Signal Set

A common problem faced by rodders and kit car builders is where to mount turn signals since many aftermarket steering columns are not designed to accommodate the necessary wiring and switches. Problem solved, with this new integrated turn signal set from Painless. The toggle switches for both turn signals and flashers can be mounted anywhere. Because the set is designed to be an integrated system, turn signals will work in conjunction with brake lamps.
