7" Crystal Headlamp Bulb ⚠

This headlamp features reinforced multi-surfaced, aluminum reflector, rugged anti-vibration construction. Includes a Sylvania Halogen H4/HB2 12V 65/55W bulb. Replaces H6014/H6024 bulbs. SAE approved.

Note: Headlamp bucket must be cut for replacement style fit.
CP500126 41.99 ea

7" High/Low H4 Headlamp Bulb ⚠

7" headlamp with glass lens and replaceable H4 Halogen bulb replaces H6014/H6024, high and low beam function. H4 bulb included.

Diamond Cut Headlamp Technology ⚠

Replace your standard "yellow light" headlamps with these unique looking Halogen diamond cut headlamps for increased visibility, safety and a unique custom look. These headlamps install much like a standard sealed beam unit, but they allow the use of an H4 Halogen bulb in your choice of color and wattage. For your conversion, we recommend using our wiring harness upgrade set sold separately.

Note: Some modifications may be required.

DP901

OE Style LED Projector Headlamps

Dapper Lighting LED projector headlamps provide the classic look while substantially upgrading the quality and spread of light. If you are looking for stock replacements, you can't go wrong with the OE7 or the OE5. The OE7 delivers up to 3X more light than a traditional H4 conversion, 65% less draw than a sealed beam. OE7 headlamps feature day-time running/park lights, and measure 3-1/2" deep. The OE5 is designed to retain the stock appearance of a factory H4 bulb while delivering up to 300% more light with 65% less draw than a sealed beam. They feature an advanced passive cooling system, adaptive power control, and progressive low/high outputs for increased longevity, performance and visibility.

LED7 Projector Headlamps

Dapper Lighting 7" LED projector headlamps provide the classic look while substantially upgrading the quality and spread of light. These replacement bulbs feature OE style glass lenses, Bi-LED projectors, and a slim flat base design (3.2" deep without bulb). These features eliminate the extra wiring and bucket modifications associated with HID lighting. They offer a quick and clean install and a significant increase in performance, reliability, and safety. Available with chrome or black housings and with or without halos. The halos are available in solid, dashed, and HDR styles.

Note: RGB halos require a controller sold separately.

Round Headlamps with LED Halo

RedLine LumTronix headlamps allow 50% more light to shine through thanks to their crystal clear lenses and a special side lens that extends past the retaining ring. This side lens is a true safety innovation and was designed to provide additional side light and increase visibility. Each headlamp features a Euro style diamond cut reflective base, diamond crystal glass, and a heat resistant composite housing. Even though no paint or tint is applied to the glass or reflector, the Black Illusion headlamps look blacked out when off thanks to the halo and lamp shields that are painted black. Headlamps are available with or without a halo, either single color halo (white) or multi-color halo (with 16 selectable colors plus the ability to adjust brightness), with or without turn signals and your choice of clear or blue H4 Halogen bulbs or H4 LED bulbs. The halo or "Angel Eyes" can also be wired as a daytime running lamp and features 23 low temp LEDs with a 100,000+ hour life, along with "fade", "flash", "strobe", and "smooth" modes that you can choose with the included wireless remote. Headlamps plug directly into your stock harness for a simple and easy installation. Each pair includes: 2 headlights, 2 bulbs, dust boots, ceramic tip pigtail harness adapter, and instructions. Multi-color halo sets also include the RGB harness and wireless remote.

Important: Will fit most vehicles (cars, trucks, motorcycles, and motor homes) made from 1936 to 1979, as well as many vehicles made after 1979 that use a universal round style headlight.

Note: Blue Halogen bulbs are blue in color when off, and bright white when on (no blue tint). Clear Halogen bulbs are clear in color when off and bright white when on. LED bulbs include colored film to change the look and temperature color of your lights.

EH002

Headlamp Wiring Harness Upgrade

Redline Lumtronix wire harness kit upgrades the stock headlamp wiring on your vehicle to provide your new bulbs with maximum power and decrease the chance of overloading the stock wiring and connectors. Power will be drawn directly from your battery, eliminating voltage drops and ensuring headlamp system reliability. The upgrade kit installs easily in 5-10 minutes without any cutting or splicing. Simply plug into your factory headlamp sockets, attach positive connectors to battery terminal and ground wires to the body of your vehicle. Two 30 amp relays provide added protection for your headlamp switch and wiring harness.

Headlamp Wiring Harness Upgrade

Our wiring harness set upgrades the thin stock headlamp wiring on your vehicle, providing your new bulbs with maximum power and decreasing the chance of overloading (and possibly melting) your stock wiring and headlamp connectors. Power will be drawn directly from your battery, eliminating voltage drops and ensuring headlamp system reliability. Two 30 amp relays provide added protection for your headlamp switch and wiring harness.

9005/9006

Halogen Headlamp Harness

To get maximum power from your headlamps, it is recommended to have the shortest possible distance between the power source and the bulbs. Resistance in small gauge wire or in the switch will lower the output at the lamp. Be Safe! Our headlamp harnesses draw power directly from the battery, through a relay, to the headlamps, providing full power to your Halogen sealed beams. They can also be used to relocate headlamps to a remote location. They are made with TXL high temp wire, weather resistant 30 amp fuse, and two 40 amp weather resistant relays capable of handling up to 150 watts. #30816 is for use on vehicles with a 2 headlamp system using dual filament sealed beams. #30817 is for use on vehicles with a 9005 and 9006 bulb on each side.

30816 for 9004 & 9007 Halogen bulbs 119.99 ea

Crossflow Conversion Core Support

Aluminum core supports for 1955-57 models. These units are lighter than original steel and are configured for Be Cool crossflow radiator conversions. These core supports are designed for the radiator to mount on the front/grill side of the support (OE 6 cylinder location). This allows more room for LS engine swaps and the use of short or long water pumps on small block and short water pump on big block applications.

Note: Can be used with other crossflow radiators by fabricating brackets from your radiator to the existing holes in the support. Shipped double oversize.

Adjustable Hood Prop

Constructed of high-quality aluminum and stainless steel, these adjustable hood props offer great looks as well as functionality on your ride. When the hood is raised, the hood prop will automatically lock itself into position. A quick release allows the hood to be opened to its max for easy engine access. A three position and a six position option allows the hood to be set at various levels. Each level of the 6 position prop increases the opening of the hood by approximately 6". Each level of the 3 level prop increases the opening of the hood by approximately 12". They also works great for cooling your engine in the staging lanes.

Important Information Before Attempting to Install Sheet Metal!

Regarding Minor Imperfections in Panels:

The sheet metal you receive may have scratches, dings, small dents and other minor imperfections which are considered normal sheet metal characteristics due to the nature of the product. These minor imperfections will be easily corrected during the filling, priming, and sanding phase of your sheet metal installation. Classic Industries® does not consider dings, scratches, minor dents or other imperfections on the sheet metal to be defects in the panel nor are they considered damaged. All sheet metal panels will require some sort of preparation and manipulation during installation. Every panel that we sell is inspected and then carefully packaged to protect against damage that may occur during transit.

Test Fit All Panels Prior to Paint and Installation:

Classic Industries® recommends test fitting all sheet metal panels prior to final paint and installation. Minor modifications including elongating mounting holes, adding additional shims, etc. are normal and may be necessary when installing sheet metal. It is important to note that hard driving conditions, like racing, can twist bodies and frames out of original tolerances. Poor body work from previous collisions can cause problems with the body structure that the panels are attached to. Some vehicles were manufactured with a unitized body (no frame) thus causing even the most minor accident to twist the body creating a situation that would cause sheet metal panel misalignments. Take into consideration that tolerances on classic vehicles are not nearly as exact as they are on modern vehicles. This is primarily due to the hand fitting of panels at the factory on most antique and classic cars as opposed to the robotics used in today's modern factories. All of these factors will affect the way your new reproduction sheet metal will install and fit on the car. There is really no such thing as a direct fit body panel when it comes to older vehicles.

Returns and Defects:

Prior to returning any defective body panel or sheet metal item to Classic Industries®, please contact our customer service department. Classic Industries® will not replace a panel, nor will we be responsible for freight on returns should it be deemed that the panel is not defective. See policies for more information.

For Best Results, Hire a Professional to Install the Panels:

Classic Industries® recommends that you hire a professional paint and body technician that has the skills, knowledge and experience necessary to install the new panels on your vehicle. A professional body technician will be able to prepare the panels for installation and repair any imperfections.

When Welding Sheet Metal Products . . .

Save time when replacing sheet metal by using Classic Industries® new, innovative "Weld-Thru™" primed sheet metal products. Our all new coating process is designed to eliminate the unnecessary process of grinding or sanding the EDP coating off to ensure a solid and rust free weld. This "Weld-Thru™" Primer requires minimal preparation and eliminates corrosion problems between overlapped panels and layered spot welds. It also minimizes heat zone problems, reduces panel distortion, and allows better penetration into the dense replacement steel to compensate for the older metal's impurities. Look for the "Weld-Thru™" logo when purchasing sheet metal products to save time during installation of weld-on sheet metal repair panels.

Some Guidelines on EDP Coating

Many sheet metal products are delivered with a black electrophoretically deposited coating (EDP, or E-coat) for superior long-term corrosion protection, while others use a similar lacquer based coating designed to provide protection for storage and shipping. Before panel installation, Classic Industries® recommends applying lacquer thinner with a shop towel to determine the type of coating. If the coating is removed by lacquer thinner, then it should be completely stripped from the product before any primer or paint is applied. If the lacquer thinner does not remove the EDP coating, it can simply be prepped, primed and painted without stripping.

Classic Industries® The Restorer's Choice™

Count on the Classic Industries® Restorer's Choice™ symbol whenever purchasing reproduction parts and accessories. You can be sure that each and every product displaying this symbol is manufactured correctly to exact specifications and fits the way the factory intended. Products denoted throughout the catalog with this symbol are officially approved by Classic Industries® as a genuine restoration product. Look for the Restorer's Choice™ logo. The Classic Industries® symbol is your assurance of quality.

Made in the USA

Look for the "Made in USA" logo for products that are proudly manufactured in the United States.

Lock Assemblies

Make it easy on yourself by installing lock sets that already include the lock assembly and coded keys! Original replacement lock assemblies usually need to be coded to your original keys.

This process is eliminated when purchasing these sets. Choose from individual lock assemblies or complete sets which are guaranteed to make installation easier.

TK243

Set Includes:

✓ Ignition ✓ Door

1955-57 Ignition and Door Lock Set ⚠

Lock set designed to replace your ignition and door lock assemblies. Each set is supplied with "coded" cylinders and 2 precut keys which will fit the new door and ignition cylinders. Early locks are available with original style keys, or later style square and oval keys.

1955-57 Quarter Panel Skin

This is the finest quality reproduction quarter panel on the market. Stamped from OE gauge steel, these panels are designed to replicate the original contours and body lines exactly. Features pre-cut fuel door openings, partial door opening profile, and outer rocker flange. Made in USA.

Important: Two door hardtop/convertible quarter panels can be modified to fit two door sedan and wagon models by altering the front of the wheel opening.

Note: Shipped truck freight.

1955-57 Custom Deep Tub Floor Components

Adding mini-tubs to a vehicle that needs a complete floor pan has never been this easy! Add up to 12 inches of clearance with our custom deep tub components for 1955-57 models. Manufactured for an OE appearance while providing the added clearance needed for bigger tires. All items feature correct gauge steel, and factory style contours. The passenger floor and trunk panels come pre-notched and flanged with the spare tire well deleted. All parts are EDP coated for rust prevention, and are available as an assembly that includes front passenger area floor pan with trunk floor or just the trunk floor with mini tubs included. Trunk floor and mini-tubs are also available separately.

Important: Must use rear spring pocket kit in order to achieve 13 inches of clearance. Convertible models require modification. Will not fit wagon models.

Sheet Metal Tools

Blaircutter

When you don't have a lot of holes to make, Blaircutters provide fast, accurate holes in materials up to 3/16" thick. Blaircutters are annular cutting tools that cut around the edge of the hole and eject the center as a slug. Because they're hollow there's no dead zone as with twist drills. And unlike hole saws, that rip and tear through the material, they quickly give you a quality, virtually burr-free hole. Sold individually.

Note: D.O.C. = depth of cut. Arbors and Cutters sold separately.

Premium Spotweld Cutters

When you have a lot of spotwelds to remove, step up to the premium spotweld cutters for longer life in today's high strength body steels. These cutters have a heavier wall (.090") for extreme durability and two step geometry that splits the chips and helps clear them. Premium spotweld cutters have a fast cutting action and lasts for hundreds of spotwelds. They are for use in 3/8" or larger drill chucks. The spotweld cutters are available individually or in sets containing arbor, 3 cutters, your choice of 2 skip proof or 2 standard pilots.

Stick Lubricant

Ideal for all Blair hole cutters. Softer than standard stick lubricants, it provides superior adhesion to the tool and can be used in place of cutting fluids on ferrous and non-ferrous metals to increase tool life, improve cutting performance and easier slug removal.

11750 1.68 oz..... 12.99 ea

Double-End Spotweld Cutter

Double-end spotweld cutters makes removing body panels fast and easy. Their hollow design cuts around the spotweld so weld hardness does not affect tool sharpness. When one end becomes dull, simply unscrew the cutter and flip it over using the new teeth on the other end. An adjustable depth rod sets the tool so only the outer panel is cut, leaving the underlying panel undamaged.

Holcutter

Produce holes 3 times faster and cleaner than hole saws in sheet metal up to 1/8" thick and have dramatically extended tool life. Holcutters produce holes from 11/16" up to 3" diameter in sheet metal, rubber, gasket or fiber materials, and some plastics. Ideal for aftermarket installations, custom fabrication, trailers, or gauge installation. Arbor fits 3/8" drill chucks. Holcutters have a new, patented Quad-Lead Thread System for quick cutter changes. Buy the set and save! Holcutter set includes: arbor, hex washer, extra pilot and the following sizes of cutters, 7/8", 1-1/8", 1-1/4", 1-3/8", 1-3/4", 2", and 2-1/2".

Note: D.O.C. = depth of cut. Arbors and cutters sold separately.

Blair Cutter Set

Antenna and Access Holcutter Set

Note: Each set includes: arbor, extra pilot drills and cutters as shown.

14003 3/8", 1" and 1-1/4"..... 60.99 set

Rustproof Cutter Set

Note: Each set includes: arbor, three 1/2" cutters, pilot and extra pilot.

11081 with standard pilot - 11122..... 41.99 set

11095 with skip proof pilot - 11123..... 45.99 set

Paintless Dent Removal Access Hole Set

Note: Each set includes: arbor with standard pilot, extra pilot and cutters as shown.

11083 1/4", 3/8", 1/2", and 3/4"..... 48.99 set

Rotabroach Cutter Set

Rotabroach annular cutters are ideal for sheet metal fabrication, paintless dent removal and for cutting rustproofing access holes without clogging. Unlike hole saws and twist drills that push and tear through materials, these cutters will make hundreds of holes in steel, sheet metal or plastics up to 1/2" thick with no deforming of stock, jagged edges or out-of-round holes. Arbors for Rotabroach cutters fit 3/8" and 1/2" handheld drill chucks and use either spring loaded pilots or skip proof pilots which eliminate predrilling operations. Each set includes: arbor, Hex wrench, center punch, extra pilot, and a variety of cutters as listed.

Note: D.O.C. = depth of cut. Arbors and cutters sold separately.

Body Tools

The Filler Detective

The Filler Detective will find hidden body damage and body filler on a car, truck, or motorcycle. It will tell you where body filler is and how deep it is. This simple 1 button tool lights up and sounds when it detects body filler and features a visual alert with bright, daylight visible LEDs. The meter doesn't miss and it indicates exactly where the body filler is and includes a test plate to confirm accuracy. Never again wonder whether or not a vehicle has been in a wreck! The Filler Detective solves the mystery every time.

FDA0100 red..... 79.99 ea

EZ Rest Door Hanger

The EZ Rest door hanger enables a single person to quickly remove and/or install vehicle doors. The padded, removable side rails and plastic, ribbed base inserts allow for accurate positioning of the door. The easy on/off design quickly adapts to most floorjacks with a removable saddle and 30mm (1.18") diameter saddle hole.

Note: Floor jack is not included.

S21870 179.99 ea

Door Spring Tool

Compresses spring for easy safe removal. Slides safely over spring. Constructed of heat treated, high carbon steel.

S21900 25.99 ea

Door Hinge Adjuster Tool

You can now easily adjust the hinges without the aggravation of trying to align by eyesight with this handy tool. Specifically designed to help adjust the hinges so they help to align the door.

Y65800 52.99 ea

Door Hinge Pin Popper

The ultimate solution for removing door pins fast. Drives out even stubborn hinge pins. Works on most GM vehicles with removable hinge pins. Includes pin puller to remove loosened pins.

S21835 43.99 set

Door Bushing Tool

If you've ever tried removing a door hinge bushing with just a regular punch, you know it's a hassle. This tool makes it easy to punch out bushings and align bushings when reinstalling. Offset design allows for easy access to all door hinges.

S21825 20.99 ea

Door Aligning Bar

Finally, a convenient door aligning tool that will fit in your tool drawer! Features a Hex stub to use with a breaker bar and socket for additional leverage.

S21845 46.99 ea

Pro Paint Gauge

The Pro Gauge is a device which measures paint thickness. Factory paint is usually four to five mils in thickness. By using the Pro Gauge you can determine if the vehicle has been repainted. For instance, you can take measurements of about 4.5 mil around the vehicle but the hood may read seven mils on the Pro Gauge. That tells you the hood has been repainted.

PG2437 84.99 ea

Eliminator Rust Remover

Before touching up paint, you first must remove all rust, wax, and dirt or the rust will return and the paint won't adhere. This unique tool will scrub away all dirt, rust, and wax. The results are touch up paint adheres, seals and blends smoothly into the rest of the paint.

E3437 9.99 ea

Spot Weld Chisel

Chisel tool to separate panels after the spot weld has been drilled out. Drive the blade with a hammer from the end or the side through the panel seam. Panels are separated without damage. The blade is sharpened on three sides, and offset for clearance.

Note: The sharpened edges will wear with use. Resharpener on a grinding wheel.

Y51900 15.99 ea

Body Dent Removal Tools

The pull rod set includes: 4 pull rods with formed shank, 2 pick pulls with straight shank, straight edge and HS split point drill bit.

S20000 pull rods..... 47.99 set

Cleco Sheet Metal Fastener Kit

Everything you need to secure sheet metal panels during the fit and alignment stage. The pliers can be used with all standard spring loaded fasteners and clamps. The kit contains: one pair of Cleco pliers, twenty-five 1/8" Kwik-Lok Clecos and four side grip fastener clamps. Also available are individual components so you can add to your kit as necessary.

Complete Kit
X9858 29 piece 76.99 kit

Cleco Pliers
X9863 Cleco pliers 14.99 ea

Plugweld Pliers

These plugweld pliers make plug welding fast and easy. Panels won't separate and copper alloy pad prevents burn through, allows higher welding temperature and better penetration.

S23230 pliers 43.99 ea
S23231 replacement pad 14.99 ea

Vise Grip Flange Pliers

Preparing panels with an offset flange will produce a clean, flush fit. Work on up to 18 gauge sheet metal without removing panels from the vehicle. The added feature of "Vise-Grip" locking pliers allows for better leverage. Available with your choice of 1/2" wide non-slip jaw or wider 1" clamping surface.

13229 1/2" wide jaw 45.99 ea
X9853 1" wide jaw 41.99 ea

Seam Buster HD Chisel

Easily separate spot welded or bonded panels. Save up to 15 minutes per panel replacement. Great for quarter panels, rocker panels and other pinch welded areas. Sharpened on two edges, the sharp end allows for penetration between panels and the side edge allows for side impact to drive the panels apart without damage. Made of super tough alloy steel. Cushioned handle absorbs shock.

S20016 90 degree angle 40.99 ea
S20017 air hammer 56.99 ea

Body Chemicals

BlackTop Top Coat

BlackTop is a permanent, moisture cured, UV stable coating primarily used for top coating surfaces previously sealed with RustSeal or any other paint/primer application. BlackTop is a high-performance protective coating specifically formulated to withstand dulling and fading caused by prolonged sunlight exposure. BlackTop may be used alone as a resilient coating but offers the ultimate rust protection when used in combination with the RustSeal corrosion barrier coating as step 1. For the best stop rust and ultraviolet protection, first apply RustSeal to permanently seal the surface and then top coat with BlackTop for an incredibly tough and professional looking finish. Like RustSeal, BlackTop dries to a rock hard yet flexible coating that can be readily applied to chassis, coil springs, and lightweight panels. BlackTop also has high heat resistance and can be applied to almost all automotive applications except exhaust systems. BlackTop is intended as a final finish for parts that have been coated with RustSeal. BlackTop will retain its color and sheen even after repeated or prolonged exposure to direct UV light and will not degrade.

Nu-Metal Epoxy Putty

NuMetal Epoxy Putty is an easy to use, two part putty that mixes like clay but hardens like steel! No complicated weighing or measuring required. NuMetal bonds, seals, fills, insulates, anchors, caulks and waterproofs. It cures without shrinking or sagging and can be drilled, tapped, sanded, primed and painted. NuMetal will not only stick to damp surfaces, but it will cure underwater! Available in black.

Trunk and Floor Pan Repair Set

The KBS trunk and floor pan repair set allows you to restore your floor pan, trunk pan, or pickup truck bed back to new without producing any ugly weld seams. Our included step-by-step instructions make it easy and simple to use. After cleaning the area with KBS Klean (an industrial strength water based cleaner/degreaser), and KBS RustBlast (a powerful rust remover/metal etch), simply use the included BackBone reinforcing mesh and NuMetal epoxy putty to fill any small pin holes. Last, finish it off with a coat of RustSeal for a restored finish without any weld seams. Each set includes: 1 gal. KBS Klean, 1 gal. RustBlast, 1 qt. RustSeal, 1 lb NuMetal epoxy putty, 1 sq. yard BackBone Reinforcing Mesh, 8 oz. #1 Thinner, KBS paint spout, Nitrile gloves, mask, two brushes, stir stick, and complete and detailed instructions.
