Modern Technology with an Authentic OE Appearance!

BY12016

1955-57 Delco® Energizer Battery

The ultimate in underhood detailing! After hundreds of hours of rebuilding, scrubbing, painting, and sanding you settle for an ugly modern battery from one of those big national chain stores? Turn back the hands of time and restore the appearance of your Tri-Vee to stock by replacing a period incorrect battery with this original style reproduction. Manufactured by the nation's leading antique auto battery experts, these authentic reproduction Delco Energizer® batteries offer you true "tar top" appearance, using a special patented Poly-Tar® formulation, while eliminating the sticky hot weather disadvantages of a tar-top! Each battery is correct in every detail including acid resistant, screw-in or push-in type caps featuring Delco lettering or circles and are finished in the proper trim. Classic Industries® restoration professionals have a keen eye for originality, so we've ensured that all batteries have the correct caps and the exclusive "Delco-Eye" feature that was used to check electrolyte fluid level on applicable units. Each case has been manufactured to OEM dimensions, which vary depending on model ordered. Other details include: reproductions of the assembly line battery decal, featuring white label with red text attached to the battery post as well as correct Delco Energizer® lettering on the top casing! These reproduction batteries are the professional Restorer's Choice™ in engine compartment detailing for the street or concours restorations!

CAUTION: Maintenance-Free batteries are Gel-Cell type batteries and DO NOT require adding electrolyte (battery acid). Don't forget to check the battery tray for rust or corrosion, replacement now will ensure cleaner battery installation. *Includes six screw-in yellow caps with "Delco" lettering. All batteries measure 10-1/4" x 6-3/4" x 9".

Note: Batteries carry a 48-month manufacturer's warranty. Shipped overweight.

Battery Carrying Strap

This handy tool is a must for your tool box. Allows you to easily carry bulky automotive batteries without getting acid on your clothes and hands. Each end is marked and sized to fit the positive or negative terminals allowing a secure, tight fit onto the post. Battery acid won't harm the strap! For top post batteries only.

X205 carries top mount 6.99 ea

Battery Mat — Acid Neutralizer

The Battery Mat offers protection against undetected battery acid leaks. Once installed, the mat will trap and neutralize any battery acid that leaks from the terminals or top side of the battery, preventing corrosion and expensive damage. Each mat is made of super absorbent polypropylene needle punch felt, with one side heat treated to give it additional strength. The mat is inserted under the battery between the battery and the battery tray. It can easily be installed at any time either when replacing the battery tray or battery.

BM2427 yellow mat 6.99 ea
BM2428 black mat 6.99 ea

Battery Lifesaver — Corrosion Remover

Lead acid batteries will discharge, deteriorate and die without regular use or recharging because of corrosion and sulfates on the plates. This module, developed specifically for vehicles that are not driven on a regular basis to keep their battery fully charged, will actually recover lost battery capacity by removing plate corrosion, and in turn, extend battery life up to double or triple the normal life span!

BLS1 29.99 ea

Tremec T-56 All-in-One Harness

The All-in-One harness solution for the Tremec T-56 Magnum transmission comes equipped with all the connections pre-wired into one harness for a simple installation and ease of use. The small epoxy sealed controller is mounted to the VSS output using the existing bolt, and once the unit is powered up you will be able to connect via Bluetooth to your Apple or Android smartphone using (Bowler Transmissions) free APP. The APP will give you the ability to customize the input and output settings for each feature to ensure proper operation in your vehicle. This harness eliminates the need for any additional equipment to operate the reverse lockout or generate the correct speedometer signals coming from your Tremec T-56 Magnum.

A9800226 268.99 ea

1955-57 Dash/Instrument Panel Harness

The most essential section of wiring on any vehicle is the under dash harness. Virtually every other wiring harness is connected to this one, which also happens to be responsible for all dash instrumentation. Designed using original GM schematics and produced using correct color wiring and factory style connectors for authenticity, each harness duplicates your original in appearance, fit, and function.

Note: *6 metal and 2 plastic light sockets.

----------	--	----------

Universal Wiring Harnesses

Instrument cluster wiring is designed with a "cluster harness disconnect" system for easy service and assembly. All original terminals, connectors, and light sockets are also supplied for original cluster gauges. Any aftermarket gauge system can be easily and neatly wired in.

Engine wiring includes connectors for points type and HEI distributors. Power and tach connectors supplied for GM HEI distributors. Alternator connectors supplied for GM "SI" series alternator regulator alternators.

Engine wiring includes starter and gauge under leads for water temp, oil pressure, and tach. Heavy 9 gauge alternator leads are supplied. Power circuits are protected with link protectors.

Fuse box and custom mounting plate are designed for a fit-in under dash installation. Standard fuses and horn relay are mounted on fuse panel.

Steering column connectors will plug directly into most aftermarket columns as well as 1969 and later GM columns which utilize stock GM turn signal switches. The original column can also be used with the supplied mating connectors and contacts.

Along with wiring for your original dome/interior lighting, we have also included separate under dash light sockets. DOES NOT INCLUDE DOOR LAMP SWITCHES.

New ignition switch is provided with induced connective. Additional connectors and instructions are provided to use the original switch.

Note: Photo representation not actual harness

1955-57 Classic Update Wiring Harness Set

Designed to make wiring "that easy", Classic Update Wiring Harness sets allow you to easily convert to HEI ignition, use modern audio equipment, add power windows or even add AC to your vehicle. Engineered for specific year, make and model configurations, these update harnesses include all of the original style lamp bulb sockets, connectors and terminals. This wiring harness set boasts 19 features, making these one of the most advanced systems of their kind.

1955-57 Tri-Five Chassis Wiring Harness

This 27 circuit kit is designed to fit the 1955-57 Tri-Five model series passenger vehicle. In addition to factory circuits, this kit includes additional circuits for modern day power options and accessories. This harness features a factory location mounting plate for the fuse block, front and rear lighting sockets, factory and aftermarket instrument cluster harness, and dash and turn signal connectors. This harness utilizes GM color coded high grade TXL wire with the circuit identification printed on it for easy installation. The kit includes a 150 page installation manual written specifically for Tri-Five installation.

1955-57 20 Circuit Wiring Harness Set

RON FRANCIS

These wiring harnesses are built specifically for 1955-57 passenger car models. They feature wiring for the entire car and will work with most stock GM steering columns, as well as aftermarket columns such as idid and Fleming River. Will wire full gauge sets including tach and will address HEL, points and aftermarket distributors, neutral safety switches. Also includes wiring for high and low beams, indicator lights, parking lamps, turn signal lamps, and brake lamps. Will readily accept fuel injection. The wiring is high temperature, fire resistant and color coded. Features the circuit printed on each wire. All sets include a headlight switch, isolated cooling fan relay and color coded instructions. A unique serial number for each harness enables Ron Francis to technically support the installation to you or any subsequent owner.

1994-02 Fuel Injection Engine Swap Wiring Harness Sets

For maximum power with exceptional drivability nothing beats electronic fuel injection. And the easiest way to install a modern fuel injected engine is with one of these proven FI engine wiring harnesses. These harness sets are designed to allow you to properly wire your engine swap from a donor car or crate motor. A variety of harnesses are available to suit 1994-up LT1, LS1 and GM crate engine applications. Each of these sets include detailed instructions and illustrations.

The Detail Zone Wiring

RON FRANCIS

Each set includes the sensor connectors installed on 20 foot lengths of wire for custom installations, connectors for the sensor wires, and a Telorvek panel with installed wiring and connectors to plug into the factory computer. Designed to work with a specific transmission, so be sure to select the correct application from the listing below. Other non-computer controlled automatic and manual transmissions can be used but typically requires ECM reprogramming for best results. 1998-02 ECMs require use of all emissions sensors or a trouble code will occur unless the ECM is reprogrammed.

Note: *Corvette engines must use the Camaro/Firebird ECM in order to use this wiring kit. Also requires use of the 1998 Camaro throttle body for accelerator cable control. This engine utilizes the OBD II diagnostic system and if all emissions sensors are not used, trouble codes will set in a factory programmed ECM.

Painless Wiring

PAINLESS

The engineers at Painless have worked out all of the connection and routing problems so all you have to do is follow the straight forward instructions for a painless installation. Feature TXL high temp wire that is color coded and labeled with each application for ease of installation. Harnesses for the LS1 applications require 1998 Camaro computer GM606 and a mechanical throttle body.

Important: *Includes a module to bypass the vehicle anti theft system (VATS) incorporated in the computer. Does not include any emissions related connections.

Universal Wiring

Highway Series Modular Fuse Panel Systems

Each universal fuse panel is constructed in heat resistant nylon and features anti-push back locks and single side wire access with self-locking, screw down connections. Includes a starter/alternator 175 amp mega fuse for extra protection. The panel is fed through an 8 gauge power feed wire and features a battery and accessory stud connection. Includes: color coded wiring for ignition, alternator, headlight, steering column, accessories and gauges, relays, fuses, flashers, circuit breakers, and all necessary power connections and terminals. Also includes a full color schematic and step-by-step instructions.

20 Circuit Harness Includes:

- Horn relay, floor dimmer, courtesy light connections.
- Standard brake light connections w/round brake light.
- Heavy gauge main fuse panel feed wire.
- Complete engine compartment wiring for lighting and engine management.
- Complete rear body wiring for lighting & fuel tank.
- Heavy gauge alternator, main power, and starter solenoid wires.
- Heat and air conditioning lead wires as well as accessory radio and battery clock leads.
- Long ignition, accessory, and battery leads for the ignition switch. A separate alternator exciter lead wire is wired in.
- Plug-in steering column connector for 1969 and later GM columns. Original columns can also be wired by using the supplied mating connector and terminals.

20 Circuit Universal Chassis Harness

The Power Plus series is a complete deluxe integrated fuse box wiring system utilizing a complete factory style pre-wired fuse box. Power Plus series wiring kits are designed to offer an economical and convenient wiring solution. By eliminating the disconnects and sub-harness assemblies and implementing direct run technology to the switches, fuse panel, and end locations, these kits offer a more streamlined installation and less work for you!

25 Circuit Universal Chassis Harness

The Painless Pro Series gives you everything you need to wire up your Pro-Touring or custom ride right the first time! Ample length is provided for each circuit, providing you the freedom to route and hide your wiring how you choose. Once you've got the harness fit how you like it, included are over 25 GM factory style connectors found on most '60s to early '90s GM switches, allowing you to turn the Pro Series harness into a direct fit harness for your application. LED ATC bladed fuses get you away from the old hard-to-find glass fuses, and will light up if blown making troubleshooting a painless task. The 6 gauge charge wire and midline fuse (no more problematic fusible link!) will keep up with today's high amperage alternators, and the provided front and rear ground harnesses making grounding your lighting circuits a breeze! Provided with many GM connectors and terminal, insulated and non-insulated butt splices, heat shrink, grommets, cable ties, ground straps, and cable tie clips, the Pro Series brings a new meaning to truly Painless wiring and includes our lifetime guarantee.

14 and 20 Circuit Universal Fuse Block

Use these 14 or 20 circuit OEM style prewired fuse blocks to replace your existing fuse block or as a starting point for custom wiring. All you have to do is terminate your circuit wire and attach it to the fuse block. Prewired and labeled for the following circuits: Air conditioning/heat, gauges/dash instruments, brake lamps, headlamps, coil, horn, dome lamp, radio, electric fan, turn signals, emergency flashers, wipers, and alternator. The 20 circuit fuse block also includes circuits for power windows, door locks and other optional accessories. Kits include: mounting bracket, fuses, flashers, horn relay, terminals, and full instructions.

Important: No wire included with these kits.

14491	for mini fuses	6.99 ea

RON FRANCIS

TF900629

Remote Battery Disconnect

With this setup, one click of the key bob completely shuts down your vehicle's entire electrical system. It's accomplished by routing your main battery cable through a remote cutoff solenoid that you've stashed in a place inaccessible to a thief. For even more security, the 4 channel "Safe-n-Sound" system not only shuts off all power from the battery, but will also control 3 other items, like closing the windows, triggering the power door locks, and interrupting electrical power to the fuel pump, all separate from the main battery cutoff. The 4 channel package can handle up to 30 amps worth of electrical equipment.

TF900629	single channel	155.99 ea
TF900628	4 channel	220.99 ea

PAINLESS

30205

Remote Master Disconnect

We offer two Master Disconnect sets with 250 amp continuous duty solenoids designed for use with high amperage alternators. Remote Master Disconnect set 30204 uses a small toggle switch to activate the solenoid. This switch can be hidden anywhere in the vehicle as a theft deterrent. Master Disconnect with emergency push button is perfect for drag race applications as it allows you to install a large emergency push button in easy reach if you need to shut down your vehicle's electrical system in a hurry. Remote master disconnect with mechanical latching solenoid is ideal for everyday vehicle applications and is a simple and effective anti-theft deterrent. It uses a 110 amp continuous duty solenoid which is activated by an easy to hide momentary push button.

X-Treme Tape

X-Treme Tape was developed for the military and has some very unusual properties. The silicone based tape will stick only to itself, and only when placed under tension. Once wrapped around an object, it forms a non-conductive, air and watertight, insulating seal that remains flexible within a temperature range of -60 degrees to 500 degrees F. Insulates to 8000 Volts. Stretches to 3X's its length. Conforms to irregular shapes. When wrapped upon itself, it bonds together immediately and becomes completely fused after 24 hours at room temperature.

4 Piece Wire Loom Set

Wire loom is a great way to clean up your engine bay and hide engine, audio and any other electrical wires on your vehicle. Manufactured from a flexible polyethylene tubing, wire loom organizes wiring, eliminates clutter and protects wires from abrasion and heat. Wire looms comes split for easy wire insertion and removal. Also ideal for shop use as a computer use. Each set includes four 10 ft rolls in four different diameters (1/4", 3/8", 1/2", and 3/4" i.d.).

Universal Wire Grommets

Sometimes you are forced to punch a hole in your firewall to get additional wires into the engine compartment, but that hole you cut is sharp and can potentially sever wires. To help prevent this, install one of these universal wire grommets. In addition to the added protection, these grommets also give the hole in the firewall a cleaner appearance.

Note: *Can be drilled out up to a 1/4" opening.
