PRODUCT EMISSIONS GUIDE

Please visit help.classicindustries.com/en/emissions-compliance-guide for more details.

1

CARB EO Compliant (50 States) – This product is covered under a CARB EO and is legal for sale and use in all 50 states.

Products that have completed the CARB EO process belong in this category. EPA recognizes the CARB EO as a reasonable basis demonstration, therefore products can be considered legal by both CARB and EPA.

2

Legal in U.S. (Excludes California) – This product is covered under the Emissions certification or has otherwise met the requirements of the EPA's Tampering Policy and is legal for sale in states that do not mandate Executive Order (EO).

Products that have demonstrated a reasonable-basis emissions compliance either through engineering evaluation or testing, but do NOT have a CARB EO. For example: Testing has been completed and paperwork submitted to CARB but the EO has not yet been issued. The product meets the reasonable basis standard but may not meet CARB's criteria for an EO. Testing has been performed but decided not pursue a CARB EO.

3

Non-CARB Compliant – This product is not legal for street use on an emissions-controlled vehicle. It may be used on a dedicated competition or pre-pollution-controlled vehicles only.

Some products can never be legal for use on pollution-controlled vehicles (both for use on the road and off-road), but they do have legitimate use on racing vehicles and vehicles that predate emissions regulations. Pre-certification means: 1965 and older domestic vehicles in California, 1968 imports in California and both domestic and imports under EPA jurisdiction.

4

Non-Emissions – This product does not require an EO in California. By nature of its design, it is legal for sale and use in all 50 states. Replacement parts included.

Products that have little or no impact on emissions, such as drop-in air filters or exhaust components downstream of the last emissions component (such as the catalytic converter, DPF or exhaust gas sensors). Also included are devices that plug into the OBD port to monitor information, but do not alter the vehicle's electronics.
